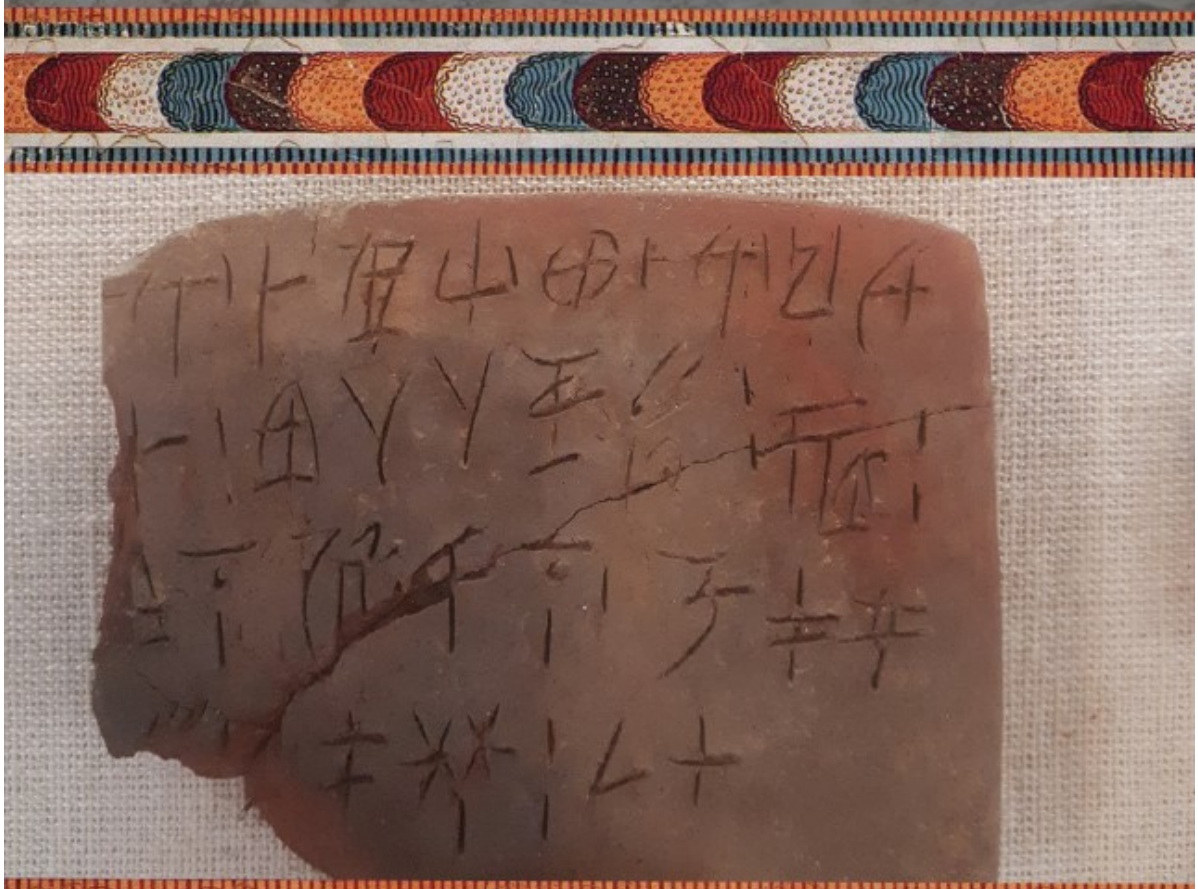
VOLUME I PART VI

The Decipherment of Minoan Linear A

Hurrians and Hurrian in Minoan Crete
Indices & glossaries 4



by PETER VAN SOESBERGEN

INGRAMSPARK

PETER G. VAN SOESBERGEN

Peter G. van Soesbergen (born in Amsterdam, 7th February 1945) studied Classics at the University of Amsterdam (Doctoral Examination *cum laude*). He pursued research on *The archaeological context of Minoan Linear A* for *The Netherlands Organization for Pure Research* (report of 400 pp.), published several articles and gave papers at international colloquia and congresses (Heraklion, Bucharest, Sheffield, Nottingham, Prague, Rome, Naples), a Mycenaean Seminar on *The historical significance of onomastic data from Linear A and B texts* (Institute of Classical Studies, University of London) and special papers on Linear A at Cambridge and Groningen. He pursued research as a Leverhulme European Visiting Fellow and Independent Research Worker at the University of Sheffield, where he received the degree of Doctor of Philosophy (PhD) on the thesis *The onomastics of the 'Minoan Linear A' and 'Linear B' documents and their historical significance.*

THE DECIPHERMENT OF MINOAN LINEAR A - VOLUME I - PART VI

Linear A ***a-da-ki-si-ka*** (KH 5.1) represents a beautiful Hurrian name, for it can be analysed as Hurrian ***ašd=a-kizzi=ḫḫ(i)=a***, consisting of the *a*-stem ***ašd=a*** 'woman' and the *essive -a* of ***kizzi=ḫ(ḫ)i*** 'jewel', so that it can be translated as 'The woman (is/shines) like a jewel' or more specifically 'The woman (is/shines) like a hairpin of precious metal', if we take into account that ***kizzi/uḫu*** at Qatna is the designation of a *golden pin* and that Linear A ***ja-ki-si-ki-nu*** (AK Zf 9) is written on a *silver hairpin* from Arkhanes, that can be analysed as ***ya-kizz=i=ḫḫi=nnu*** 'as it is a jewel'.

The second sequence ***a-ra-u-|da*** (KH 5.1-2) is a Hurrian 'one-word' personal name or perhaps a toponym ***Arau*** in the *directive* case, with *directive* suffix ***-da*** 'to, for', or the *ablative* case, with ablative suffix ***-dan*** 'from'. The personal name ***Arau*** (wr. ***A-ra-u***), analysis ***ar=av***, translation 'I give (the boy)', is actually attested at Old Babylonian Sippar (Dekiere 6, 917 Beischrift), cf. Th. Richter, *VHN*, 584-585, sub 1.1.2: *Names with verbal forms of the Mitanni-paradigms*. The scribe knew, whether he meant the directive or the ablative case, but we do not, since a final ***-n*** is not expressed in Linear A and B. If ***Arau*** represents a toponym, the ablative is more likely, since ***ar=au=dan*** could then refer to the provenance of ***a-da-ki-si-ka*** (KH 5.1), but if the tablet is about a transaction between persons, ***a-ra-u-|da*** means either 'for Arau' or 'from Arau'. Linear A ***a-mi-da-u*** (ZA 10a.3) from Kato Zakro and ***a-mi-da-o*** (HT? 170a.5) from Hagia Triada belong to the same type of Hurrian personal names. They can be analysed as ***amm=e/id=au*** 'I shall reach (something)', 1st person singular future indicative of the verb ***amm-*** 'to reach (something)', or as ***am=e/id=au*** 'I shall observe (something)', from ***am-*** II 'to observe'.

Comparing Linear A ***wi-sa-sa-ne*** (KH 5.2) with ***ᵈP/Wiša(i)šapḫi*** and its analysis ****P/Wižaiža=ve+ġe » P/Wižaiža=p+ḫe***, we see that the name of the mountain is ***Piša(i)ša*** or ***Wiša(i)ša*** and that ***°=ve+ġe » °=p+ḫe*** reflects the genitive suffix + the ethnic suffix. As a result Linear A ***wi-sa-sa-ne*** may well consist of the name of the mountain ***Wišaša / Wišaiša*** + the alternative Hurrian ethnic suffix ***-n(n)i/e*** as we encounter in ***Mašrian(n)i*** 'Egyptian', derived from the country-name ***Mašria***. Linear A ***wi-sa-sa-ne*** (KH 5.2) may well be an ethnic used as a personal name, translation 'The one of (Mount) ***Wišaša***'.

Linear A ***wi-na-du*** (KH 5.3) may be interpreted as the Hurrian sentence-name ***P/Win-ašdu***, analysed as ***p/win-aždu*** and be translated 'Lift (the child), oh woman !', 'Pick (the child) up, oh woman !'. Linear A ***ku-pa-do*** (KH 5.3) can be analysed as an Old Hurrian verbal 'one-word' name ***ḫub=ad=o=n***, with root-extension ***-ad-*** of unknown meaning, 'He/She (a *numen*) destroyed (the deceased child)' or as an Old Hurrian *imperative* ***ḫub=ad=o*** 'Destroy (the deceased child) (oh *numen*) !'.

A photograph of Linear A tablet KH 5 from *Χανιά / Khaniá* is printed on the front-cover.

The name *Khaniá* is Hurrian ***Ḫan=i=a*** 'He (a God/the King) created (the palace)'.

KH 5.1-2:	*a-da-ki-si-ka* , *a-ra-u-|da* ,

INTRODUCTION TO THE 'INDICES AND GLOSSARIES'

Already for the 2016 edition of *Minoan Linear A* I had decided not to create only one general *Index*, but to divide the *Indices* over several categories. Although it entailed a lot more work, I think that it was worth the effort. I did not realize at the time, what the consequences would be, if the number of identifications and interpretations tripled, so that *Minoan Linear A*, Volume I, Part I – II (2016), with over 1000 pages, expanded to *The Decipherment of Minoan A*, Volume I, Part I – VI (2022), with over 3000 pages.

I am therefore very grateful to my partner who showed so much tolerance taking the many jobs that I should normally have done in house and garden, out of my hands.

The decipherment of Minoan Linear A has by now reached a stage, that there can no longer be any doubt that the Minoan vernacular written with Linear A is a Hurrian dialect and cannot be anything else. The Linear A *Indices* in this revised and extended edition of *The Decipherment of Minoan Linear A*, Volume I: *Hurrians and Hurrian in Minoan Crete*, Parts III - VI, IngramSpark 2022, are still references to the main text of Volume I, Parts I - II, but they are now called '*Indices and glossaries*', because they have grown in size. The *lemmata* of the *indices and glossaries* are more elaborate and extensive than they would have been, if they had only been references to the main text of Volume I. Perhaps they will also be published as E-book.

It is my intention to incorporate eventually all entries in all Linear A texts published in *The Decipherment of Minoan Linear A*, Volume II, *Corpus of transliterated Linear A texts*, systematically into the alphabetic *Glossaries*, that can be extended more easily than the main text of Volume I. I have started the process with the Linear A texts from Arkhanes, which are the first of the *Corpus*. I hope to be able to finish the enormous task myself, but I am not sure that I can because of my age and health. I have set out the framework and shall make provisions to enable other scholars to finish that task.

The Minoan civilization is the first great civilization bringing literacy to Europe. It has finally become possible to trace its roots back to the great civilization of the Hurrians in the Near East. The picture arising from the Linear A evidence is that the Minoans were even more exclusively Hurrian than the Hurrians in Mitanni who had to deal with Akkadian Babylonians and Assyrians, with Eblaites, Amorites, Kassites, Egyptians, Hittites, Luwians and possibly Indo-Iranians as well.

The Minoan-Hurrian civilization inspired the Mycenaean Greeks to bring about great achievements themselves, that laid the foundations for the Greek civilization of the first millennium B.C.. It is most intriguing that some formulaic phrases in Homer do not only go back to the Mycenaean age, but can be recognized as renderings of Hurrian phrases in Minoan Linear A. I hope that the reader will find as much joy in reading the books as I have found in disentangling the puzzles.

Peter G. van Soesbergen,
Château Belkmer, August 2022.

INDICES & GLOSSARIES

HURRIAN

paba ‘mountain’; ***papni < pab(a)=ni*** ‘the mountain’; LÚ ***pabanḫu*** ‘mountain-dweller’.

Th. Richter (*VHN*, 222, 477) mentions ***Panašḫe*** (wr. *Pa-na-áš-ḫe*) from Mari, a mountain-dweller (LÚ ***pabanḫu***) from Ṭāb-salim[KI]. The name can be identified as a noun in *°=a=šḫe* (Wilhelm/Süel, 2013, 157). He mentions (*VHN*, 40, 477) the sentence name ***ᶠAk***[***ap-p***]***anazzi*** (wr. *ᶠAk*[*ap-p*]*a-na-zi*) from Mari, analysis {*ag=a=b-panazzi*}, typology 1.1.1.3.1, lexicon *ag-*, *panazzi*, translation ‘*Panazzi* kam herauf’ [‘*Panazzi* came up / appeared’]. It may be a formation in *°=a=zzi*, although such forms mainly appear in ‘one-word names’. Th. Richter (*VHN*, 136-137) also mentions ***Ḫerzi*** (wr. *Ḫe-er-zi*), a man living in the mountains (LÚ ***pabanḫu***) at Mari and the same name at Nippur (wr. *Ḫe-er-zi*), cf. Clay, *PNCP*, 80, who reads *Ḫi-ir-zi*, analysis {*ḫerž=i*} (imperative), typology 1.3.1.2.1, lexicon *ḫerz-*. The meaning of the verbal root ***ḫerš-*** and ***ḫerz-*** is not yet known.

Tattip-papni (wr. *Ta-at-ti-ip-pa-ap-ni*), cf. I.J Gelb, *NPN*, 150; cf. P.M. Purves, *NPN*, 263, s.v. *tatt, -tatta, tattip-, tattu*. ***Tattip-papni*** can now be analysed as {*tatt=i=b-pab(a)=ni*} ‘The mountain, it loves (the child)’. Th. Richter (*VHN*, 221, 478-480) analyses ***ᶠPaḫri-papni*** (*ᶠPa-aḫ-ri-pa-ap-ni*) at Ašnakkum as {*faḫri-pab(a)=ni*}, lexicon *p/waḫri*, *paba*, ‘Good is the mountain’. …….. **390**, **577**, **815**

pad- and ***patt-*** are taken together by Th. Richter (*VHN*, 482-483) on the analogy of the variants ***tad-*** and ***tatt-***. He mentions the following personal names s.v. ***pad-/patt-***: (1a) {*pad-*}: *Pataja* (Tuttul); *ᶠPatatte* (Mari); *Patija* (Mari); *ᶠPatul* (Mari); *Patum-atal* (Mari). - (1b) {*patt-*}: *Pattikki*(?) (Tigunāni). - (2) {*pad=all-*}: *Pataлla* (provenance not known); *Patallan* (Mari). - (3) {*patti*}: *ᶠPattae* (Mari); […]*men-pattae* (Mari). - (4) {*padindi*}: *ᶠPatinta* (Mari).

Pad(d)atiššu, King of Kizzuwatna, cf. E. Laroche, *NH*, 138, Nr. 957. Roi du Kizzuwatna *ᵐPad-da-ti-iš-šu, Pa-da-ti-iš-šu*, XXXIV 1 + 1815/c Ro 5-20 = *MIO 1*, 115 sqq. Hourrite selon Meyer, *MIO 1*,121; indo-aryen selon Landsberger, *JCS 8*, 50 sq. The second element ***-ti-iš-šu*** may equal ***teššu-*** (sometimes ***tiššu-***) as hypocoristic first element in Hurrian personal names containing the name of the Stormgod ***Teš(š)ub***, such as ***Tešup-erwi***, ***Tešup-mati***, and variant ***Teššu-mati***, which might be the result of a process of assimilation (***-pm- > -m-***). See also hypocoristics as ***Te-eš-šu-ia***, ***Te-šu-ja***, ***Te-iš-su-ia***, ***Ti-iš-šu-ú-ia***, at Nuzi (cf. P.M. Purves, *NPN*, 265, s.v. ***teššu***, ***teššuia***). The variant writings ***Pad-da-*** and ***Pa-da-***, probably < ***p/wand-*** and ***p/wad-*** ‘just, righteous’ plead for a Hurrian identity of the name as well. So Meyer’s identification seems correct.

If my analysis of ***Pad(d)atiššu*** is correct, the (*intransitive*) meaning ‘*Tešub* is just, righteous’ is comparable with the Linear A personal name ***wa-du-ni-mi*** (HT 6b.1; HT 85b.4-5) {*wa(n)d=u=n(na)-irmi/ermi/erwi*} (transitive) ‘Make him/her [*n(na)*] good / just, oh Lord !’.

It is very likely that ***pad-*** / ***patt-*** can be equated with ***p/wand-*** and ***p/wend-*** {*fa/end-*}, cf. Th. Richter, *VHN*, 477-478. He offers for the adjective ***p/wandi*** the meaning ‘rechts’ [‘right’] with regard to indications of place or direction, cf. Th. Richter, *BGH*, 293ff.

In metaphorical sense ***p/wand-*** and ***p/wend-*** means ‘gut, günstig’ [‘good, favourable’]. The *intransitive* verbal root ***p/wand-*** / ***p/wend-*** ‘recht/richtig sein’ [‘to be right, good, favourable’] may well be derived from the adjective, the *transitive* root means ‘recht / richtig machen’ [‘to make right, good, just, favourable’]. **548**, **553-554**, **557**, **881**, **982**

pade/i / wade/i or ***pande/i / wande/i*** can be translated as a *nominal* form 'Right, Good, Just' or as a *verbal* form ***p/wa(n)d=e*** 'make (something, someone) good, just !' and if it is a 'one-word' name ***P/Wa(n)d=e*** 'Make (the child) good, just (oh *numen*) !'.

Linear A ***pa-de*** (HT 9a.2; HT 9b.2; HT 122a.5) from Hagia Triada may well be Hurrian ***pade/i*** or ***pande/i***, but also ***Pade-n*** (AT 181:8) in the Alalaḫ tablets (see next *lemma*).

…… **508**, **553-554**, **557**, **591-592**, **596-597**, **603**, **889**

Pade-n (AT 181:8) in the Alalaḫ tablets is a Hurrian personal name with hypocoristic suffixe ***-n*** according to A. Draffkorn, *HHA*, 46, 96. At present final ***-n*** in personal names, based on a verbal root, would be explained as a shortened form of ***-nna***, the enclitic personal pronoun 3rd person singular, cf. I. Wegner, *Einführung*, 76-78.

Pade-n from Alalaḫ, or possibly ****Pade*** without the suffix ***-n***, can be equated with Linear A ***pa-de*** (HT 9a.2; HT 9b.2; HT 122a.5) from Hagia Triada and with Linear B ***pa-de*** (KN Fp 1,4). Final ***-n*** is not expressed according to the orthographic conventions of Linear A and B. The root ***pad-/wad-*** is probably derived from ***pand-/wand-***, cf. Th. Richter, *BGH*, 293-295, s.v. ***p/wand-***, *p/wend-* I [*passim*], (intr.) 'to be right, good, favourable', (trans.) 'to make right, good, just, favourable'. And since ***-n-*** preceding an occlusive is not expressed in Linear A and B, Linear A and B ***pa-de*** can also represent Hurrian ***Pande/i***.

The Linear A name ***Pa-de*** = Hurrian ***Pade*** or ***Pande/i*** can be translated as a nominal form 'Right, Good, Just' or as a verbal form ***Pa(n)d=e*** 'Make (the child) good, just (oh *numen*) !' or ***Pa(n)d=e=n*** 'Make him/her [***-n***] (the child) good, just (oh *numen*) !'.

Compare also Hurrian ***Panti*** (wr. *pa-an-di*) at Mari. Compare ****Wandi*** (wr. **Wa-an-di*, *AT* *25:4) at Alalaḫ VII and ***Wandi*** (wr. ZAG-***ti***, *AT* 135:4) at Alalaḫ IV [names from Alalaḫ VII are marked by *], cf. D.J. Wiseman, *AT*, 151; A. Draffkorn, *HHA*, 62. Cf. ***Pendu*** (wr. *pe-en-du*, with Akkadianizing nominative in ***-u***) from Nippur (J.A. Brinkman, *AfO 50 (2003/2004)*, 400).

As to interpretation of Linear B ***Pa-de*** C.J. Ruijgh (*EGM*, § 67) writes: "Parallèlement à ***a-re*** et ***ar-e-i-***, on rencontre les formes ***pa-de*** (KN Fp 1,4) et ***pa-de-i*** (KN F 953,2), qui ont chance d'appartenir à un théonyme préhellénique de ce type. En interprétant ***pa-d-*** comme ***Πανδ-***, élément préhellénique et asianique attesté dans les anthroponymes ***Πανδάρεος*** et ***Πάνδαρος***, on pourrait lire ***Πάνδῃ*** et ***Πάνδεί***, d'un nominatif ****Πάνδης***. Le datif ***pa-de-we*** e.g. ***Πανδήϝει*** (PY Un 219,2) pourrait représenter le thème en ***-ηϝ-*** comparable à ***Ἀρηϝ-***." C.J. Ruijgh's observation that Linear B ***Pa-de*** (KN Fp 1,4) et ***pa-de-i*** (KN F 953,2) may have been a Pre-Greek theonym parallel with ***a-re*** et ***ar-e-i-***, needs confirmation. Anyway, Linear A ***Pa-de*** (HT 9a.2; HT 9b.2; HT 122a.5) is in all cases a personal name.

It seems likely that Linear A and B ***Pa-de*** contain the same root. To date I have not found indications in Hurrian studies that ***pad-/wad-*** or ***pand-/wand-*** might have a theophorous connotation as C.J. Ruijgh suggested. The Hurrian root occurs usually as a verbal root in theophorous names, but the theophorous aspect depends on the many theonyms used as onomastic element. **508**, **553-554**, **557**, **591-592**, **596-597**, **603**, **889**

Pade-ya (wr. *Pa-ti-ya*) at Alalaḫ IV (*AT*, 202:39) is the same name as ***Patija*** (wr. *Pa-ti-ia*) at Mari, analysis {*pad=i=ja*}, typology 1.1.1.2.4, lexicon *pad-* (cf. Th. Richter, *VHN*, 229) and may not only be analysed as hypocoristic form in ***-ya***, but also as a transitive (ergative) verbal form, consisting of the verbal root ***pad-*** + the marker of transitivity ***-i-*** + the marker of the 3rd person singular ***-a***, cf. I. Wegner, *Einführung*, 90. F. Gröndahl, *PNTU*, 171, 346: ***Padiya*** (wr. ***Pa-di-ya***) and alphabetic cuneiform ***pdy*** at Ugarit.

Th. Richter (*VHN*, 222-223) mentions the Hurrian personal name ***Pantia*** (wr. *Pa-an-di-ia, Wa-an-ti-ia*) name of 4 persons at Mari and of 2 persons at Qaṭṭarā, {*fand=i=ja*}, typology 1.1.1.2.4, lexicon *p/wand-*, 'Er/Sie (scil. ein *Numen*) machte (Jungen) gut' ['He/She (scil. a *numen*) made (the boy) good'].

Compare also ***Wandi-ya** (wr. **Wa-an-di-ya*, *AT* *282:5) at Alalaḫ VII, in a text on distribution of rations of barley-flour (ZÌ.DA.ŠE). Total expenditure (ZI.GA) - 93 PA (= *parisi*).

Entries, however, only total 88: 19 to the controller of Kuwan, 27 to *Uwandarama*, 6 to *Kuduru*, 20 to *Wandia* and 16 to *Arip-kušuḫa* (cf. D.J. Wiseman, *AT*, p. 88, nr. *282). ***Wandi-ya*** (wr. ZAG-***ya***, *AT* 202:28), Alalaḫ IV, cf. A. Draffkorn, *HHA*, 63. Cf. ***Pendi-ya*** (wr. *Be-in-diya*, *mâr bîti*), cf. D.J. Wiseman, *AT*, p. 64, nr. 128:27; cf. A. Draffkorn, *HHA*, 48. E. Laroche (*NH*, 135, nº 929): ***Pantiya*** (wr. *ᵐPa-an-ti-ya*-[*aš*]), XV 12 IV 9. Hourrite; cf. *NPN* 170 sq.; *AT* 189,7; cf. *Bentiya*, *Wantiya*. *Bandišinni*: voir *Bentešina*; cf. E. Laroche, *NH*, 139, Nr. 958: ***Padutti***, abs. *ᵐPa-du-ut-ti-(ya)*, XXXI 65 Vo 7. - *ᵐPád-du-ut-ti*, 762/t Ro 3 (Werner.). The name can now be analysed as {*p/wa(n)d=u=tti*} 'Make me just/good (oh *numen*) !'.

At Kurruḫanni we find *Wa-an-ti-ia*, at Nippur *Pa-an-di-ia*, cf. Th. Richter, *VHN*, 223. At Nuzi 60 persons with the name ***P/Wandia*** are attested, see I.J. Gelb, *NPN*, 170-171, s.v. ***Wantiia*** (wr. *Wa-an-ti-ia, Wa-an-di-ia, Pa-an-di-ia*). ……. **117**, **553-555**, **575**

padi (*independent particle* ?) 'even ?', possibly *indefinite* 'someone' (cf. G. Wilhelm, *Orientalia 54*, 1985, 493), cf. I. Wegner, *Einführung*, 116. ……. **171**

pad=i=b-šarri is the analysis of ***Pa-ti-ip-***[LUGA]L*ʳⁱ*, a personal name attested at Tall Brak (Brak 1, p. 41, nr. 3: 1) that can be transliterated as ***Patip-šarri*** [LUGAL certainly equals Hurrian ***šarri*** because of the addition of *ʳⁱ* to Sumerogram LUGAL].

The personal name ***Watip***-LUGAL (wr. *Wa-ti-ip*-LUGAL), transliterated as ***Watip-šarri*** (wr. *Wa-ti-ip-šarri*) by I.J. Gelb (*NPN*, 173), is the name of a *judge* at Nuzi, which is significant, since the nominal root ***pand-/wand-*** (var. ***pend-/wend-***) means 'right' and metaphorically 'good, just, favourable', the intransitive verbal root 'to be righteous, just, good' and the transitive verbal root 'to make good, to do justice to someone, to treat someone in a fair way'. ***Watip-šarri*** can be analysed as ***Wad=i=b-šarri***.

Th. Richter analyses ***Patip-šarri*** and ***Watip-šarri*** as {*fad=i=b-šarri*}. The names can probably be identified with ***Pantip-šarri*** and ***Wantip-šarri***, analysis {*fand=i=b-šarri*}, either as a result of *apocope* of ***-n-*** before ***-d-*** or as a result of assimilation of ***-nd-*** > ***-d-***. Since all evidence points to identification of the roots ***pad-/wad-*** with ***pand-/wand-***, both ***Pa(n)tip-šarri*** and ***Wa(n)tip-šarri*** can be translated as 'The King of Gods makes/made (the child) good, just'. Cf. also ***We-en-di-ip-***LUGAL at Emar (Pruzsinszky 2003/2, 666) and ***Be-en-ti-ip-***LUGAL at Ḫattuša (E. Laroche, *NH*, 144, nº 1005). ***Watip-šarri*** and ***Patip-šarri***, analysis {*fad=i=b-šarri*} as well as ***Pantip-šarri*** and ***Wantip-šarri***, analysis {*fand=i=b-šarri*} have led me to the identification of Linear A ***wa-du-ni-mi*** (HT 6b.1; HT 85b.4-5) as an Old Hurrian personal name ***Wad=u=n(na)-Irmi*** or ***Wand=u=n(na)-Irmi***, 'The Lord made him/her [***-n(na)***] (the child) good'. ……. **548-549**

pag-/pakk-, cf. Th. Richter, *VHN*, 476-477: meaning unknown. Enough examples justify that the forms with single and double writing of the occlusives can be put together.

Linear A ***(-)pa-ku*** in the combination ***a-di-da-ki-ti ¸ pa-ku*** (KN Zc 6.2) may perhaps be compared with Hurrian ***(-)pa-ak-ki*** [Boğ.] in context (*ChS I/5*, 121 Vs II 14'), meaning not certain. In onomastics the root is more frequent, cf. the personal names ***Pakkukki***, ***Pakuzzi***, ***Pakazzi***, ***Pak(k)ari***, ***Pakiri*** at Mari, ***Pakašti*** at Tigunāni, ***Pakija*** at Qaṭṭarā and ***Pakkija*** at Alalaḫ IV and Nuzi, cf. Th. Richter, *VHN*, 221, 476-477.

There may well be a word division between ***a-di-da-ki-ti*** and ***pa-ku*** (KN Zc 6.2) as comparison with the other sequences ***a-di-ki-te-te*** (PK Za 11a), ***a-di-ki-te-***[***te*** (PK Za 12a), ***ja-di-ki-tu*** (IO Za 2), ***ja-di-ki-te-te*** (PK Za 8a; PK Za 15) suggests.

Moreover ***-pa-ku*** seems to follow another sequence in KN Zc 6.3. The formation of ***a-di-da-ki-ti*** is the most complete and offers a good Hurrian analysis {*ašdi-dakitti*} 'Woman-beauty' > 'Beautiful woman / lady' or 'The woman / lady is beautiful'.

The inscription KN Zc 6 is a painted inscription in 3 circular lines on the interior of a clay cup (HM 2630, 1902), starting from the middle, written before firing with a reed pen in black sepia ink. The clay cup was found together with clay cup KN Zc 7 of the same type and with characteristic MM III vessels on a later floor level within a MM I monolithic pillar room in the south-east of the Grand Palace of Knossos.

At Nuzi the personal names ***Pakka*** (wr. *Pa-aq-qa, Pa-ag-ga, Ba-aq-qa*), ***Pakaia*** *Pa-ka-ia*), ***Pakkaia*** (wr. *Pa-aq-qa-a-a, Ba-ak-ka-a-a*), ***Pakkiia*** (wr. *Pa-ak-ki-ia*) occur, cf. I.J. Gelb, *NPN*, 110; P.M. Purves, *NPN*, 242. At Alalaḫ VII hypocoristic ***ᶠPaga-ya*** (wr. *ᶠPa-ga-ya*), AT *65: 2, and at Alalaḫ IV ***Pakki-ya*** (wr. *Pa-ak-ki-ya*), s. Amma, AT 121: 2, 9, are attested, cf. A. Draffkorn, *HHA*, 46, 96.

Th. Richter (*VHN*, 221, 476-477) mentions ***Pakki*** (wr. *Pa-ak-ki*) at Alalaḫ VII and IV (AT *412; AT 295) and (wr. *Pa-ag-gi*) at Alalaḫ IV (AT 143: 18); ***Pakija*** at Qaṭṭarā; ***Pakkukki*** at Mari; ***Pakkari*** at Mari; ***Pakazzi*** at Mari; ***Pakašti*** at Tigunāni; ***Pakiri*** at Mari; ***Pakuzzi*** at Mari. According to Th. Richter it is justifiable to take the roots with single and double occlusives together on the basis of ***Pakkari*** at Mari (3x *Pa-ka-ri*) and (1x *Pa-ak-ka-ri*). He also mentions that De Martino, Murat and Süel (2013, 143) suspect that a root occurring as *pa-g^{o}* at Ortaköy/Šapinuwa is identical with {*fag-*} 'vertreiben' ['to expel, oust'], which makes a fricative bilabial likely, cf. also Th. Richter, *BGH*, 290, s.v. Hurrian ***wag=an-*** [Qaṭna] 'vertreiben' that equals Akkadian ***abāku***. If this equation is correct, Linear A ***pa-ku*** (KN Zc 6.2 and possibly KN Zc 6.3) may be analysed as an *imperative* ***pag=u*** or ***pakk=u*** 'oust !' or since final consonants are not expressed in Linear A, ***pag=u=n(na)*** or ***pakk=u=n(na)*** 'oust him/her/it !'. ……..…… **299**

pag/kk=ar=ašt=i may well be the Hurrian analysis of Linear A ***pa₃-|ka-ra-ti*** (HT 8a.1-2), a personal name containing two consecutive root-extensions. It consists of the verbal root ***pag-/pakk-*** + *factitive* or *iterative* root-extension ***-ar-*** + root-extension ***-ašt-*** (***-Všt***) indicating ending or completion of an action (as in 'Old Hurrian' ***pa=ašt=o=m*** 'he has built') + the marker of the transitive *imperative* (*jussive*) 2nd person singular in ***-i/e***. See for the *jussive* forms I. Wegner, *Einführung*, 103: Table 9: *The order of suffixes for the positive jussive*. See I. Wegner, *Einführung*, 88-89, s.v. root-extensions ***-ar-*** and ***-Všt-***, cf. G. Wilhelm, *Festschrift Heger*, 1992, 670. See I. Wegner (*Einführung*, 34, 96-97, 126-128) for the Old Hurrian formants 3rd person singular perfect in ***=o=m***. [note: I. Wegner has analysed 'Old Hurrian' ***ba-'à-áš-tum*** in the *Tiš-atal*-inscription as ***pa=ašt=o=m***, translation 'he has built', which may well reflect the Hurrian etymology of Linear A ***pa-i-to*** (HT 97a.3; HT 120.6) 'He (a God) has built (the palace)'.]

At Nuzi the personal names ***Pakka*** (wr. *Pa-aq-qa, Pa-ag-ga, Ba-aq-qa*), ***Pakaia*** (wr. *Pa-ka-ia*), ***Pakkaia*** (wr. *Pa-aq-qa-a-a, Ba-ak-ka-a-a*), ***Pakkiia*** (wr. *Pa-ak-ki-ia*) occur, cf. I.J. Gelb, *NPN*, 110; P.M. Purves, *NPN*, 242. At Alalaḫ VII hypocoristic ***ᶠPaga-ya*** (wr. *ᶠPa-ga-ya*), AT *65: 2, and at Alalaḫ IV ***Pakki-ya*** (wr. *Pa-ak-ki-ya*), s. Amma, AT 121: 2, 9, are attested, cf. A. Draffkorn, *HHA*, 46, 96. Th. Richter (*VHN*, 476-477) mentions ***Pakki*** (wr. *Pa-ak-ki*) at Alalaḫ VII and IV (AT *412; AT 295) and (wr. *Pa-ag-gi*) at Alalaḫ IV (AT 143: 18); ***Pakija*** at Qaṭṭarā; ***Pakkukki*** at Mari; ***Pakkari*** at Mari; ***Pakazzi*** at Mari; ***Pakašti*** at Tigunāni; ***Pakiri*** at Mari; ***Pakuzzi*** at Mari. According to Th. Richter it is justifiable to take the roots with single and double occlusives together on the basis of ***Pakkari*** at Mari (3x *Pa-ka-ri*) and (1x *Pa-ak-ka-ri*). De Martino, Murat and Süel (2013, 143) suspect that a root occurring as *pa-g^{o}* at Ortaköy/Šapinuwa is identical with {*fag-*} 'vertreiben' ['to expel, oust'], which makes a fricative bilabial likely, cf. also Th. Richter, *BGH*, 290, s.v. Hurrian ***wag=an-*** [Qaṭna] 'vertreiben' that equals Akkadian ***abāku***.

If this meaning can be ascribed to the Hurrian root ***pag-/pakk-*** and ***wag-*** (?), one may think of a difficult delivery of the baby in question, so that the name of the child reminds of the encouragement to the mother or a *numen* to oust the baby from the womb. As a result Linear A ***pa₃-\|ka-ra-ti*** (HT 8a.1-2), {*pag/kk=ar=ašt=i*}, may be translated as 'Oust (the baby from the womb, oh woman or oh *numen*) !'. Or if the child replaces a deceased child, the meaning may be 'Oust (the deceased child, oh *numen*) !'.

If ***pa₃\|*** (HT 8a.1) and ***ka-ra-ti*** (HT 8a.2) are separate entries, it has to be examined whether ***ka-ra-ti*** offers a conceivable Hurrian personal name. The monosyllabic logogram ***pa₃*** may be an abbreviation of Linear A ***pa-i-to*** *P(h)aist=o=m*'.

Th. Richter (*VHN*, 431, s.v. ***kar-***) mentions that a verbal root ***kar-*** (without root-extension) can be isolated from ***kari(j)e*** 'Vogelfänger' ['bird-catcher, fowler'] (see *BGH*, 190), that may be associated with Urartian ***kar=u-*** 'besiegen' ['to conquer'] (cf. G.A. Melikišvili, *Die urartäische Sprache*, Studia Pohl, Rome 1971, 83; V. Haas, *Rezension zu* Laroche 1980, *Bibliotheca Orientalis 39*, Leiden 1982, 604; I.M. Diakonoff, On some new trends in Urartian philology and some new Urartian texts, *Archäologische Mitteilungen aus Iran. Neue Folge 22*, Berlin 1989, 82[27]; M. Salvini, Die Felsinschrift Argištis I bei Ortakent, Kreis Hanak (Osttürkei), *Orientalia Nova Series 75*, Rome 2006, 75). I may also refer to M. Salvini - I. Wegner, *Einführung in die urartäische Sprache*, Wiesbaden 2014, 110, s.v. ***kar-*** 'besiegen, bezwingen' ['to conquer, to subdue, to control']. Th. Richter thinks that this root offers a good meaning for the Hurrian personal name ***e-ew-ri-ga-ri-im*** {*evri-kar=i=m(: b)*} at Kaniš (cf. Garelli 1963, 156) 'Der Herr besiegte (Feind)' ['The Lord conquered (the enemy)']. Therefore ***kari(j)e*** may originally mean '(Vogel-)Besieger' ['conqueror (of birds)']. Intransitive usage of the root ***kar-*** provides the meaning 'siegen' ['to prevail'].

Linear A ***ka-ra-ti*** (HT 8a.2) can be analysed as {*kar=a=tti*}, consisting of the verbal root ***kar-*** + marker of intransitivity ***-a-*** + *optional allomorphic* enclitic personal pronoun 1st person singular ***-tti*** instead of ***-tta***, subject of the intransitive verb, translation 'I prevail'.
…….. **578-581**

paḫ- 'to destroy'; ***paḫ=ed=a*** 'he will destroy', 3rd pers. sg. fut.; ***paḫ=ed=av*** 'I shall destroy', 1st pers. sg. fut., cf. I. Wegner, *Einführung*, 134. …… **180**

paḫ-a 'his head', KUB XLV 70 Vo 1, cf. E. Laroche, *GLH*, 192-193, s.v. ***paḫi*** 'tête'.

Since Linear A ***qa*** represents Hurrian ***ḫa***, Linear A ***pa-qa*** represents Hurrian ***paḫ-a*** in the combination ***i-di-ja ₂ pa-qa*** (PK Za 11.d) and …]***ja ´pa-qa`*** (PK Za 12.d).

The Linear A sequences ***i-di-ja ₂ pa-qa*** (PK Za 11.d) occur on a libation table from the Peak Sanctuary on Mount Petsophas south of Palaikastro, site of Roussolakkos. Black steatite libation table PK Za 11 (HM 1341, 1902-1906), exact date uncertain (*MSV* type 26.4, P. 342), with Linear A inscription on all 4 sides.

PK Za 11 reads:	Analysed structure and completion:
a. [*a*]-*ta-i-jo-wa-e* , *a-di-ki-te-te*-[*du*-]	a. [*a*]-*ta-i-jo-wa-e* , *a-di-ki-te-te*-
b. *pu₂-re* , *pi-te-za* , *a-ko-a-ne a*-	a-b. [*du*-]*pu₂-re* , *pi-te-za* , *a-ko-a-ne*
c. *sa-sa-ra-me* , *u-na-ru-ka-na-ti*	b-c. *a-|sa-sa-ra-me* , *u-na-ru-ka-na-ti*
d. *i-pi-na-mi-na* , *si-ru-te* , *i-di-ja ₂ pa-qa*	d. *i-pi-na-mi-na* , *si-ru-te* , *i-di-ja ₂ pa-qa*

Remarkably the texts of PK Za 11 and of PK Za 12 (HM 942, 1902-1906) have much in common. The more fragmentary text of PK Za 12 starts with ***a-ta-i-jo-wa-ja , a-di-ki-te-[te][.]*** and ends (side d) with ***´pa-qa`***, written underneath . . .]***ja***, which may well be completed to ***i-di-***]***ja*** as well. Text PK Za 12 shows that ***i-di-ja ₂ pa-qa*** (PK Za 11.d) consists of two separate sequences.

The analysis of ***i-di-ja ₂ pa-qa*** is either ***id(i)=i=j=aš paḫ(i)=aš*** 'their bodies (and) their heads' or ***id(i)=ja=n paḫ(i)=a(=n)*** 'with his / her body (and) his / her head'.

I. Wegner (*Einführung*, 63) mentions the form ***ed(i)=i̯a=n*** 'von/mit seinem Körper' ['from / with his body'] at Boğazköy, with the variant ***-i̯a-/-i̯e-*** of the enclitic possessive pronoun 3rd person sing. 'his' / 'her' instead of normal ***-i-*** + the shortened form of the ablative / instrumental, and since E. Laroche (*GLH*, 193) mentions ***paḫ-a*** 'sa tête' ['his head'], KUB XLV 70 Vo 1.

Linear A ***i-di-ja , pa-qa*** corresponds with Hurrian proverbial ***i-ti pa-a-ḫi*** etc. 'corps, tête' et autres parties du corps ['body, head' and other parts of the body], cf. E. Laroche, *RA 67*, 120. Thème ***ediy-a*** 'son corps' et ***ediy-aš*** 'leur corps'. *i-ti-ya*, KBo XI 7 I 11, 13; *e-di-a* Mâri 3, 18. *e-ti-ya-ša*, KUB VIII 60 I 20; *i-ti-ya-aš*, KBo XX 129 + II 40; KUB XLV 26 III 5, cf. E Laroche, *GLH*, 73-74. Single writing of Hurrian ***-t-*** in ***e-ti-*** and ***i-ti*** shows that the dental is voiced [***d***].

The meaning of ***paḫi / paḫe*** 'head' is known through a trilingual text from Ugarit. E. Laroche (*GLH*, 192-193), s.v. ***paḫi*** 'tête' ['head']: Lecture du sumérien SAG; E. Laroche, *RA 67*, 119 sq. RS tril. 135 Ro 3: [sa]g = *qa-qa-du* = *pa*-[*a-ḫi*], *Ugar. V* 237. - SAG-*ḫi*, KUB XXIX 12 I 5.

Th. Richter, *BGH*, 287, s.v. ***p/waḫi*** {*paġ=e*} 'Kopf, Haupt, Angesicht, Person' ['head, person']. The trilingual RS 135 Ro 3 compares: Sumerian [SA]G = Akkadian *qaqqadu* = Hurrian *pa*-[*a-ḫi*], *Ugar. V*, 237. It also corresponds with Hittite *ḫaršar* and Ugaritic *pḫ*. As a result Linear A ***pa-qa*** can be interpreted as ***paḫ-a*** 'his head'.

See for an extensive analysis Linear A ***i-di-ja , pa-qa*** (PK Za 11.d) and …]***i̯a ´pa-qa`*** (PK Za 12.d) from Petsophas. See also Hurrian ***id(i)=i=j=aš paḫ(i)=aš*** or ***id(i)=ja=n paḫ(i)=a=n***. …….. **258-260**, **296-297**, **350**, **353**, **357-358**, **846**

→ See also Linear A **]*i-ja-re-di-ja i-ja-pa*[** (IO Za 5) from Mount Ioukhtas.

paḫ(i)=uzzi 'suitable for the head'. The suffix ***-(u)zzi*** forms adjectives expressing an external quality or appearance that can be translated as 'suitable for, appropriate to/for'. The formant causes loss of the thematic vowel, usually ***-i***, or the ***i*** changes > ***u*** /***o***/ (I. Wegner, *Einführung*, 56-57). G. Wilhelm (*SMEA 29*, 1992, 241, n. 6) has proposed a segmentation of ***=o/u=zzi*** and explains ***=o/u=*** as derivational vowel of ***i***-stems. …. **138**

p/waḫri {*faḫri*} 'good, beautiful', primary adjective, cf. I. Wegner, *Einführung*, 53. **136**

ᶠPaḫri-papni (*ᶠPa-aḫ-ri-pa-ap-ni*) at Ašnakkum, that Th. Richter (*VHN*, 221, 478-480) analyses as {*faḫri-pab(a)=ni*}, lexicon *p/waḫri*, *paba*, 'Good is the mountain'. Cf. ***Tattip-papni*** (wr. *Ta-at-ti-ip-pa-ap-ni*), cf. I.J Gelb, *NPN*, 150; cf. P.M. Purves, *NPN*, 263, s.v. *tatt, -tatta, tattip-, tattu*. ***Tattip-papni*** can be analysed as {*tatt=i=b-pab(a)=ni*} 'The mountain, it loves the child'. ……. **390**

p/waḫroše {*faḫr(i)=o=še*} 'good' [< *waḫri* {*faḫri*} 'good']. [transition from ***i > o*** or derivational vowel ***o***], cf. I. Wegner, *Einführung*, 55, sub *adjectival morphemes* ***-še/-šše***: with ***-o=š(š)e***. ……. **137**, **191**, **558**, **985**

p/waḫrumme {*faḫr=umme*} 'the good, goodness, virtue', < ***p/waḫr-*** {*faḫr-*} 'to be good'; ***-um***, infinitive suffix at RS, Boğ., Msk.; ***-umma***, infinitive suffix at Nuzi. The formant ***=umme*** forms *infinitives* and *nomina actionis*, cf. I. Wegner, *Einführung*, 113. ..…. **168**

p/waḫrubade {*faḫr=ubad=e*} 'not good'. According to I. Wegner (*Einführung*, 59-60, 137: sub E 'Old Hurrian') the suffix-combination ***-ubade-*** may be segmented into ***-uw(a)*** + ***ade*** and ***-uw(a)*** may reflect the morpheme ***-wa-*** indicating a negation. ……. **141**

Paia (wr. *Pa-a-a*, *Ba-a-a*), cf. P.M. Purves, *NPN*, 242 s.v. ***pai***, ***paia***, cf. I.J. Gelb's list of 26 attestations of the name (*NPN*, 109). The name is equivalent to Linear A ***pa-ja*** (HT 41a.4) at Hagia Triada, that is either a 'one-word' name {*pa=i=a*}, consisting of I) the root ***pa-*** 'to build, create' + the marker of transitivity ***-i-*** + the suffix marking the subject of the transitive verb 3rd person singular ***-a*** or II) the root ***pa-*** + the Hurrian hypocoristic suffix ***-ya***. The 'one-word' name ***Pae*** (wr. *Pa-e*) occurs once at Nuzi, cf. I.J. Gelb, *NPN*, 109. It consists of the root ***pa-*** + the marker of transitivity ***-i-***, because the *imperative* does not have its own marker ***-Ø***, translation 'Build/Create (the child) (oh *numen*) !'. …….. **586**

Pa=(j)=ar=e/i may wel be the easiest Hurrian analysis of ***pa-ja-re*** (HT 8b.5; HT 29.2; HT 88.5; ZA 10b.5) on three Linear A tablets from Hagia Triada and on one from Kato Zakro. It occurs every time in lists of personal names. It is the last name on HT 8b: ***pa-ja-re*** 1F, followed by ***35+87*** = CAPSUS + chariot-frame JJ. Compare also Linear B ***pa-ja-ro***.

The analysis {*pa=(j)=ar=e/i*} comprises an *imperative* 'one-word' name, 'Build (the child) (oh *numen*) !', consisting of the root ***pa-*** 'to build, create' + the *factitive/iterative* root-extension ***-ar-*** + transitional glide ***-j-*** between two vowels.

Th. Richter (*BGH*, 285) mentions s.v. ***pa-***, ***paḫ-*** II [*passim*] '(er)bauen' ['to build'], in personal names 'schaffen' ['to create']. The root corresponds with Hittite ***weda-/wete-*** (M. Salvini, 1987/88, 181; E. Neu, 1988a, 7, 1996a, 184).

Perhaps Linear A ***pa-ja-re*** may also be compared with the Hurrian personal name ***Pairi*** (wr. *pa-i-ri*), analysis {*pa=i=ri*}, 2 x at Mari, lexicon *pairi*, typology 3.1, 'Someone who has built / created (the boy)', cf. Th. Richter, *VHN*, 219, s.v. ***Pairi***; 475-476, s.v. ***pa-***.

I. Wegner (*Einführung*, 216-221, 270) interprets ***pa=i=ri*** as a resultative participle 'someone who has built; architect', belonging to the verbal root ***pa-*** 'to build'. She compares ***pa=i=ri*** morphologically with ***ta-bi-ri-i-ma*** in the Hurrian-Hittite bilingual ***Kirenze***, KBo 32: 14 Vs. I 46 (cf. E. Neu, *StBoT 32*, 80), in the 3rd parable: *The goblet (chalice, cup) and its smith* (KBo 32: 14 Vs. I 42-59) and analyses the form ***tab=i=ri*** as verbal root ***tab/v-*** 'to cast (metal)' + ***i*** (marking transitivity) + ***ri/e*** (participial suffix) 'the one who has cast (metal); smith'. The forms in ***=i=ri/e*** are 'agent oriented resultative participles'. I. Wegner (*Einführung*, 21) points out that already before the Akkade-period (2230-2090 B.C., short chronology), the form ***ta/ibira*** 'copper-worker', for which a plausible Hurrian derivation can be given, occurs in Old Sumerian texts.

The ergative form ***ta-bal-li-iš*** (same parable, lines 42 and 55) is used synonymously to ***tab=i=ri*** (line 46). I. Wegner analyses it as verbal root ***tab/v-*** 'to cast (metal)' + ***li*** (formative indicating professional designations) following the root athemetically (***tab+li***) + the so-called singular article ***ne*** (***tab+li+ne***). If the article is used, *anaptyxis* occurs to make pronunciation easier (development of vowel between two consonants), as well as *apocope* (disappearance of the final vowel) > ***tabal(i)=ne***, so that the ***n*** of the article assimilates to the ***l*** of the stem > ***tabal=le*** '(Metall)gießer = Schmied' ['someone who casts (metal) = smith'] + ergative suffix ***-š***. In the Hittite text it corresponds with the Sumerogram ^{LÚ}SIMUG 'copper-smith'. Morphologically it can be compared with ***kebella*** 'the hunters', analysis ***kebel=la*** < ****keb+li+na***.

Since Linear A sign ***re*** can also be ***le***, comparison with Hurrian ***paili/e*** is also feasible, since according to Th. Richter (*VHN*, 219, 475-476) the frequent name ***Paila*** (wr. *pa-i-la*), 11 times attested at Mari, and (wr. *ba-i-la*) once at Sippar, is derived from ***paili***, analysis {*pail(i)=a*[E.]}, lexicon *paili*, typology 3.2.1, translation 'Er (Junge) ist gemäß des Gebauten (geboren)' ['He (the boy) is (born) like the one that was built / created'].

[E.] refers to the *essive* in ***-a***. Compare also *ba-il-te-sup* at Nippur; ***paili*** can probably be connected with the word ***pailija*** that can be interpreted as 'gebaut, erbaut' ['built'] and sometimes as 'das, welches ich gebaut habe' ['what I have built'] or 'das von mir Gebaute' ['built by me']. The same applies to the personal name ***Pailu*** (wr. *pa-i-lu*) at Mari, lexicon *paili* (→ *pa*), typology 3.1, analysis {*pail(i)=u*[N.]}, translation 'Das Gebaute (≈ Junge) (?)' ['the one that has been built/created (≈ the boy)' (?)]. [N.] refers to the Akkadianizing *nominative* in ***-u***. Incidentally, in *nomina actoris* with the very productive combination of suffixes ***=o/u=ḫ(e)=li***, graphically ***-uḫli*** or ***-uḫuli*** (the latter is the usual form at Alalaḫ and in the Western Hurrian area), the suffix ***-li*** is also the true formative indicating professional designations. These professional designations in ***-uḫli / -uḫuli*** are based on nouns turned into adjectives by use of the suffix ***-ḫe*** (with syncope of final ***-e***), followed by the suffix ***-li***, at Alalaḫ after the derivational vowel ***-o/u-*** and elsewhere without this vowel, cf. I. Wegner, *Einführung*, 57-58.

If we read Linear A ***pa-ja-re*** as ***pa-ja-le***, the second ***-a-*** may be due to *anaptyxis* (development of vowel between two consonants, in this case between semivowel ***j*** and ***l***) to make pronunciation easier. As a result a formation like ***paj+li+ne*** > (*anaptyxis*) ***paj=a=li=ne*** > (*apocope*) ***paj=a=l(i)=ne*** > (*assimilation*) ***paj=a=l=le*** is conceivable. Morphologically such a form would be comparable with ***ta-bal-li-iš***, but without the *ergative* ending in ***-š***, because usage of the *absolutive* in lists of personal names is likely.

…….. **80**, **578**, **585-586**, **589**, **661**, **670-671**

pa=i=ḫe (< ***pa-*** 'to build') 'building-plot, building ground'. If ***-ḫe*** follows a verbal stem, the thematic vowel ***-i-*** is preserved, cf. I. Wegner, *Einführung*, 54. Th. Richter (*BGH*, 285-286) s.v. ***paiḫu*** [Nuzi] 'eine Art Feld' ['a sort of field'] (*AHw*, Lieferung 9, 1969, 812); 'building lot' (Maidman, 1976, 376); 'une sorte de terrain' (E. Laroche, *GLH*, 193); ***qaqqaru paiḫu*** 'unbuilt plot' (Zaccagnini, 1979a, 25, 113ff., a.o.); ***pa=i=ġe*** 'Bauland, Baugrundstück' (G. Wilhelm, 1988b, 55; I. Wegner, *Einführung*, 54, 270, a.o.). **136**, **538**

Paikku from Nuzi with the variant readings ***Pa-ik-ku*** (son of *Qa-na-a-a*), ***Ba-ik-ku*** (father of *Tar-mi-ia*), ***Pa-i-ik-ku*** (father of *Zi-li-ḫa-ma-an-na*), ***Pa-a-e-ek-ku*** and ***Ba-i-ik-ku***, cf. I.J. Gelb, *NPN*, 109; P.M. Purves, *NPN*, 242, s.v. ***paik-***. The Hurrian name ***Paikku*** with Akkadianizing nominative ***-u*** is equivalent to the Linear A personal name ***pa-i-ki*[** (HT 62+73.2), that may well contain the *negative* suffix ***-kki*** in an *antipassive* construction: 'Do not build/create (the child) !'. One can also maintain that the Linear A name looks even more Hurrian than the name ***Paikku*** from Nuzi, because ***Paikku*** might contain the Akkadianizing *nominative* in ***-u***.

Th. Richter (*VHN*, 588-589) hesitantly analyses ***Paikku*** (wr. *Pa/Pá-(i-)ik-ku*), sub 1.2.1.3: *ungeklärte Bildungen* [*unexplained formations*], differently as {*pa=i=kk=o/u*} with the negation ***-kk-***, and offers the translation 'Er/Sie (scil. ein *Numen*) baute (früher einen Jungen) nicht' ['He/She (scil. a *numen*) did (previously) not build/create (a boy)'].

In my view a positive meaning is also possible, if ***-ku*** is considered an abbreviated form of ***Kušuh*** (name of the Moon-god) and ***-ki*** an abbreviated form of ***kiaše*** 'sea'. The analysis of ***Pa-ik-ku*** is then Old Hurrian {*pa=i=b-Ku(šuh)*} > {*pa=i=k-Ku(šuh)*} as a result of assimilation, '*Kušuh* builds/built (the child)', and the analysis of Linear A ***pa-i-ki***[is Old Hurrian {*pa=i=b-kiaše*} > {*pa=i=k-kiaše*} 'The *sea* builds/built (the child)' or the *imperative* {*pa=i-kiaše*} 'Build (the child), oh *sea* !'.

Kuzuḫ/Kušuḫ represents one of the frequent theophorous elements in onomastics. Unfortunately confirmation for this attractive hypothesis has not yet been found in the same way as ***-Na*** and ***-Te*** were established as hypocoristics for ***-Naje*** and ***-Tešub*** respectively. Perhaps if ***Arim-Kuzuḫ*** at Mari and ***Arip-ku***[…] at Mari can be equated and if ***Arip-ku***[…] is complete, the existence of a hypocoristic ***-Ku*** for ***-Kuzuḫ*** can be proved. ***Arim-Kuzuḫ*** is analysed as {*ar=i=m(:b)-Kuzo/uġ*}, typology 1.1.1.2.2, '*Kuzuḫ* gab (Jungen)' ['*Kuzuḫ* gave (the boy)'], cf. Th. Richter, *VHN*, 66-68.

Th. Richter (*VHN*, 433-434) mentions that ***kijaze / kijaše*** {*kijaže*} 'Meer' ['sea'] and the hypocoristic or shortened form ***ki*** belong to the most frequent *quasi theophorous onomastic elements* (cf. Th. Richter, *BGH*, 200-201). In all sites the writing *(^{o}-)ki-ia-ze* is the most frequent, but ^{o}*-ki-ia-še* and ^{o}*-ki-ia-ši* also occur at Mari and ^{o}*-ki-a-še* is the only writing at Šušarrā and frequent at Nuzi (cf. P.M. Purves, *NPN*, 226). The shortened form ***-ki***, primarily written with [GI], is as frequent. If one observes the long list of personal names with ***-kijaze / -kijaše / -ki*** mentioned by Th. Richter (*VHN*, 434) and with ***-kiaše*** mentioned by P.M. Purves (*NPN*, 226), it may be significant that almost all these names are feminine.

The transitive verbal form in ***=i=b*** is constructed without object. The subject is in the *absolutive* case. We call this a 'limited *antipassive*' ('eingeschränktes *Antipassiv*').

Remarkably many compound names with the nominal element ***-kiaše*** at Nuzi contain so-called 'Old Hurrian' verbal constructions with intransitive ***=a=b*** and transitive ***=i=b***. P.M. Purves (*NPN*, 226) mentions at Nuzi: ^{f}***Akap-kiaše*** (wr. ^{f}*A-kap-ki-a-še*, ^{f}*A-qa-ap-ki-a-še*), ^{f}***Ḫašip-kiaše*** (wr. ^{f}*Ḫa-ši-ip-ki-a-še*, ^{f}*Ḫa-ši-ip-ki-a-ši*), ^{f}***Širwip-kiaše*** (wr. ^{f}*Ši-ir-wi-ip-ki-a-še*) next to ^{f}*Ši-ir-wi-ki-a-še*, ^{f}***Zilip-kiaše*** (wr. ^{f}*Zi-lip-ki-a-še*, ^{f}*Zi-li-ip-ki-a-še*). He also mentions ^{f}***Šaš-kiaše*** (wr. ^{f}*Ša-aš-ki-ia-še,* ^{f}*Ša-aš-ki-a-še*) and ^{f}***Unuš-kiaše*** (wr. ^{f}*Ú-nu-uš-ki-a-še*) next to ^{f}***Unu-kiašu*** (wr. ^{f}*Ú-nu-ki-a-šu*). …… **586-587**, **592-593**, **905**, **946**

pailia / paillija [Boğ.; PN(?)] 'gebaut' ['built']. Th. Richter, *VHN*, 219, 475-476: "The short names ***Pa-i-la*** and ***Pa-i-lu*** belong to and are probably derived from ***paili***, which can probably be connected with the word ***pailija*** that can be interpreted as 'built' and sometimes as 'what I have built' or 'built by me'. The high frequency of ***Paila*** is remarkable." ***Paila*** (wr. *pa-i-la*), 11 times attested at Mari, and once (wr. *ba-i-la*) at Sippar, is derived from ***paili***, analysis {*pail(i)=a*[E.]}, lexicon *paili*, typology 3.2.1, 'He (the boy) is (born) like the one that was built / created'. ***Pailu*** (wr. *pa-i-lu*) at Mari, lexicon *paili* (→ *pa*), typology 3.1, analysis {*pail(i)=u*[N.]}, 'The one that has been built/created (≈ the boy)' (?). [N.] = Akkadianizing *nominative* in ***-u***. ……. **182**, **536**, **538**, **585-586**

pa=i=ri (resultative participle) 'einer, der gebaut hat, Baumeister' ['someone who has built, architect'], cf. I. Wegner, *Einführung*, 218. Th. Richter, *VHN*, 475-476, s.v. ***pa-*** 'to build': "The root ***pa-*** and the derivation ***pairi*** {*pa=i=ri*} 'einer der gebaut hat' ['someone who has built'] can be regarded as clarified. No doubt ***Pairi*** can also be a theonym, see *BGH*, 285f."
…….. **182**, **536**, **538**, **585**, **800**

Pa-i-šarri (wr. *Pa-i-šarri*), Hurrian personal name attested at Nuzi, cf. P.M. Purves, *NPN*, 242, s.v. ***Pai-*** and ***-šarri***, and I.J. Gelb, *NPN*, 110, where ***Pa-í-šarri*** is mentioned as son of *Ḫa-ni-ku* (JEN 487: 26, 37; RA XXIII 51: 27, seal; TCL IX 8: 19, 26). ***Pai-šarri*** can now be analysed as {*pa=i-šarri*} 'Build/Create (the child), oh King of Gods !'.

Apart from ***Pa-i-šarri*** (wr. *Pa-i-šarri*) at Nuzi, a (probably older) variant ***Paip-šarri*** occurs twice at Mari and once at Tigunāni, cf. Th. Richter, *VHN*, 219, s.v. ***Paip-šarri*** (*pa-i-ip-šar-ri, ba-i-ip-šar-ri*), lexicon *pa-, šarri*, analysis {*pa=i=b-šarri*}, typology 1.1.1.2.1, 'Der Götterkönig baute (Jungen)' ['The King of Gods built / created (the boy)']. Richter compares *pa-i-šar-ri / pa-i*-LUGAL at Nuzi (s. *NPN*, 110, AAN I, 104), *pa-i-še-na* at Alalaḫ (D.J. Wiseman, AT *252: 15), *pá-i-še-en-ni* at Nuzi (s. *SCCNH 6*, 398), *pa/pá-i-te* at Emar and Kurruḫanni, *pa/pá-i-te-sup* at Kurruḫanni, *pa-i-te-sup, ba-i-te-sup, ba-i-ti-sup* at Nuzi, *pa-i-te, ba-i-te, pa-i-te-ia, pa-i-te-a, pa-i-te-e* at Nuzi, *pa-i-til-la* at Nuzi, cf. Th. Richter, *VHN*, 219, 475-476, s.v. ***pa-*** 'bauen' ['to build'].

Pai-šarri seems *prima facie* to appear in the Linear A sequence ***i-da-pa₃-i-sa-ri*** (PH 6.4) on one of the earliest Linear A tablets in Crete, PH 6, which was found beneath the concrete of phase 2 in room XXVIII in the south-west section of the Palace of Phaistos and belonged to the end of Doro Levi's local phase 1b of the protopalatial period (2nd architectural period of the First Palace) and dated to the transition of MM II a/b. This accounts for Hurrian presence in Crete at a very early date and most interesting, as it seems, even before the zenith of power of the Mitannian Kingdom.

However, it is unlikely that a Hurrian name contains 2 verbal roots ***id-*** and ***pa-***, so that ***i-da-pa₃-i-sa-ri*** (PH 6.4) may well be a sentence name with ***šarri*** as nominal element, analysis {*id=ap(p)=ai-šarri*}, consisting of the verbal root ***id-*** 'to hit, strike violently' + a root-extension ***-ap(p)-***, possibly comparable with ***-apš-/-epš-*** or ***-upp-*** (cf. I. Wegner, *Einführung*, 88-89) + suffix ***-ai-/-ae-*** marking the *final debitive* (I. Wegner, *Einführung*, 111-112, table 12) + the subject ***šarri*** 'King of Gods'. The name can then be translated 'Let the King of Gods hit / strike violently !'. …. **253**, **371**, **373-375**, **540-542**, **586**, **704**, **970**

Paiš-kummi (wr. *Pa-iš-ku-um-mi, Pa-iš-ku-mi*, *Pa-iš-ku-um-me*), P.M. Purves, *NPN*, 229, s.v. *kummi*. The name can now be analysed as {*pa=i=ž-kummi*} and be translated 'May (the God) build *Kummi*'. …….…… **40**

Pa-i-te-šup and the hypocoristics ***Pa-i-te-ia***, ***Pa-i-te-a*** and ***Pa-i-te*** (cf. I.J. Gelb, *NPN,* 110) can be analysed as *imperative* sentence names {*pa=i-tešub*}, {*pa=i-teia*} and {*pa=i-te*}, respectively, 'Build (the child), oh *Tešub* !'. …… **114**, **183**, **374**, **536**, **541**, **586**

pal- 'to ask' according to E.A. Speiser, but 'to know' according to F.W. Bush. Th. Richter (*BGH*, 291), s.v. ***pal-*** I, *pall-* I [*passim*]. Einhellig als 'wissen, kennen' aufgefaßt. Entspricht akk. ***idû*** bzw. ***edû*** und he. ***šak(k)-*** 'wissen, kennen'. ***pali*** I [PN]. Namens-element mit ähnlicher Bedeutung wie *madi* (*mad-*) (G. Wilhelm 1998d, 124). To date all etymologies for the epithet ***Παλλάς*** of ***Ἀθάνᾱ*** are not very satisfactory (cf. P. Chantraine, *DELG*, 853, s.v. ***παλλακή*** 'concubine'), but the epithet may in my view be explained from the Hurrian root ***pal-/pall-*** 'to know'. Greek mythology tells that *Athena* is 'Goddess of *science* and *arts*'. As a result the meaning of the root ***pal-/pall-*** explains her mythological function and may well reveal her provenance from Minoan Crete. So both the theonym *Athana* and epithet *Pallas* appear to be Hurrian. **157**, **166-167**, **170**, **194**, **716**, **853**, **997**

pal=i=a 'he knows', 3rd person sg. present, cf. I. Wegner, *Einführung*, 133. …… **180**

pal=i=o 'you know', consisting of the root ***pal-*** 'to know' + marker of transitivity ***-i-*** + marker ***-o*** of the acting person 2nd person singular, I. Wegner, *Einführung*, 90. …… **157**

pal-la-a-en (IV: 56); ***pal-la-en*** (Mit. IV: 59); [***pa***]***l-la-en*** (IV: 108) {*pal=(i)l=ae=n(na)*}, ***pal-la-in*** (Mit. IV: 64) {*pal=(i)l=ai=n(na)*}, *final debitive* 'in order that he may know it', cf. I. Wegner, *Einführung*, 111 + Table 12: *The order of suffixes of the final debitive*. I. Wegner explains ***-il-*** as formant of the *optative*, which is combined with the suffix of the *final debitive* ***-ae-/-ai-***. ...……. **166-167**, **194-195**, **716-717**, **853**

pal-la-i-šal-la-ma-a-an (Mit. IV: 64) {*pal=(i)l=ai=ž=a=lla=man*} 'and may they (the Gods) know', with pluralizer ***-š(a)-*** {*-ž(a)-*}, cf. Th. Richter, *BGH*, 291; cf. I. Wegner, *Einführung*, 111-112 + Table 12. …….. **166-167**, **194-195**, **716-717**, **853**

p/wand-, ***p/wend-*** I [*passim*] (intr.) 'recht, gut sein', 'to be right, just, good'; (trans.) 'recht, richtig machen', 'to make right, righteous, just, good' (cf. Th. Richter *BGH*, 293-295; cf. P.M. Purves, *NPN*, 274, s.v. ***want***). There is also an adjective 'just, righteous'.
Cf. also Th. Richter (*VHN*, 482-483) s.v. ***pad-/patt-*** and ***p/wand-***.

He distinguishes this root from ***pe/ind-*** II [Boğ. Mit.,PN] (trans.) corresponding with Hittite *appa tarna-* 'to let go, release' and Akkadogram *ŠAPĀRU* '(zurück)schicken, loslassen', 'to send back, to let return'; (intr.) 'zurückkehren', 'to return' (cf. *BGH*, 311).

Th. Richter (*VHN*, 223) mentions many examples of names with the root ***p/wand-***: ***Wantip-šenni*** (wr. *Wa-an-di-ip-še-en-ni*) at Šušarrā, analysis {*fand=i=b-šen(a)=ni*}, typology 1.1.1.2.1, lexicon *p/wand-*, *šena*, *šeni*, *šenni*, translation 'Der Bruder machte (Jungen) gut' ['The brother made (the boy) good']. At Nuzi 5 persons with the name ***Wantiš-šenni*** (wr. *Wa-an-ti-iš-še-en-ni, Wa-an-ti-še-en-ni, Wa-an-ti-še-ni, Wa-an-ti-iš-še-ni, Ba-an-di-še-en-ni*) are attested, cf. I.J. Gelb, *NPN*, 171. Apparently the hypocoristic name with abbreviated ***-še*** instead of ***-šen(n)i***, ***Wantiš-še*** (wr. *Wa-an-ti-iš-še, Wa-an-di-iš-še*) was even more popular at Nuzi, because 14 persons are attested with that name, cf. I.J. Gelb, *NPN*, 171. Cf. at Ugarit alphabetic cuneiform ***pndd̲n***, cf. F. Gröndahl, *PNTU*, 205, 211, 244, 251, 405. Th. Richter (*VHN*, 223) mentions ***Wantin-muša*** (wr. *Wa-an-ti-in-mu-ša*) at Tigunāni, analysis {*fand=i=n(na)-muž(i)a*}, typology 1.3.1.2.2.1, translation 'Mache ihn (Jungen) gut, Gerechte(r)' ['Make him [***-n(na)***] (the boy) good, sublime/august !']. ***Wanti-muša*** and ***Wadi-muša*** (wr. *Wa-an-ti-mu-ša, Wa-an-di-mu-ša, Wa-di-mu-ša, Wa-an-ti-mu-šá*) are the names of 6 persons at Nuzi, cf. I.J. Gelb, *NPN*, 171; and E. Cassin - J.-J. Glassner, *Anthroponymie et Anthropologie de Nuzi*, Volume I, Malibu 1977, 165. Th. Richter (*VHN*, 223) mentions ***Panti-Išḫara*** (wr. *Pa-an-di-*^{D}*iš-ḫa-ra*) at Mari, analysis {*fand=i-Išḫara*}, typology 1.3.1.2.1, lexicon *p/wand-*, *Išḫara*, 'Mache (Jungen) gut, oh *Išḫara* !' ['Make (the boy) good, oh *Išḫara* !']. Cf. at Alalaḫ VII ****Wandi-Išḫara*** (wr. **Wa-an-ti-*^{D}*iš-ḫa-ra* LÚ UŠ.BAR, *AT* *21:3,4) and wr. **Wa-an-di-*^{D}*iš-ḫa-ra*, *AT* *60:13, cf. A. Draffkorn, *HHA*, 63. See at Alalaḫ VII ****Wandi-Šaw(u)ška*** (wr. **Wa-an-di-ša-uš-ka* LÚ GIŠ.GU.ZA), *AT* *206:7, and (wr. **Wa-an-di-ša-uš-ka*), *AT* *257:16, cf. A. Draffkorn, *HHA*, 63. It can be analysed as {*fand=i-Šaw(u)ška*} 'Make (the boy) good, oh *Šaw(u)ška*!'.

Th. Richter (*VHN*, 224) mentions ***Panti-Ugur*** (wr. *Pa-an-di-*^{D}*u-gur*) at Mari, analysis {*fand=i-O/Ugo/ur*}, typology 1.3.1.2.1, lexicon *p/wand-*, *Ugur*, 'Mache (Jungen) gut, oh *Ugur* !' ['Make (the boy) good, oh *Ugur* !']. Cf. ***Wantin-Ugur*** (wr. *Wa-an-ti-nu-gur, Wa-an-di-nu-gur*) at Nuzi, cf. I.J. Gelb, *NPN*, 171. The latter name can be analysed as {*fand=i=n(na)-O/Ugo/ur*}, 'Make him [***-n(na)***] (scil. the boy) good, oh *Ugur* !'.

The 'Old Hurrian' form ***Wantip-Ugur*** (wr. *Wa-an-di-pu-ku-ur, Wa-an-di-pu-gur*) is also attested at Nuzi, cf. I.J. Gelb, *NPN*, 171. It can be analysed as {*fand=i=b-O/Ugo/ur*} '*Ugur* made (the boy) good'.

At Nuzi the 'Old Hurrian' personal name ***Wantip-Tilla*** (wr. *Wa-an-ti-ip-til-la*), cf. I.J. Gelb, *NPN*, 171. It can be analysed as {*fand=i=b-Tilla*} '*Tilla* made (the boy) good'.

……..…… **367**, **548-549**, **553-557**, **622**, **798**, **849**, **881**, **891**, **982**, **1010**

pandani and ***p/wandi*** can according to Th. Richter (*VHN*, 477-478) be the adjective 'rechts' ['right']. This is interesting, because at Khania we find Linear A]***-pa-da-ni*** (KH 79+89.3). If it is complete, it can be interpreted as 'one-word' personal name ***Pandani*** 'Right' or 'The right one', but also as ***Pand=a=nni***, consisting of the verbal root ***p/wand-*** + the marker of intransitivity ***-a-*** + enclitic personal pronoun 3rd pers. sing. ***-nna/-nni/-n*** indicating the subject of action of the intransitive verb. The verbal root means (intr.) 'to be right, just, good', (trans.) 'to make right, just, good'. So Linear A]***-pa-da-ni*** (KH 79+89.3), Hurrian ***Pand=a=nni***, can then be translated as 'He/She (the child) is right / just / good'.

Linear A also provides the Hurrian 'one-word' personal name ***wa-di-ni*** (HT Wc 3007, side α; HT Wc 3008, side α) on two roundels from Hagia Triada that can be analysed as {*wand=i=nni*}, consisting of the root ***pand-/wand-*** (trans.) 'to make good / just / right, to treat in the right way' + the marker of transitivity ***-i-*** (the imperative misses its own marker ***Ø***) + the *optional allomorphic* enclitic personal pronoun 3rd person sing. ***-nni*** (instead of ***-nna***) indicating the object of the transitive verb. Translation 'Make him/her (the child) good / just / right (oh *numen*) !' or 'Treat him/her in the right way (oh *numen*) !'. … **555**

Pandare/ri 'Cook', Hurrian *appellative* personal name, cf. Th. Richter, *BGH*, 293-295, s.v. ***p/wand-***, *p/wend-* I [*passim*] 'recht, good (sein), recht, richtig (sein / machen), (to be) right, etc.'. If Linear A ***pa-da-re*** (HT 10a.2) from Hagia Triada is one sequence and if ***pa$_3$-da-re*** (PK 3a.2 ←, read from right to left) on a clay bar from Palaikastro is the correct reading, they may well be Hurrian personal names. Since ***-n-*** preceding a dental or other occlusive is not expressed in consonant clusters in Linear A (and B), ***pa-da-re*** and ***pa$_3$-da-re*** can be identified with the Hurrian *appellative* personal name ***Pandare***, cf. also ***p/wandarinni***.

L. Godart - J.-P. Olivier did not incorporate the clay bar from Palaikastro in *GORILA 1*. They consider it hieroglyphic. …… **797-798**

p/wandarinni, analysis {*fand=ar=i=nni*}, 'Koch' ['cook'], {*fand=ar=i=n(n)i=na=ma*} absolutive plural + particle ***-ma***, contains the suffix ***-i=nni*** forming adjectives into substantives designating professions, cf. I. Wegner, *Einführung*, 55, 129, 134, 213-214.

Th. Richter, *BGH*, 293-295, s.v. ***p/wand-***, *p/wend-* I [*passim*] 'recht, good (sein), recht, richtig (sein / machen), (to be) right, etc.', and s.v. ***p/wandarinni*** [Boğ.]: "Since E. Neu (Varia Hurritica. Sprachliche Beobachtungen an der hurritisch-hethitischen Bilingue aus Ḫattuša, in: E. Neu - C. Rüster (eds.), *Documentum Asiae Minoris Antiquae*, Festschrift für Heinrich Otten zum 75. Geburtstag, Wiesbaden 1988, 250) interpreted as 'cook', in accordance with Sumerogram (LÚ.) MUḪALDIM, …, partly normalised as *p/wandarini*. … recently: 'cook', literally 'someone who is used to professionally achieve the aim that something acquires the right form'." [I have translated the German text into English.]
……..... **137**, **662**, **798**, **979**

Pandašutti, analysis {*p/wand=aš=u=tti*}, is the Hurrian interpretation of the Linear A personal name ***pa-da-su-ti*** 29 (HT 104.3-4) from Hagia Triada, consisting of the root ***pand-/wand-*** 'to make just, right, good' + *intensifying* root-extension ***-aš-*** (cf. I. Wegner, *Einführung*, 88), + Old Hurrian marker of the *imperative* ***-u-*** or of the *past indicative* ***-u-*** + the *optional allomorphic* enclitic personal pronoun 1st person singular ***-tti***, translation 'Make me just, good (oh *numen*) !' or 'He/She (a *numen*) made me just, good'.

The interpretation is corroborated by the fact that the other two personal names on the same tablet contain the same *optional allomorphic* enclitic personal pronoun 1st person singular ***-tti***: ***da-ku-|se-ne-ti*** 45 J (HT 104.1-2), analysis {*dag=u-šen(a)=ne=tti*}, 'Make me, the brother, beautiful (oh *numen*) !' > 'Make me a beautiful brother (oh *numen*) !'.

Another sentence name with a double case is also conceivable: 'The (deceased) brother made me beautiful' or (*imperative*) 'Make me beautiful, oh (deceased) brother !'.

The Linear A personal name ***i̱-du-ti*** (HT 104.2-3) can likewise be analysed as Hurrian {*id=u=tti*} 'Beat, hit, strike me (oh *numen*) !', containing the verbal root ***id-*** 'to beat, hit, smash, strike violently', cf. I. Wegner, *Einführung*, 41, 256, s.v. ***id-*** 'schlagen'; Th. Richter, *BGH*, 109-110, s.v. ***id-*** I [Boğ.]; *VHN*, 405, s.v. ***id-*** II, '(zer)schlagen'. …… **567-568**

Pandia (wr. *Pa-an-di-ya*) ESN: 174, personal name mentioned by F.W. Bush (*GHL*, 51-52) as an example of positional voicing of the dental stop [***t***], when contiguous with ***-n-***. The name can be analysed as a 'one-word' name 'He/She (a *numen*) makes (the child) good' or a hypocoristic name with the hypocoristic suffix ***-ya***.

Th. Richter (*VHN*, 222-223) mentions the Hurrian personal name ***Pantia*** (wr. *Pa-an-di-ia, Wa-an-ti-ia*) name of 4 persons at Mari and of 2 persons at Qaṭṭarā, {*fand=i=ja*}, typology 1.1.1.2.4, lexicon *p/wand-*, 'Er/Sie (scil. ein *Numen*) machte (Jungen) gut' ['He/She (scil. a *numen*) made (the boy) good']. Compare also ****Wandi-ya*** (wr. **Wa-an-di-ya*, *AT* *282:5) at Alalaḫ VII, in a text on distribution of rations of barley-flour (ZÌ.DA.ŠE). Total expenditure (ZI.GA) - 93 PA (= *parisi*).

Entries, however, only total 88: 19 to the controller of Kuwan, 27 to *Uwandarama*, 6 to *Kuduru*, 20 to *Wandia* and 16 to *Arip-kušuḫa* (cf. D.J. Wiseman, *AT*, p. 88, nr. *282). ***Wandi-ya*** (wr. ZAG***-ya***, *AT* 202:28), Alalaḫ IV, cf. A. Draffkorn, *HHA*, 63. Cf. ***Pendi-ya*** (wr. *Be-in-diya*, *mâr bîti*), cf. D.J. Wiseman, *AT*, p. 64, nr. 128:27; cf. A. Draffkorn, *HHA*, 48. E. Laroche (*NH*, 135, nº 929): ***Pantiya*** (wr. *ᵐPa-an-ti-ya*-[*aš*]), XV 12 IV 9. Hourrite; cf. *NPN* 170 sq.; *AT* 189,7; cf. *Bentiya*, *Wantiya*. *Bandišinni*: voir *Bentešina*.

At Kurruḫanni we find *Wa-an-ti-ia*, at Nippur *Pa-an-di-ia*, cf. Th. Richter, *VHN*, 223. At Nuzi 60 persons with the name ***P/Wandia*** are attested, see I.J. Gelb, *NPN*, 170-171, s.v. ***Wantiia*** (wr. *Wa-an-ti-ia, Wa-an-di-ia, Pa-an-di-ia*). ……. **117**, **554-555**, **575**

Pandunna (wr. *Pa-an-du-un-na*) Hurrian personal name attested at Mari, {*fand=o=nna*}, typology 1.3.1.1.2.1, lexicon *p/wand-*, 'Mache ihn [***-nna***] (Jungen) richtig (oh *Numen*) !' ['Make him [***-nna***] (the boy) just, righteous (oh *numen*) !'], cf. Th. Richter, *VHN*, 224. Th. Richter chooses an imperative for his translation, but an indicative is possible as well: 'He/She (scil. a *numen*) made him [***-nna***] (the boy) just, righteous', cf. I. Wegner, *Einführung*, 126: Old Hurrian ***-u-*** in transitive perfect forms.

This name is very interesting, because it allows a Hurrian interpretation of the otherwise inexplicable, Pre-Greek personal name ***wa-du-na*** (KN V(3) 503,3; KN V(7) 1523,1) in the Linear B texts from Knossos (cf. also *Documents*: *Wādunās* ?). Starting from a ***p/w*** alternation in ***p/wand-***, Linear B ***wa-du-na*** is straightforwardly a Hurrian 'one-word' name, ***Wandunna***, analysis {*wand=o/u=nna*}, or ***Wadunna***, {*wad=o/u=nna*}, the latter as a result of *apocope* of ***-n-*** before ***-d-*** or as a result of assimilation of ***-nd- > -d-***.

The translation is the same as that of ***Pandunna*** at Mari: 'Make him / her [***-nna***] (the child) just, righteous (oh *numen*) !' or 'He/She (scil. a *numen*) made him / her [***-nna***] (the child) just, righteous'. The only difference is that the name at Mari can be identified as a man's name, whereas ***wa-du-na*** from Knossos can theoretically be masculine or feminine, although most other names on the tablets KN V(3) 503 and KN V(7) 1523 are masculine as well. …… **555-556**

pann-/wann- or ***pan-/wan-***. The meaning of both roots is not yet known and it is not certain either, whether these roots are cognate or not.

Th. Richter (*VHN*, 222, 477) mentions the name ***Panni /Wanni*** (wr. *Wa-an-ni, Pa-an-ni, Wa-an-na*) from Šušarrā, who is a correspondence clerk of Kuwari, analysis {*fann(i)=a*}, typology 3.1, lexicon *wanni*.

Th. Richter (*VHN*, 222, 477) also mentions ***Panašḫe*** (wr. *Pa-na-áš-ḫe*) at Mari, a mountain-dweller (LÚ *pabanḫu*) from Ṭāb-salim[KI]. The name can be identified as a noun in ^{o}*=a=šḫe* (Wilhelm/Süel, 2013, 157). He mentions (*VHN*, 40, 477) the sentence name ^{f}***Ak***[***ap-p***]***anazzi*** (wr. ^{f}*Ak*[*ap-p*]*a-na-zi*) at Mari, {*ag=a=b-panazzi*}, typology 1.1.1.3.1, lexicon *ag-*, *panazzi*, translation '*Panazzi* kam herauf' ['*Panazzi* came up / appeared']. It may be a formation in ^{o}*=a=zzi*, although such forms mainly appear in 'one-word' names.

E. Laroche (*NH*, 204, n° 1489) mentions ***Wanni*** at Ḫattuša: 1. a priest ^{m}*Wa-an-ni-i-iš* (XII 2 I 24); 2. a priest, absolutive ^{m}*Wa-an-ni* (XVIII 9 II 22). He also mentions (*NH*, 204, n° 1488) a stonecutter ***Wana*** (wr. *Wa-na-s*) in a Hieroglyphic Luwian inscription (SCRIBE-*la-š*), Karaburun. At Mari *wa-na*, *wa-ni* occur (Mari 3, 19; 2, 8), cf. E. Laroche, *GLH*, 293; Th. Richter, *BGH*, 293.

At Nippur ***Panni*** (wr. *pa-an-ni*) is attested as well, cf. Th. Richter, *VHN*, 222; cf. M. Hölscher, *Die Personennamen der kassitenzeitlichen Texte aus Nippur*, IMGULA 1, Münster 1996, 166). and ^{f}IŠ$_{8}$-TÁR-*ba-an-ni* at Alalaḫ VII (*AT* *178 = *UF 38*, 90: 33).

Compare the Linear A personal names ***pa$_{3}$-ni*** (HT 85a.2) and ***pa$_{3}$-ni*** GRA+***pa*** 33 VIR (*126*) GRA+***pa*** 33 (HT 102.2-3); the Linear A personal names ***pa$_{3}$-ni-na*** 17 J | (HT 6b.6), ***pa$_{3}$-ni-na*** **,** GRA ***pa$_{3}$*** , ***se+re*** ↓ 12 (HT 93a.1) and ***pa$_{3}$-ni-na***[ ] (HT 93a.8). Linear A ***pa$_{3}$-ni-wi*** (SY Za 4) on a round serpentine Libation Table from the Peak Sanctuary of Symi Viannou seems to provide the genitive of ***pa$_{3}$-ni***. ……. **274**, **367**, **508**, **577**, **896**, **899**

Panni / Wanni (wr. *pa-an-ni*, *wa-an-ni*, *wa-an-na*) is a correspondence clerk of Kuwari at Šušarrā and his name is (because of the ***p/w*** alternation) analysed as {*fanni*} and {*fann(i)=a*} by Th. Richter (*VHN*, 222), typology 3.1, lexicon *wanni*.

At Nippur ***Panni*** (wr. *pa-an-ni*) is attested as well, cf. Th. Richter, *VHN*, 222; cf. M. Hölscher, *Die Personennamen der kassitenzeitlichen Texte aus Nippur*, IMGULA 1, Münster 1996, 166). At Ḫattuša ***Wanni*** is a priest, cf. E. Laroche, *NH*, 204, N° 1489: 1. Prêtre: nom. ^{m}*Wa-an-ni-i-iš*, XII 2 I 24; 2. Prêtre: abs. ^{m}*Wa-an-ni*, XVIII 9 II 22; KBo XXXI 51 Rs 7'. E. Laroche also mentions a stone-cutter ***Wana*** (*NH*, 204, N° 1488) in Luwian Hieroglyphic: *Wa-na-s* SCRIBE-*la-š*, Karaburun. At Alalaḫ VII we find ^{f}*IŠ$_{8}$-TÁR-ba-an-ni* (*AT* *178 = *UF 38*, 90: 33), cf. Th. Richter, *VHN*, 222. At Mari *wa-na*, *wa-ni* occur (Mari 3, 19; 2, 8), cf. E. Laroche, *GLH*, 293; Th. Richter, *BGH*, 293.

Comparison of HT 93a with HT 102 shows that ***di-we-na*** is preceded by ***pa$_{3}$-ni-na*** **,** GRA ***pa$_{3}$*** **,** ***se+re*** ↓ 12 (HT 93a.1) and by ***pa$_{3}$-ni*** GRA+***pa*** 33 VIR (*126*) GRA+***pa*** 33 (HT 102.2-3. ***Pa$_{3}$-ni*** (HT 85a.2) is a personal name. According to F.M.J. Waanders the value of Linear A ***pa$_{3}$*** may have been ***bha***, which explains that Linear B ***pa$_{3}$*** is ***φα*** or ***βα***.

It is tempting to assume that ***pa$_{3}$-ni*** and ***pa$_{3}$-ni-na*** represent the same persons, which is even likely, if we realize that ***pa$_{3}$-ni-na*** can be analysed as Hurrian {*pann=i=nna*} and that ***pa$_{3}$-ni*** cannot only represent Hurrian {*pann=i*}, but also {*pann=i=n*}, because a final consonant is not expressed in Linear A and B. The suffix ***-nna*** also has a shortened form ***-n*** and represents the enclitic personal pronoun 3rd person singular (position 9), indicating the object of the transitive verb (see the indicator of transitivity ***-i-***) and the subject of the intransitive verb.

Linear A ***pa$_{3}$-ni-wi*** (SY Za 4) on a round serpentine Libation Table from the Peak Sanctuary of Symi Viannou can *prima facie* be interpreted as ***Pan(n)=i=wi***, genitive of the Linear A personal name ***pa$_{3}$-ni*** (HT 85a.2; HT 102.2) and of the Hurrian personal name ***Panni***, 'of Pan(n)i', with genitive suffix ***-we/-wi***, but the religious context makes analysis of Linear A ***pa$_{3}$-ni-wi*** as ***pann(=i)-i/erwi***, '…. oh Lord !', much more likely, especially after ***a-ta-i-jo-wa-ja*** **,** ***ja-i-nwa-za***.

This means that ***a-ta-i-jo-wa-ja*** **,** ***ja-i-nwa-za*** **,** ***pa$_{3}$-ni-wi*** may be translated 'Our Father, (this sacrifice) as appeasement / expiatory sacrifice, … oh Lord !' (the meaning of ***pan(n)-*** is unfortunately unknown). …… **367**, **577**, **896**, **899**

PRE-GREEK

Ἄβαντες, tribal name containing the same formant as we find in ***Ὕαντες***. They are mentioned in Homer's *Iliad* B 536 ff. as inhabitants of Euboea where they lived in Chalcis, Eretria, Histiaia, Kèrinthos, Dios, Karystos and Styra.

Strabo (*X*, 1, 3) tells that the old name of Euboea was not only *Makris*, but also ***Ἀβαντίς***. He also mentions that Aristotle says that Thracians setting out from ***Aba*** in Phocis, recolonised the island and renamed those who held it ***Ἄβαντες***.

In Eustathius's commentary on Dionysius *Periegeta* 520 we read: *ὁ ποιητὴς .. τὴν Εὔβοιαν Ἀβαντιάδα λέγει, ἀπὸ τοῦ ἐν αὐτῇ ἔθνους τῶν Ἀβάντων, Θρᾳκίου ἔθνους, ὥς φησιν Ἀρριανός*; cf. IG XII, 8 no. 181 (from Samothrake): *Ἀβαῖος*. F. Bechtel, *Die historischen Personennamen des Griechischen bis zur Kaiserzeit*, Halle 1917, 530, cf. D. Detschew, *Die thrakischen Sprachreste* (Österreichische Akademie der Wissenschaften, Schriften der Balkankommission XIV), Wien 1957, 1. ..... **966**

****Ἀγαλεύς***, interpretation of Linear B ***a-ka-re-u*** (KN Ga 416).

M. Ventris - J. Chadwick (*Documents in Mycenaean Greek,* Cambridge 1973[2], 528) propose *Agalleus* ? (or *Angareus* ?) as a possible interpretation, and O. Landau, *MGP*, 17: †*Ἀγαλλεύς*. According to C.J. Ruijgh (*Scripta Minora II*, 386-387) a Greek interpretation with the correct orthography ****Ἀγαλεύς*** would be possible. He refers to the present form ***ἀγάλλω < *ἀγάλγω***, derived from the adjective ****ἀγαλός < *m̥gH₂lós***, later replaced by ***μεγαλο-*** (under influence of ***μέγα < *mégH₂***).

A non-Greek interpretation of Linear B ***a-ka-re-u*** from Knossos is, however, not inconceivable either, if the name is based on the root of Linear A ***a-ka-ru*** (HT 86a.1; HT 86b,1), extended with the suffix ***-εύς***. The suffix was very productive in the formation of Mycenaean personal names.

A Hurrian interpretation of Linear A ***a-ka-ru*** (HT 2.1; HT 86a.1; HT 86b.1) is feasible. The name may well contain the verbal root ***ag-, akk-***, frequent in personal names (cf. Th. Richter, *VHN*, 366-368), (trans.) 'to bring (up), lead', (remarkably with the same meaning as the Indo-European root ***ag-***); (intr.) 'to appear'.

The 'one-word' name may represent an Old Hurrian *imperative* in ***-u*** and be analysed as {*ag=al=u*} or {*ag=ar=u*}, with the root-extension ***-al-*** of unknown meaning (cf. I. Wegner, *Einführung*, 87) or the *factitive* or *iterative* root-extension ***-ar-*** (I. Wegner, *Einführung*, 88), 'Bring (the child) (oh *numen*) !'. Analysis as an Old Hurrian perfect form 3rd pers. sg. {*ag=al=o/u=m*} or {*ag=ar=o/u=m*} is also possible, 'He/She (a *numen*) brought (the child) (up)'. **70**, **742-743**, **919**

Ἀθάνᾳ ποτνίᾳ or ***Ἀθάνᾱς ποτνίᾳ***, interpretation of Linear B ***a-ta-na-po-ti-ni-ja*** (KN V 52+52bis+[X] 8285, Olivier). The theonym *Ἀθήνη* is to date unexplained.

P. Chantraine, *DELG*, 27: "*Ἀθήνη*: ép., poètes; *Ἀθάνᾱ* (attesté en mycénien, dial. non ioniens), déesse grecque que l'on suppose une ancienne déesse minoenne, qui serait issue d'une déesse au serpent protégeant le palais. C'est probablement d'après la déesse qu'a été dénommée la cité attique *Ἀθῆναι*. Le mycénien connaît le nom de la déesse dans l'expression *atanapotinija*, cf. Chadwick-Baumbach 167. Dérivé: *Ἀθηναῖος*, 'athénien', mais le fém. *Ἀθηναίη* sert aussi de nom de la déesse (88 ex. chez Hom.), att. *Ἀθηναία* et par contraction l'usuel *Ἀθηνᾶ*. Étymologie: Théonyme inexpliqué, cf. Nilsson, *Griech. Rel. 1*, 405 sqq. *Lex. Ep.* 208."

Ἀθάνᾱ is attested in Linear B ***a-ta-na-po-ti-ni-ja*** (KN V 52+52bis+[X] 8285, Olivier), the dative ***Ἀθάνᾳ Ποτνίᾳ***, 'for the Mistress Athana', and probably also ***da-pu₂-ri-to-jo po-ti-ni-ja*** (KN Gg 702,2), ***δαβυρίνθοιο Ποτνίᾳ*** 'for the Mistress of the labyrinth'.

If the hypothesis that these deities are the same is correct, the goddess *Ἀθάνᾱ* was the deity protecting the labyrinth, which may have been the name or epithet of the palace. She may have been the Minoan deity portrayed as the 'goddess with the snakes'.

The daughter of king Minos, ***Ἀριάδνη***, played a very peculiar role by helping the Athenian hero ***Theseus*** escaping from the labyrinth after he had killed the Minotaur. After Theseus had left her on the island of Naxos, she was taken by Dionysos to Mount Olympos. One can only conclude that the Minoan princess must have had some godlike features. She did not only play the part of a goddess by helping a hero as, for instance, Athena did several times with Odysseus and other heroes, but she also became the consort of a god.

The element ***ἀρι-*** in her name was later probably understood as the augmentive particle which we find e.g. in Homer in *ἀριδείκετος* and *ἀρίζηλος*. But if the name was originally Minoan, the element ***ari-*** may well represent the Hurrian verbal root ***ar-*** 'to give' (***ar=i-*** is the present active transitive form in ***-i-***, sometimes also with the Old Hurrian marker of the subject 3rd person singular ***-b-***), e.g. (at Nuzi) *Ari-p-ḫurra*, *Ari-p-šarri*, *Ari-p-šeriš*, *Ari-p-tešup*, *Ari-p-tilla*, or the form 'Mitanni-Hurrian' ***Ariia***, that can be analysed as either the indicative 3rd person singular {*ar=i=a*} 'He/She gives', with the 'Mitanni-Hurrian' marker of the subject 3rd person singular ***-a*** or a hypocoristic name with hypocoristic suffix ***-ya***.. The name of the princess *Ἀριάδνη* may be explained from Minoan **Ari-athānā* 'Athana gives' > **Ari-athnā* (syncope) > **Ari-adnā* (voicing of the dental under influence of nasal in Hurrian) > **Ἀριάδνᾱ* > *Ἀριάδνη*. The name *Ἀριάδνη* may be interpreted as a Hurrian theophorous sentence name.

Another indication of a possibly Hurrian origin of the Mycenaean theonym ***Ἀθάνᾱ*** is the parallel form ***Ἀθηναίη*** (Attic ***Ἀθηναία***). Apart from the frequent suffix ***-na*** of the so-called plural article (especially in lexemes), there is a Hurrian element ***-na*** occurring in feminine personal names, probably a shortened form of ***-naia*** (and possibly *-nawar*), cf. at Nuzi: *ᶠAru-na*, ***ᶠAweš-na*** and ***ᶠAwiš-naia***, *ᶠAze-na*, ***ᶠMinen-na*** and ***ᶠMinen-naia***, cf. P.M. Purves, *NPN*, 236-237, s.v. ***-na*** and ***-naia***. Purves adds: Hurrian element apparently found exclusively in feminine personal names. See Speiser in *AASOR XVI (1936)*, p. 75, n. 1, and Oppenheim in *AOF XII (1937-39)*, 36. P.M. Purves, *NPN*, 237, gives a list of feminine personal names with the element *-naia* at Nuzi: *ᶠAllai-naia*, *ᶠAšmun-naia*, *ᶠAštun-naia*, *ᶠAwiš-naia*, *ᶠAzun-naia*, *ᶠḪašun-naia*, *ᶠḪepet-naia*, *ᶠḪumer-naia*, *ᶠIlim-naia*, *ᶠImšen-naia*, *ᶠIwin-naia*, *ᶠMinen-naia*, *ᶠNašmun-naia*, *ᶠNupen-naia*, *ᶠŠalḫun-naia*, *ᶠŠatum-naia*, *ᶠŠeltun-naia*, *ᶠŠewir-naia*, *ᶠŠinen-naia*, *ᶠŠuḫur-naia*, *ᶠŠunšun-naia*, *ᶠTatun-naia*, *ᶠTeḫeš-naia*, *ᶠTeššen-naia*, *ᶠTilun-naia*, *ᶠTulpun-naia*, *ᶠUššen-naia*, *ᶠZilim-naia*.

Now we know that ***Naia/Naie*** (and its hypocoristic form ***-Na***) represents a Hurrian (probably female) deity, whose name is mainly used in personal names of women, cf. Th. Richter, *VHN*, 461-462.

Th. Richter (*VHN*, 462) offers a long list of names with ***Naje*** and ***Na***: (1) {*Na*} *ᶠAwiš-Na* (Mari); *ᶠ<u>Attap-Na</u>* (Mari); *ᶠ<u>Ilip-Na</u>* (ŠE); *ᶠElul-Na* (Mari); *ᶠḪazip-Na* (Mari); *ᶠKunuš-Na* (Mari); *ᶠNakaš-Na* (AŠ); *ᶠ<u>Šatum-Na</u>* (Mari); *ᶠ<u>Šeḫlum-Na</u>* (ŠE); *ᶠŠelwi(?)-Na* (AŠ, Mari); *ᶠŠerwi(?)-Na* (Mari); *ᶠTaḫiz-Na* (Mari); *ᶠTalmeš-Na* (Mari); *ᶠ<u>Tulup-Na</u>* (Mari); *ᶠ<u>Tuza-Na</u>* (Mari); *ᶠUniš-Na* (AŠ); *ᶠUnzi-Na* (AŠ); *ᶠ<u>Unuš-Na</u>* (Mari). (2) {*Naje*} *ᶠAlla-Naje* (Mari); *ᶠAllum-Naje* (Q); *ᶠAzza-Naje* (Mari); *ᶠ<u>Attap-Naje</u>* (Mari, Q, ŠE); *ᶠ<u>Elip-Naje</u>* (Mari); *ᶠ<u>Ilip-Naje</u>* (Mari); *ᶠInip-Naje* (Q); *ᶠInnu-Naje* (Mari); *ᶠKanzuš-Naje* (AŠ); *ᶠMaška-Naje* (Mari); *ᶠMemen-Naje* (AŠ); *ᶠNaktum-Naje* (Mari); *ᶠNanip-Naje* (Mari); *ᶠNeniš-Naje* (Mari); *ᶠNupin-Naje* (Mari); *ᶠZazza-Naje* (Mari); *ᶠŠatam-Naje* (Mari); *ᶠ<u>Šatum-Naje</u>* ([AŠ], Mari); *ᶠŠatu-Naje* (Mari); *ᶠ<u>Šiḫlum-Naje</u>* (Mari); *ᶠŠeḫra-Naje* (Mari); *ᶠŠerum-Naje* (Mari); *ᶠŠunzu-Naje* (AŠ); *ᶠTieš-Naje* (Mari); *ᶠ<u>Tulup-Naje</u>* (Mari); *ᶠ<u>Tuza-Naje</u>* (Mari); *ᶠ<u>Unuš-Naje</u>* (Mari), and some incomplete names. I have underscored the names with doublets of ***-Na*** and ***-Naja/e***.

It is unlikely that Mycenaean ***Ἀθάνᾱ*** and probably Minoan **Attānā* or **Athānā* can be equated with the Hurrian personal name *A-ta-na*, phonologically /*adana*/, at Nuzi, since single writing of the dental indicates that it is voiced. The personal name *A-ta-na* seems identical with the toponym *Adana* in south-east Anatolia, cf. also *a-da/ta-(a)-ni*, KUB XXV 44 ii? 5; XXVII 1 ii 31 and 70; XXVII 6 i 31, cf. also P.M. Purves, *NPN*, 207, s.v. *atan.* If the etymology of Mycenaean *Ἀθάνᾱ* (later *Ἀθήνη* with the doublet form *Ἀθηναίη*) and Minoan **Attānā* / **Attānāía* (**Athānā* / **Athānāía*) is Hurrian, the forms should probably be compared with the Hurrian onomastic element ***att-***.

P.M. Purves, *NPN*, 207, s.v. ***att*** (1) ascribes names with this root to ***attai*** 'father' and compares the masculine personal names ***Attaia*** (wr. *At-ta-a-a*), ***Attanu*** (wr. *At-ta-nu*), ***Attiia*** (wr. *At-ti-ia*) and ***Attuia*** (wr. *Ad-du-ia*) at Nuzi and the feminine personal names *ᶠAt-ta-i-ni-ir-ze* and *ᶠAt-tap-ki-ia-ze* at Chagar Bazar, *Iraq VII*, 36. In modern literature 'Chagar Bazar' is now described as Ašnakkum (Tall Šaġīr Bāzār).

According to Th. Richter (*VHN*, 386, s.v. ***att-*** {*att-*}) A. Goetze, (1963, 6) was the first to offer evidence for the 'Hurricity' of the verbal root ***att-*** (see also Th. Richter, *BGH*, 66, s.v. ***att-*** [Boğ.]). He also observed that personal names with ***att-*** are widely spread, but not very frequent. Personal names such as *(a)-at-ta-ra/ru* are probably based on a noun ***attari*** {*att=a=ri*}. He mentions (*VHN*, 386) the following names: (1) {*att-*}: ***Attaja*** (Mari) [with variant ***Attija***]; ***Attan*** (Tigunāni); ***ᶠAttap-kijaze*** (Ašnakkum); ***ᶠAttap-Na*** (Mari); ***ᶠAttap-Naje*** (Mari, Qaṭṭarā, Šubat-Enlil); ***Attija*** (Mari, Šušarrā); ***Attijān*** (Terqa); [***A***]***ttuja*** (Mari). (2) {*att=a=ri*}: ***Attara*** (Qaṭṭarā, Šubat-Enlil); ***Attaru*** (Šušarrā); (3) {*att=i=zzi*}: ***Attizzi*** (Mari).

In my view the element {*att=a=b-*} in the names ***ᶠAttap-kijaze***, ***ᶠAttap-Na***, ***ᶠAttap-Naje*** clearly shows that ***att-*** is verbal, because ***-b-*** is in Old Hurrian and in archaic or archaizing Hurrian personal names the suffix indicating the subject (3rd person sing.) of the verbal form, for instance, in Old Hurrian ***pašš=i=b*** 'he sends' that would in later Mitanni-Hurrian be ****pašš=i=a***, cf. *pa-aš-ši-a-(ma)*, Mit. IV 55 (present 3rd person sing.); and in Old Hurrian ***un=a=b*** 'he comes' that is in later Mitanni-Hurrian ***un=a=Ø***, cf. I. Wegner, *Einführung*, 126. In view of this evidence one may reasonably infer that Old Hurrian ***ᶠAttap-Na*** {*att=a=b-Na*} and ***ᶠAttap-Naje*** {*att=a=b-Naja/e*} could in Mitanni-Hurrian be ****ᶠAtta-Na*** {*att=a-Na*} and ****ᶠAtta-Naje*** {*att=a-Naja/e*}, respectively. The latter names would then probably also contain the verbal root ***att-***, of which the meaning is unfortunately not yet established. This might also have consequences for the Pre-Greek theonym ***Ἀθάνᾱ*** and its doublet form ***Ἀθηναίη*** (Attic ***Ἀθηναία***), cf. Hurrian ***-Naia/e*** and ***-Na***. Th. Richter (*BGH*, 66, s.v. ***att-*** [Boğ.]) mentions with hesitation (and with a questionmark) the meaning 'to conspire (?)', which does not seem satisfactory. If verbal ***att-*** and nominal ***atta(i)*** are related, a meaning such as 'to make strong' for the transitive stem ***att=i-*** and 'to be strong' for intransitive ***att=a-*** would in my view be more likely, but the hypothesis needs to be confirmed and verified. So if ****ᶠAtta-Na*** {*att=a-Na*} and ****ᶠAtta-Naje*** {*att=a-Naja/e*} are verbal, the theonym may be translated as '*Na(ia)* is strong (?)'. On the other hand, if ***atta-*** in ****ᶠAtta-Na*** {*att(a)=a-Na*} and ****ᶠAtta-Naje*** {*att(a)=a-Naja/e*} is nominal, the meaning can also be '*Naia* is like her father', with the *essive* in ***-a***, which may well refer to her spectacular birth in mythology.

The myth about 'Athena born from her father's head' may help to explain the meaning of her name as '*Naia* is like her father'. Hephaistos's axe certainly helped to cure her father's headache. At Mari ***Atta*** (wr. *at-ta, a-at-ta, ad-da, ad-da-a*) is attested as personal name of four men, typology 3.1, lexicon *atta*, translation 'Vater' ['Father'], at Tigunāni as name of two men and at Qaṭṭarā (Tall ar-Rimaḥ) and Terqa (Tall 'Ašara) as name of one man, cf. Th. Richter, *VHN*, 84. See *ibid.*, 84-85, also for other compound personal names with the onomastic element ***atta(i)***:

e.g. ***ᶠAttai-nirze*** ‘Der Vater ist das Gute’ [‘The father is the good thing’], ***Attai-šarri*** ‘Der Vater ist Götterkönig’ [‘The Father is King of Gods’], ***Attakkuzzi*** ‘Einem kleinen Vater angemessen’ [‘In accordance with a small father’].

Actually Hurrian ***Attana*** (with double writing of the dental and therefore voiceless) occurs at Nuzi and Alalaḫ as the name of a month. E. Laroche, *GLH*, 64: ***Attana***, ***attanašwe***, nom d’un mois à Nuzi et à Alalaḫ; cf. *CAD* A II 510; *AW* 87. In the 2016 edition I wrote that the month-name *Attana* at Alalaḫ might directly refer to the deity *Attana* who may eventually have become the Cretan and Mycenaean goddess *Ἀθάνᾱ* and I argued that it is a well-known fact that the names of months were often derived from theonyms (cf. e.g. Roman *mensis Martius* and *Iunius*). Now I must admit that the evidence from Nuzi should lead to another conclusion: The first month at Alalaḫ VII ***attana*** (cf. also ***attannatim*** {*atta(i)=nn(i)=ade*} at Alalaḫ IV), September/October, can be compared with the 7th month at Nuzi ***attanašwe***. Th. Richter (*BGH*, 67) analyses the name of the month ***Attana*** as {*atta(i)=na*} and translates it as ‘The fathers’, which is in accordance with ***Attanašwe***, analysed as {*attan(i)=n(a)=aš=ve*} by G. Wilhelm (*Das Archiv des Šilwa-Teššup*. Heft 3: *Rationenlisten 2*, Wiesbaden 1985, 84) and as {*atta(i)=na=aš=we*} by J.-P. Vita (Zur Menologie und zum Kalender von Alalaḫ, *AoF 27*, 2000, 298) that can be translated as ‘(Month) of the fathers’. Incidentally, this form from Nuzi with the ending ***-na=aš=we*** (consisting of suffix of the so-called plural definite article ***-na*** + pluralizing suffix ***-aš-*** + the genitive suffix ***-we/-wi***) can also be used to prove that the so-called plural genitive in ***-še / -ši*** (cf. E. Laroche, *GLH*, 26) was actually derived from < ***=(a)š=(w)e/(w)i*** < ***=(a)š=we/wi***. [PGvS.] Although the Hurrian name of the month ***Attana*** at Alalaḫ seems to be explained satisfactorily thanks to comparison with ***attanašwe*** at Nuzi, translation of a personal name or of a theonym ***Attana*** as ‘The fathers’ does not make sense.

Th. Richter (*VHN*, 88) mentions with regard to ***Attan*** that one may alternatively think of “eine auslautlose Form von ***attani*** ‘Vater’ (→ ***atta***)” [a form of ***attani*** ‘father’ without final vowel (→ ***atta***)] or of {*atta(i)=a*[E.]*=n(na)*} ‘Er (Junge) ist wie der (verstorbene ?) Vater’ [‘He (the boy) is like the father (who died / passed away ?)’. [E.] refers to the *essive* case in ***-a***; ***-n(na)*** is then the personal pronoun 3rd person singular that is the subject ‘he’ (in the *absolutive* case) of an alleged (intransitive) ‘is’. According to Th. Richter usage of the *essive* was quite popular in Hurrian personal names. I think that the *essive* in the theonym ****ᶠAtta-Na*** / ****ᶠAtta-Naje*** is essential as well.

The etymology of the Pre-Greek theonym ***Ἀθάνᾱ*** and its doublet form ***Ἀθηναίη*** (Attic ***Ἀθηναία***) as ‘*Na* (= *Naia*) is like her Father (namely Tešub/Zeus)’ remains the most likely option. The resemblance of the goddess to her father reminds us of her dramatic and spectacular mythological birth. The severe headache of her father Zeus had to be cured by Hephaistos’s axe. When the axe cleaved his head, Athena jumped out in full armour. Athena was also her father’s darling. The name of ***Ἀθάνᾱ / Ἀθηναία*** (later *Ἀθήνη* with the doublet form *Ἀθηναίη*) in fact tells the myth of her birth in a nutshell. The Minoan-Hurrian etymology of her name may still have been known in Mycenaean times, since the Minoan-Mycenaean religion as well as mythology and iconography had so much in common. In my view the real *caesura* and serious loss of Minoan and Hurrian traditions probably came only with the end of the Mycenaean era and the arrival of the Dorians in Crete. They came from the north-west of mainland-Greece from areas that had been beyond the sphere of influence of the southern Mycenaean centres, let alone the Minoan civilization. Since the theonym was in alphabetic Greek written with *theta* (***θ***), the Hurrian voiceless dental may have sounded as a voiceless dental with aspiration **[*tʰ*]** in Greek ears.

I return to P. Chantraine’s analysis (*DELG*, 27-28), s.v. ***Ἀθήνη***: “….. ***Ἀθηναῖος***, ‘athénien’, mais le fém. ***Ἀθηναίη*** sert aussi de nom de la déesse (88 ex. chez Hom.), att. ***Ἀθηναία*** et par contraction l’usuel ***Ἀθηνᾶ***. Ét.: Théonyme inexpliqué.”

We may now conclude that his explanation of ***Ἀθήνη*** as the result of contraction of ***Ἀθηναία > Ἀθηνᾶ*** was understandable from the perspective of Greek morphology. Nobody could have suspected that Greek morphology had preserved the doublets of the Hurrian theonym ***Naia/e*** in Pre-Geek ***Ἀθηναία*** and shortened or hypocoristic ***Na*** in Mycenaean ***Ἀθάνᾱ***.

The connection of ***Ἀθάνᾱ*** / ***Ἀθηναία*** analysed as '*Na* / *Naia*) is like her Father (Tešub)' is corroborated by her epithet ***Παλλάς***, ***-άδος*** (*Pallas*), *Iliad* A 200; *Odyssey* α 125; *alibi*).

P. Chantraine (*DELG*, 853) provided no separate *lemma* for ***Παλλάς***, but only briefly mentioned, s.v. ***παλλακή*** 'concubine', "Autre suffixe féminin ***-αδ-***, cf. *δρυάς*, etc., dans ***Παλλάς***, ***-άδος***, épithète d'Athéna (Hom., ion.-att., etc.), employé par Eub. pour une monnaie portant l'effigie de Pallas."

Athena's association with ***παλλακή*** is almost an insult, since she is also called ***παρθένος*** 'young girl, virgin'. ***Παλλὰς Ἀθήνη*** is the goddess of *wisdom* and the arts and she has also Martial features in Greek mythology. The epithet ***Παλλάς*** probably means 'The goddess who knows', 'Goddess of wisdom'.

The Hurrian verbal root ***pal-*** I / ***pall-*** I means 'to know'. Th. Richter (*BGH*, 291), s.v. root ***pal-*** I / ***pall-*** I [*passim*]: Einhellig als 'wissen, kennen' aufgefaßt [unanimously interpreted as 'to know']. Hurrian ***pal-/pall-*** corresponds with Akkadian ***idû*** (E. Laroche, *GLH*, 194), resp. ***edû*** (Dijkstra, 1993b, 167, Wilhelm, 2003b, 341[3]) and Hittite ***šak(k)-*** 'wissen, kennen' (E. Neu, 1996a, 408[30]).

One may infer that the root ***pall-*** is in fact the result of an extra formant ***-il-***, especially in the forms of the *final debitive* mood, cf. I. Wegner, *Einführung*, 111-112 and *table 12*: *The chain of suffixes of the* so-called *final debitive*.

Root+root-extension	formant	formant	pluralizer	enclitic pronoun	syntactic particle
	(***-il-***)	***-ae/-ai***	***-š(a)***	***-tta***	***-an***, etc.
				-mma	
				-nna, etc.	
pal	+ ***(i)l***	+ ***-ae***	+	***-n(na)***	

(*pal-la-(a-)en*, Mit. IV 56, 59) 'in order that he (My Brother) may know it'.

pal + ***(i)l*** + ***-ai*** + ***-n(na)***

(*pal-la-in*, Mit. IV 64) 'in order that he may know it'.

I have proposed etymologies for ***Ἀθάνᾱ*** and ***Ἀριάδνη***, who adopted the role of the goddess helping the hero Theseus or (more likely) who was actually the goddess *Ἀθάνᾱ* helping the Athenian prince by acting in the shape of *Ἀριάδνη*, for that is the normal way of acting of a god that he or she assumes the shape of a mortal, thus concealing that a god is interfering in mortal affairs.

If the proposed etymology of *Ἀριάδνη* (Hurrian **Ari-attana* = Minoan **Ari-athānā* 'Giving (is) *Athana*' > **Ari-athnā* (syncope) > **Ari-adnā* (voicing of the dental under influence of nasal in Hurrian) > Greek **Ἀριάδνᾱ* > *Ἀριάδνη*) is correct, the Hurrian personal name reveals the kernel of the myth. Compare also my Hurrian etymology for ***δαβύρινθος*** (*dabyrinthos / labyrinthos*). …….. **57**, **687-689**, **928**, **997-1003**, **1011**

Αἰακός, the name of the grandfather of the Great ***Αἴας***, who is himself called ***Τελαμώνιος*** 'son of ***Τελαμών***' in Homer. The name ***Αἴας*** is probably cognate with the name of his grandfather ***Αἰακός***. It is significant that E. Laroche (*GLH*, 40) mentions s.v. ***ayakki***: Forme hourrite de l'akk. ***ayakku***; cf. *CAD* A I, 224 sq.; *AW*, 24. - 1. Objet cultuel : au pl. ***a-ya-ak-ki-in-na*** en contexte hitt., KBo XIII 114 III 2. - 2. Nom divin: ***a-ya-ku-un*** = oug. ***a-ya-ku***, RS quadr. 137 IV b 15 (Série An, N° 48); cf. Nougayrol, Ugar. V 249, n. 1; Laroche, *ibid.*, 460. - 3. Onom. théophore, *NPN*, 198. Sur le mot et sur *Belat ayakki*, v. en dernier lieu, A. Kammenhuber, *Hethitisches Wörterbuch*[2], 47.

Especially the divine name ***a-ya-ku-un*** is interesting, because ***a-ya-ku-un*** is a Hurrian god. More interesting is the Linear A inscription on a gold signet ring (HM 530, 1927) from Mavro Spilio: ***a-re-ne-si-di-jo-pi-ke-pa-ja-su-ra-i-te-ra-me-a-ja-ku*** (KN Zf 13), which I have divided into: ***a-re-ne*** (,) ***si-di-jo-pi*** (,) ***ke-pa-ja*** (,) ***su-ra-i*** (,) ***te-ra-me*** (,) ***a-ja-ku***, analysed as Hurrian {*Ar-ene=š*} {*Ši(n)d=i-(j)o/umpi*} {*Kebaja*} {*zul(l)=ai*} {*Telame*} (*Telame / Talame / Talme*) {*Aya=k(k)=un*}, that can be translated as: 'In order that (the priest) *Arene* may connect *Ši(n)dijombi* and *Kebaja* (in wedlock with this wedding-ring), oh Great *Ajak(k)un* !'. See also the next *lemma* on ***Αἴας***, son of ***Τελαμών*** and grandson of ***Αἰακός*** and for a discussion on the whole inscription: *Chapter 10: Linear A inscriptions on metal objects*, § 1. …… **184-197**, **1009**

Αἴας was son of ***Τελαμών*** and grandson of ***Αἰακός*** according to the Greek mythological tradition.

Can it be accidental that a sequence (,) ***te-ra-me*** precedes (,) ***a-ja-ku*** in a spiral Linear A inscription consisting of 19 signs from edge to centre on an engraved Middle Minoan III gold signet ring (HM 530, 1927), found in Chamber Tomb IX, E 1 (S. Hood, *Archaeological survey*, F 6, point 95) in the Necropolis of Mavro Spilio, east of the Palace of Knossos: ***a-re-ne-si-di-jo-pi-ke-pa-ja-su-ra-i-te-ra-me-a-ja-ku*** (KN Zf 13) ?

Since the inscription is very long and has no visible word dividers, it likely consists of a number of words, c.q. names. I propose a division of the inscription into six sequences: ***a-re-ne*** (,) ***si-di-jo-pi*** (,) ***ke-pa-ja*** (,) ***su-ra-i*** (,) ***te-ra-me*** (,) ***a-ja-ku***. See for a discussion on the whole inscription: *Chapter 10: Linear A inscriptions on metal objects*, § 1.

Can it be accidental that we have here the Minoan Linear A prototypes of ***Τελαμών*** and his father ***Αἰακός***, grandfather of the 'Great' ***Αἴας***, together in one inscription ?

If Linear A (**-**)***a-ja-ku*** can be identified with ***Αἰακός*** and if ***Αἴας*** and ***Αἰακός*** contain the same roots and have the same etymology, ***Αἴας*** cannot be identified with Linear B ***aiwa***, because Linear A expressed ***w***-sounds as truthfully as Linear B. The origin of the name ***Αἴας*** seems problemetic. A. Morpurgo(-Davies), *Mycenaeae Graecitatis Lexicon*, Incunabula Graeca III, Rome 1963, 51, s.v. ***a₃-wa*** (KN C 973) according to the new classification of the *Corpus of Mycenaean inscriptions from Knossos*, 1986, interprets the name of an ox (?) as ***Aiwa*[*n*]*s***, Greek ***Αἴας*** ??, in the inscription: **]** ***te-re-wa-ko*** **/** ***a₃-wa*** **1** ***tu-ma-ko*** BOS[. On another tablet from Knossos she explains ***a₃-wa-to*** VIR 1 (KN As(2)1516,14) as Greek ***Αἴαντος*** (?) in a list of names.

According to P. Chantraine (*DELG*, 29) the name of the two Homeric heroes ***Αἴας*** has often been compared with ***αἶα*** 'earth' or the homonym ***αἶα*** 'grandmother' that may correspond with Latin ***avia*** 'grandmother'. One has often tried to identify the two homonyms starting from the belief in 'Mother Earth', citing *Etym. M.* 27, 24. Referring to Mühlestein, *Studi Micenei 2*, 1967, 41-52, Chantraine adds that, if the name ***Αἴας*** is identical or cognate with the Mycenaean name of an ox ***aiwa***, it could be a hypocoristic of ***Αἴολος*** 'lively, rapid'. Incidentally, A. Morpurgo (*l.c.*, 51-52) also explains ***a₃-wo-ro*** (KN Ch 896) as ***aiwolos***, Greek ***αἰόλος*** 'velox = rapid' or 'versicolor = vividly coloured'. ***Αἴολος*** (with proparox. accent) is also known as 'God of the winds' and the mythical ancestre of the Aeolians. However, A. Morpurgo's and P. Chantraine's question marks show that they were not completely convinced.

Incidentally, according to Th. Richter (*BGH*, 1) ***aiwa*** is the Hurrian designation for 'eine Kornart' ['a type of grain'] at Nuzi (*AHw*, Lfg. 1, 1959, 26 [hurritisches Fremdwort]); 'a foodstuff prepared for emmer' (*CAD* A/I, 1964, 218 [hurritisches Wort / Hurrian word]); 'ein Nahrungsmittel' (G.G.W. Müller, *Londoner Nuzi-Texte*, SANTAG. Arbeiten und Untersuchungen zur Keilschriftkunde 4, Wiesbaden 1998, 92, /***aiwe***/); 'a cereal foodstuff' *CDA*[2], 2000, 9 [hurritisches Lehnwort / Hurrian loan-word]); s. *AHw*, Lfg. 16, 1981, 1542.

P. Chantraine, *DELG*, 37, also discusses the etymology of ***αἰόλος***: "Il est certain que le sens originel est « rapide, vif ». Deux explications ont été principalement proposées. D'après Fraenkel, *Gnomon 22*, 239, de ****ϝαι-ϝόλ-ος*** avec dissimilation de ***ϝ*** initial, apparenté à ***εἰλέω***, avec le sens de « tourner », etc. Selon E. Benveniste (*BSL 38*, 107), famille de skr. ***āyu-*** « force vital », gr. ***αἰϝων***, etc. avec suff. ***-ολος***, ce qui peut paraître embarrassant." If Linear B ***a₃-wo-ro*** is to be equated with ***αἰόλος*** or ***Αἴολος***, my most serious objection to the etymology ****ϝαι-ϝόλ-ος*** would be that the alleged initial ****ϝ-*** must have been absent in the Mycenaean age, because the Mycenaean scribes still faithfully wrote every ****ϝ-*** with the Linear B ***w-*** signs.

Anyway in my view the name of the hero ***Αἴας*** can better be associated with the personal names mentioned by E. Laroche, *NH*, 23, N° 3, s.v. ***Aya***: 1. Abs. *ᵐA-ya-a*, XVIII 35, 5; nom. acc. *ᵐA-i-ya-aš/an*, V 9 Ro 31, 33. 2. Hiér. nom. *ᵐA-i-a-s*, Kargamis 18 a 2. [N.B. the ending in ***-aš*** for the Hittite nominative and that in ***-an*** for the Hittite accusative only tell that the names were adapted to the Hittite declension; they do not tell anything about the origin of the root of the name. PGvS]

The ***a/e*** alternation, seen in MIN ***te-la-ma-e*** 'grand prix' : ***talam- / talm-***, has been observed more often in Hurrian. One may wonder whether the mythical name ***Τελαμών***, father of the hero ***Αἴας*** who is therefore also called ***Τελαμώνιος*** (*Iliad* B 528, N 67, e.a.), 'Son of Telamōn' (patronymic), King of Salamis, may have anything to do with the Hurrian root ***talm- / talam- / telam-***. The name ***Τελαμών*** has received a popular Greek etymology, since it is connected with the lexical term ***τελαμών*** 'band, bandage, belt'.

P. Chantraine, *Dictionnaire étymologique de la langue grecque*, 1100, s.v. ***τελαμών***: "Anthroponymes: *Τελαμών* fils d'Éaque, père d'Ajax (Hom., etc.), d'où pour Ajax le patronymique *Τελαμώνιος* (Hom.), le mot pouvant signifier l'« endurant » [an enduring person]; Kretschmer y voyait avec témérité un nom mythique signifiant « porteur de la voûte céleste » [?], *Gl.* 15, 1927, 192. Étymologie: Le mot signifie « ce qui porte ». Thème I ****tel-ə₂-***, cf. l'infinitif ***τελάσσαι · τολμῆσαι, τλῆναι*** (Hsch.). Voir pour cette famille de mots s.v. ***ταλάσσαι***." This proposed etymology is conceivable according to P. Kretschmer and P. Chantraine, who have to be taken very seriously. However, popular etymology is never far away. After the Mycenaean conquest of Minoan Crete and especially after the Dorian conquest of Mycenaean Crete, the origin of many Pre-Greek names was no longer understood. Nevertheless people did not stop to explain the alleged etymology of names of Pre-Greek mythological heroes as Greek. It is intriguing that some Pre-Greek names like ***Theseus*** (cf. *s. v.* Linear B ***te-se-u***) appear to have a Hurrian etymology.

Telamon's son ***Aias*** was famous for his huge and strong appearance and he was second in bravery after Achilleus. A Hurrian prototype of the name of Aias's father reflecting a huge and great appearance, containing the root ***talam- / telam- / talm-***, would very well fit into that picture. Morphologically ****Telam=u/o=n(ni)*** or ****Talam=u/o=n(ni)***, with a common Hurrian formation in ***=u/o=n(ni)***, may well have been the Hurrian prototype of ***Τελαμών***. In that case ***Τελαμών*** has nothing to do with Greek ***τελαμών*** 'band, bandage, belt', but is only connected with it by popular etymology, after its original meaning was completely forgotten. Also its original function as epithet of ***Αἰακός*** '(The) Great', and possibly of ***Αἴας*** as well, was lost and ***Τελαμών*** had to become son of ***Αἰακός*** and father of ***Αἴας***. If the name ***Αἴας*** *Τελαμώνιος* (*Aias*, son of Telamōn) is cognate with the name of his grandfather ***Αἰακός***, it is interesting that E. Laroche (*GLH*, 40) mentions s.v. ***ayakki***: Forme hourrite de l'akk. ***ayakku***; cf. *CAD* A I, 224 sq.; *AW*, 24. - 1. Objet cultuel : au pl. ***a-ya-ak-ki-in-na*** en contexte hitt., KBo XIII 114 III 2. - 2. Nom divin: ***a-ya-ku-un*** = oug. ***a-ya-ku***, RS quadr. 137 IV b 15 (Série An, N° 48); cf. Nougayrol, Ugar. V 249, n. 1; Laroche, *ibid.*, 460. - 3. Onom. théophore, *NPN*, 198. Sur le mot et sur *Belat ayakki*, v. en dernier lieu, A. Kammenhuber, *Hethitisches Wörterbuch*^{2}, 47.

Th. Richter, *BGH*, 3, s.v. Δ ***ajakki*** [Lw/He] mentions that ***ajakki*** is 'an object in a temple' and 'epithet of IŠTAR (and *Šauška* of *Šamuḫa*)', loan-word from Akkadian ***ajakku*** into Hittite through Hurrian (A. Kammenhuber, *HW*^{2}, Lfg. 1, 1975, 47; H. Otten, Bemerkungen zum Hethitischen Wörterbuch, ZA 66, 1976, 92; J. Tischler, *Hethitisches etymologisches Glossar*, Teil I, Lieferung 2, 1977, 5); corresponds with Sumerian [(D.)NIN.SÚN], Ugaritic *a-ia-ku* from Akkadian *ajakku* (J. Huehnergard, *Ugaritic vocabulary in syllabic transcription*, Harvard Semitic Series / Studies 32, Atlanta 1987, 106 ['sanctuary' from Akkadian *ajakku*]). [Th. Richter uses the symbol Δ to indicate 'über das Hurritische vermitteltes Lexem / lexeme transmitted through Hurrian', PGvS.]

The last 6 signs ***-te-ra-me-a-ja-ku*** of the Linear A inscription KN Zf 13, which I propose to read as (𐀀) ***te-la-me*** (𐀀) ***a-ja-ku***, can be interpreted as Hurrian 'Great *A-ya-ku-un*' or '*A-ya-ku-un* the Great', since we have already seen that ***te-la-me*** can be equated with ***ta-la-am-(m)e***, cf. E. Laroche, *GLH*, s.v. ***talmi*** 'grand': Sumerian GAL in the name of ***Talmi-Tešub***, wr. GAL-^{d}U-***ub***, *NH*, N° 1230. RS voc. II 18 = Ḫḫ II 130: ki.lam gu.la = MIN ***te-la-ma-e*** 'grand prix'. Thèmes ***talmi*** et ***talami***.

Since a final consonant is not expressed in Linear A, (𐀀) ***a-ja-ku*** on the gold signet ring from Mavro Spilio can likely be equated with the Hurrian divine name ***A-ya-ku-un*** = oug. ***a-ya-ku***, RS quadr. 137 IV b 15 (Série An, N° 48) or the theophorous personal name derived from it, cf. E. Laroche (*GLH*, 40) s.v. ***ayakki***. At the end of the inscription it can probably be interpreted as a vocative. ***A-ya-ku-un*** can morphologically be compared with ****Te/Talam=u/o=n(ni)***, Hurrian prototype of ***Τελαμών***. Cf. for ***=o=n(ni)*** Hurrian ***Tutunni*** (wr. *tu-du-un-ni*) from Mari (M. 5235 II' 12), {*To/ud=o=n(ni)*}, lexicon ***tud-***, typology 1.3.1.1.2.2, cf. Th. Richter, *VHN*, 323; cf. ***Tu-ut-tu-un-ni*** at Alalaḫ IV (D.J. Wiseman, *AT* 190 = *ZA 60*, 93, nr. 7: 40); cf. ***du-du-ni*** at Ugarit (cf. F. Gröndahl, *PNTU*, 331).

According to Th. Richter (*VHN*, 527-528, s.v. ***talm- / talb-***) the formation ***talme/i***, if used as a personal name without second onomastic element, means 'Great' or 'The Great'.

Referring to *BGH*, 432f., he adds that he supports recent proposals to consider the possibility of verbal usage of the root 'to be / become great', especially if the root is used as first onomastic element in so-called 'sentence names'. The meaning 'great' for the variant ***talame*** (e.g. in the Hurrian personal name ^{f}***Umar-talame*** from Mari) is confirmed on the basis of Sumerian maḫ = Akkadian ***ra-bu-ú*** = Hurrian ***ta-la-am-me***.

The voicelessness of the initial dental of Linear A ***te-la-me*** and Pre-Greek ***Τελαμών*** seems to contrast with the voiced dental of Linear A ***da-me*** (HT 86a.4; HT 95a.2; HT 95b.2; HT 106.3; HT 120.1), if that is indeed interpreted as the Hurrian personal name ***Dalme / Talme***. → See for more possibilities s.v. Linear A ***da-me*** at Hagia Triada.

Nevertheless a seeming 'paradox' may be explained either from dialectal differences or from the fact that many Hurrian consonants behaved like allophones. It is probably too early to define, whether dialectal variation between Mavro Spilio (Knossos) and Hagia Triada is likely or not. In the Near East one may, for instance, compare the orthography of ***Tutunni*** at Mari (M. 5235 II' 12), wr. *tu-du-un-ni*, analysis {*To/ud=o=n(ni)*}, lex. ***tud-*** (according to Th. Richter, *VHN*, 323) with ***Tu-ut-tu-un-ni*** at Alalaḫ IV (D.J. Wiseman, *AT* 190 = *ZA 60*, 93, nr. 7: 40), and ***du-du-ni*** at Ugarit (F. Gröndahl, *PNTU*, 331). The forms are obviously identical from an etymological point of view, but, for instance, those from Mari and Ugarit may contain voiced and that from Alalaḫ IV voiceless dentals, because dentals in Hurrian appear not only to behave as allophones, but there may be dialectal variations as well. It also seems likely that - as a result of positional voicing - the quality of the initial consonant is often influenced by that of the following. Another problem in the Near East is the factor of time: The Old Babylonian texts from Mari are older than those from Alalaḫ and Ugarit. There may also be a difference in orthographic conventions between the Mari texts and those from other places. …… **184-187**

Ἁλικαρνησός in Caria and the island ***Κάρνος*** along the Acarnanian coast, compared with ***Ἁλίκυρνα***, south of the mountain *Arakynthos* in Aetolia, and ***Κύρνος*** in Asia Minor. **968**

ἄναξ, especially in the epic formula ***ἄναξ ἀνδρῶν Ἀγαμέμνων***, Agamemnon's epithet 'the king of men, Agamemnon' in Homer's *Iliad* A 172, *et passim*. Linear B ***wa-na-ka*** = ***ϝάναξ***. Linear A ***tu-ru-sa*** (KO Za 1.b) on a libation table from Mount Kophinas, interpreted as Hurrian ****Turu-šar***, possibly 'King of men', literally 'King of Gods ruling over men', may be the Minoan-Hurrian prototype of Agamemnon's epithet ***ἄναξ ἀνδρῶν***.

According to P. Chantraine (*DELG*, 84-85) the etymology of ***ἄναξ*** < ***ϝάναξ*** is unknown (inconnue) and Phrygian ***wanaktei*** may be derived from Greek ***ϝάναξ***. Since Mycenaean ***ϝάναξ*** and Homeric ***ἄναξ*** are Pre-Greek, it is interesting to examine, whether ***wanak-*** may, for instance, be derived from a Hurrian root ***wan-*** + honorific suffix ***=ga/(k)ka*** (cf. I. Wegner, *Einführung*, 56) as in the Hurrian theonym ***Ša(w)uška***.

Th. Richter (*BGH*, 293) mentions ***pan-*** [Boğ.], i.e. *pa-a-nu-ú-wa-a* {*pān=ūvā*} (KUB XXVII.10 = ChS I/4 Nr. 26 V 7'), cf. E. Laroche, *GLH*, 195, sub ***panu-***, and D.R.M. Campbell, *Mood and modality in Hurrian* (Diss. Univ. of Chicago 2007), 330; ***wa-na*** and ***wa-ni*** [Mari], cf. E. Laroche, *GLH*, 293; ***pa-a-na-aḫ-ni-ta*** [Boğ.], cf. E. Laroche, *GLH*, 195. The forms with ***pan-*** can only be taken into account, if alternation of ***pan-/wan-*** is assumed. However, unfortunately the meaning of Hurrian ***pan-*** and ***wan-*** is not yet known. So we have to wait for more clarity, before we draw premature conclusions. For the moment we must reckon with the possibility that Mycenaean Greek may have derived ***ϝάναξ*** from another source than Hurrian. …… **33**, **330-332**

Ἀπέλγων. According to M. Ventris - J. Chadwick, *Documents in Mycenaean Greek*, 126, *Apollo* does not appear in the Mycenaean texts. However, the incomplete theonym may be attested at Knossos in the form]***pe-ro$_2$***-[(KN E 842, 3). C.J. Ruijgh, *EGM*, § 237: "Si on admet la lecture possible]***pe-ro$_2$-ne***, il serait tentant de lire **[*a-*]*pe-ro$_2$-ne*** et de voir dans cette forme le datif du théonyme ***Ἀπέλγων*** (plus tard dor. ***Ἀπέλλων***, chypr. ***Ἀπείλων***). La forme ***Ἀπόλλων*** peut résulter de l'assimilation régressive de voyelles non contiguës. Une telle interprétation serait corroborée par ***te-o-i θεοῖς*** à la ligne 1. De même, ***me-na*** (ligne 2) peut être le datif de ***Μήνᾱ*** 'Lune'." If Ruijgh's conjecture is correct, the Mycenaean form ***Ἀπέλγων*** is, of course, the oldest form, preserved in Cypriot ***Ἀπείλων*** and Doric ***Ἀπέλλων***. The assembly of Spartan citizens was called ***Ἀπέλλα***, probably because the citizens met in the assembly under the auspices or the patronage of ***Ἀπέλλων***. A gloss by Hesychius tells: ***ἀπέλλαι · σηκοί, ἐκκλησίαι, ἀρχαιρεσίαι***. Apollo and Artemis were armed with bow and arrows.

The root ***Ἀπέλ-*** may well be associated with ***apellu*** 'arrow(head)' from Nuzi, which is suspected to be Hurrian according to V. Haas – H.-J. Thiel, 'Die Beschwörungsrituale der Allaituraḫ(ḫ)i und verwandte Texte', *Alter Orient und Altes Testament 31*, *Hurritologische Studien II*, 1978, 262, cf. Th. Richter, *BGH*, 39.

If this etymology is correct, Mycenaean ***Ἀπέλγων*** is probably originally a Hurrian *hunting god*, worshipped in Crete. M.P. Nilsson, *The Minoan-Mycenaean religion*, 513-516, coined the notion **πότνιος θηρῶν* on account of iconographic evidence, arguing that there was no need for two deities with the same function, so that Apollo could move on to other areas important for Greek society, but his original features were never completely wiped out. …… **558**, **994-995**, **1011**

ἀπέλλαι · σηκοί, ***ἐκκλησίαι***, ***ἀρχαιρεσίαι***, gloss by Hesychius. …… **558**, **994**

Ἀρείᾱς, attested in Linear B ***e-ma-a$_2$ a-re-ja*** (PY Tn 316 r. 7), interpreted as singular dative ***Ἑρμάᾳ Ἀρείᾳ*** 'for ***Ἑρμάᾱς Ἀρείᾱς***', 'for Hermes the Martial' (***Ἑρμάᾱς > Ἑρμῆς***).

Ἀρείᾱς may be considered a substantivated adjective placed in apposition to *Ἑρμάάς* (cf. C.J. Ruijgh, *EGM*, § 229). M. Lejeune (*Mémoires de philology mycénienne,* 210, n. 20) regards ***a-re-ja***, however, as a feminine theonym: une déesse …dans une même offrande (à laquelle Hermès imprime un caractère dominant masculin).

Interpretation of *Ἀρείᾱς* as 'the Martial' is corroborated by an Arcadian inscription (*Del.* 665 C): *τὸν Δία τὸν Ἄρηα, τὰν Ἀθάνᾱν τὰν Ἀρείᾱν* etc., showing that the special domain of Ares is shared by Zeus and Athena the Martial (cf. C.J. Ruijgh, *EGM*, § 229, n. 154). …… **201**, **369**, **371**, **539**, **550**, **552**, **976-977**, **1010**

Ἀρεῖος, interpretation of Linear B ***]a-re-jo*** (KN Vc(1) 208), personal name at Knossos, probably 'the martial man', derived from the root ***Ἀρη-***. The doublet form ***a-re-i-jo*** occurring at Knossos and Pylos (KN Le 641+fr.1; PY An 656.6), probably ***Ἀρέιος***, however, is derived from the root ***Ἀρεσ- / Ἀρεh-***. Likewise, on some Theban jars the compound personal name ***a-re-me-ne*** is attested (TH Z 852; al.), probably ***Ἀρῃμένης***, besides ***a-re-i̯-me-ne*** (TH Z 849), probably ***Ἀρέιμένης***, derived from ***Ἀρη-*** and ***Ἀρεσ- / Ἀρεh-***, respectively.

The personal name ***pa-na-re-jo*** (nominative KN As 1516,15; KN U 4478,5,19; KN V 1004; *al.*; dative PY Fn 867,2), may be explained as ***Παναρεῖος***, comparable with ***Παναθήναιος*** (cf. ***Παναθήναια***).

Th. Richter (*VHN*, 378) mentions a theonym ***Ara***, that was to date only known from Ḫattuša as the theonym ***^{D}a-a-ra(^{o})***, that is attested in CTH 492 among Hurrian deities. It now also occurs as subject of Old Hurrian verbal 'sentence names' as ***^{o}-a-ra***, e.g. in ***Arum-Ara*** (wr. *A-rum-a-ra*) at Tigunāni, analysis {*ar=o/um-Ara*}, typology 1.1.1.1.1, 'Ara gab (Jungen)' ['Ara gave (the boy)'], cf. Th. Richter, *VHN*, 73; and ***Ḫašip-Ara*** (wr. *Ḫa-ši-ip-a-ra*) at Tigunāni, analysis {*ḫaž=i=b-Ara*}, typology 1.1.1.2.1, 'Ara erhörte (Person oder Gebet)' ['Ara heard (and answered person or prayer)'], cf. Th. Richter, *VHN*, 128. See for the theonym V. Haas, *Geschichte der hethitischen Religion, Handbuch der Orientalistik I/15*, Leiden 1994, 257-258 + note 37. Unfortunately it is not known whether ***Ara*** is a martial god, whose name might be related to 'Pre-Greek' ****Arē-***. …… **976-977**

Ἀρέιος, interpretation of Linear B ***a-re-i-jo*** (KN Le 641+fr.1; PY An 656.6) at Knossos and Pylos, probably derived from the root ***Ἀρεσ- / Ἀρεh-***. This form is probably a doublet of the personal name ***]a-re-jo*** (KN Vc(1) 208), probably ***Ἀρεῖος*** 'the martial man', derived from the root ***Ἀρη-***. Likewise, on some Theban jars the compound personal name ***a-re-me-ne*** is attested (TH Z 852; al.), probably ***Ἀρῃμένης***, besides ***a-re-i̯-me-ne*** (TH Z 849), probably ***Ἀρέιμένης***, derived from ***Ἀρη-*** and ***Ἀρεσ- / Ἀρεh-***, respectively. …….. **976-977**

Ἀρεύς, ***Ἄρης*** and the roots ***Ἀρη-***, ***Ἀρεσ- / Ἀρεh-*** and ***Ἀρηϝ-***, all derived from 'Pre-Greek' ****Arē-***. Herodotus (V, 7) tells that the only gods worshipped by the Thracians were Ares, Dionysus and Artemis: *θεοὺς δὲ σέβονται (οἱ Θρήικες) μούνους τούσδε, Ἄρεα καὶ Διόνυσον καὶ Ἄρτεμιν*. The problem with such statements is how they should be interpreted. Since most peoples or tribes were used to waging war in antiquity, there is virtually none that did not worship some martial god.

Did the Thracians have their own war god whom the Greeks could identify with their god Ares or did they have a theonym built on the same root as that of the Greek god's name? D. Detschew, *Die thrakische Sprachreste*, 24, s.v. ***Ἀρεύς***, ***Ἄρης***: "Da aber die Thraker im Gegensatz zu den Griechen sich den Ares als reitenden Gott vorstellten, konnte er leicht mit dem *Heros* identifiziert werden, insofern die Widmungen an den letzteren in Thessalien und Boiotien mit Reiterreliefs verbunden zu sein pflegten. So erklärt sich dass Widmungen an Ares in Thrakien selten sind, während die Verehrung des Reiterheros in einer grossen Zahl Denkmäler bezeugt ist."

According to C.J. Ruijgh (*EGM*, § 67) Ares's name occurs in various forms in the Mycenaean texts. The epic flection of this non-Greek theonym is complicated, because it is built on three different roots: ***Ἀρη-***, ***Ἀρεσ- / Ἀρεh-*** and ***Ἀρηϝ-***, all derived from 'Pre-Greek' ****Arē-***. To date no trace has been found of ***Ἀρηϝ-*** in the Mycenaean texts. At Knossos ***a-re*** (KN Fp(1) 14+27+28+fr.2; Mc 462+5792+5808+5816+8450+fr.B) occurs = ***Ἄρῃ***, dative of ***Ἄρης***, , derived from ***Ἀρη-***.

At Knossos the personal name]***a-re-jo*** (KN Vc(1) 208) occurs, probably ***Ἀρεῖος*** 'the martial man', also derived from the root ***Ἀρη-***. The doublet form ***a-re-i-jo*** occurring at Knossos and Pylos (KN Le 641+fr.1; PY An 656.6), probably ***Ἀρέιος***, however, is derived from the root ***Ἀρεσ- / Ἀρεh-***. Likewise, on some Theban jars the compound personal name ***a-re-me-ne*** is attested (TH Z 852; al.), probably ***Ἀρῃμένης***, besides ***a-re-i̯-me-ne*** (TH Z 849), probably ***Ἀρέιμένης***, derived from ***Ἀρη-*** and ***Ἀρεσ- / Ἀρεh-***, respectively.

The personal name ***pa-na-re-jo*** (nominative KN As 1516,15; KN U 4478,5,19; KN V 1004; *al.*; dative PY Fn 867,2), may be explained as ***Παναρεῖος***, comparable with ***Παναθήναιος*** (cf. ***Παναθήναια***).

Th. Richter (*VHN*, 378) mentions sub ***Ara*** that the theonym *°a-a-ra* occurs as subject of verbal sentence names and that the God may well be equivalent to theonym ^{D}*a-a-ra(°)* known from Ḫattuša (*CTH*, 492), attested in an environment of Hurrian gods. Unfortunately we do not know very much about this god and his function, but Hurrian ^{D}*Ara* may perhaps be the Hurrian prototype of Pre-Greek *Ares*.

It now also occurs as subject of Old Hurrian verbal 'sentence names' as ***°-a-ra***, e.g. in ***Arum-Ara*** (wr. *A-rum-a-ra*) at Tigunāni, analysis {*ar=o/um-Ara*}, typology 1.1.1.1.1, 'Ara gab (Jungen)' ['Ara gave (the boy)'], cf. Th. Richter, *VHN*, 73; and ***Ḫašip-Ara*** (wr. *Ḫa-ši-ip-a-ra*) at Tigunāni, analysis {*ḫaž=i=b-Ara*}, typology 1.1.1.2.1, 'Ara erhörte (Person oder Gebet)' ['Ara heard (and answered person or prayer)'], cf. Th. Richter, *VHN*, 128. See for the theonym V. Haas, *Geschichte der hethitischen Religion, Handbuch der Orientalistik I/15*, Leiden 1994, 257-258 + note 37. It is not yet known whether ***Ara*** is a martial god, whose name might be related to 'Pre-Greek' ****Arē-***.

If Linear A ***sa-ra-ra*** J (HT 30+77.3) is a personal name, it can be interpreted as ***Šar(i)-Ara*** {*šar(i)-ara*}, with the verbal root ***šar-*** 'to wish, demand' and theonym ***Ara***, 'Wish, oh *Ara* !', if it does not refer to a commodity as proposed by L.C. Meijer (*Eine strukturelle Analyse der Hagia Triada Tafeln*, 1982, 98), who calls ***sa-ra-ra*** J (HT 30+77.3) a 'Produktbezeichnung' ['commodity']. …… **557**, **616**, **976-977**

Ἀριάδνη, the daughter of king Minos, played a very peculiar role by helping the Athenian hero *Theseus* escaping from the labyrinth after he had killed the Minotaur. After Theseus had left her on the island of Naxos, Dionysos took her to Mount Olympos. One can only conclude that the Minoan princess must have had some godlike features. She did not only play the part of a goddess by helping heroes as, for instance, Athena did several times with Odysseus and other heroes, but she also became the consort of a god.

However, the myth does not show what actually happened, because it was not ***Ἀριάδνη*** behaving like a goddess, but in reality the Goddess Athena helping the hero Theseus in the appearance of the princess, thus concealing that an immortal God was interfering in the affairs of mortal human beings. The element ***ἀρι-*** in her name was later probably understood as the augmentive particle which we find e.g. in Homer in ***ἀριδείκετος*** 'very excellent, eminent' and ***ἀρίζηλος*** 'very clear'.

However, if the name was originally Minoan, the element ***ari-*** may well represent the Hurrian verbal root ***ar-*** 'to give'; ***ar=i-*** is the *transitive imperative* in ***-i-***, of which ***-i-*** is in fact the marker of transitivity (the *imperative* does not have its own marker). The indicative 3rd person singular in 'Mitanni' Hurrian is ***ar=i=a***, consisting of the root ***ar-*** + marker of transitivity ***-i-*** + marker ***-a*** of the subject of the transitive verb 3rd person singular.

In many personal names we find Old Hurrian forms with the Old Hurrian marker of the subject of the transitive verb 3rd person singular ***-b***, which was previously called a 'root-complement' ***-p/b-***, but is now considered the suffix marking the 3rd person singular: e.g. ***Ari-p-ḫurra***, ***Ari-p-šarri***, ***Ari-p-šeriš***, ***Ari-p-tešup***, ***Ari-p-tilla***, etc... at Nuzi.

Old Hurrian ***ar=i=b-*** = 'Mitanni' Hurrian ***ar=i=a***. The Hurrian name ***Ariia*** can be a 'one word' name ***Ar=i=a*** 'He gives' or the hypocoristic form ***Ar=i=ya***, in which the hypocoristic suffix ***-ya*** replaces, for instance, a theophorous element like ***-šarri***, ***-tešup***.

The name of the princess ***Ἀριάδνη*** may be explained from the Hurrian prototype ****Ari-attānā*** > Minoan ****Ari-at^{h}ānā*** 'Give, oh Attana /Athana !' > ****Ari-at^{h}nā*** (syncope) > ****Ari-adnā*** (voicing of the dental under influence of nasal in Hurrian) > (Greek) ****Ἀριάδνᾱ > Ἀριάδνη***. The name ***Ἀριάδνη*** may be interpreted as a theophorous sentence name.

Another indication of a possibly Hurrian origin of the Mycenaean theonym ***Ἀθάνᾱ*** is the parallel form ***Ἀθηναίη***. Apart from the frequent suffix *-na* of the plural article, there is a Hurrian element ***-na*** occurring in feminine personal names, which may well be a shortened form of ***-naia*** and ***-nawar***, cf. at Nuzi: ^{f}*Aru-na*, ^{f}***Aweš-na*** and ^{f}***Awiš-naia***, ^{f}*Aze-na*, ^{f}***Minen-na*** and ^{f}***Minen-naia***, cf. P.M. Purves, *NPN*, 236-237, s.v. ***-na*** and ***-naia***. Purves adds: Hurrian element apparently found exclusively in feminine personal names. See Speiser in *AASOR XVI (1936)*, p. 75, n. 1, and Oppenheim in *AOF XII (1937-39)*, 36. P.M. Purves, *NPN*, 237, gives a long list of feminine names with the element ***-naia*** at Nuzi. Cf. s.v. *Ἀθάνᾱ*. …….. **1001-1002**, **1011**

→ See also s.v. ***Ἀθάνᾱ*** and s.v. ***Θησεύς***.

[……...]

Ἀρχᾶνες, ancient Villa of Arkhanes, modern ***Ἀρχάνες*** south of Knossos, where 7 Linear A tablets have been found. Cf. Linear A ***a|-ka-ne*** GRA**[** (AK 3a.1 + AK 1b.1).

In the very small group of 7 Linear A tablets found in the Minoan Palace or Villa of Arkhanes, south of Knossos, AK 3a.1 mentions: .]***-ka-ne*** GRA[providing exactly the sequence to be expected for *Ἀρχᾶνες*, if the Linear B orthographic conventions are applied to Linear A. According to Linear B orthography ***-r-*** in consonant clusters is not expressed before a palatal stop and the final ***-s*** is not expressed either.

Tablet AK 3 (HM 1675, 1970) from the Palace or Villa of Epano Arkhanes, site of Τζαμί, House of Καλπαδάκη, Ὁδός Καπετανάκη (Late Minoan Ib) reads:

AK 3a.1. .]*-ka-ne* , GRA[
2.] D OLIVA 3 D VIN*b* 2[
3. 2 [[*136* 2 vest.]] [
4. *ki-nu* GRA 13[ ] [
5. [ ]*te* 2[ ] *136* 2 *36* 2 [
6.]*ku* 3 [

b.1.]*-ja-pi* GRA 6[
2.]*pi-163a* GRA 1 [[ ]] OLE[
3. vacat
4.] ' 2[ ] OLE 4
5.] VIN*a* 1
6.] vacat [

Only the sign ***a-***] is missing at the beginning of the text in the left top corner of the tablet. It seems likely that this small fragment can be found in the left top corner of the (reverse) *b*-side of tablet AK 1b.1, which reads according to *GORILA 3* and J. Raison - M. Pope, *Corpus transnuméré du linéaire A* (BCILL 18 and 74): ***a***[ ]***ja-re*** 3[.

Observing the photographs it is not at all evident that the tiny fragment reading ***a***[should really be assigned to AK 1, since that tablet is far from complete and does not provide an irrefutable join with the other fragments. Assigning it to the left top corner of AK 3a would provide the complete sequence ***a***]***-ka-ne*** for *Ἀρχᾶνες*. Another argument that ***a***]***-ka-ne*** could well represent the local toponym of the palace itself, is the ideogram GRA[mentioned after ***a***]***-ka-ne***, since it has been observed that in Linear B the ideograms of GRANUM and HORDEUM are also frequently preceded by toponyms.

It is not certain that the final ***-s*** of *Ἀρχᾶνες* already existed in the Linear A name, since final consonants were not expressed in the script.

Occurrence of the toponym 'Arkhane(s)' as the first entry in the heading of one of the few Linear A tablets discovered in the Minoan Villa of Arkhanes can hardly be accidental. It is interesting that according to *GORILA 5*, 83, the tablets ARKH 1, ARKH 2 and ARKH 3 are probably all inscribed by scribe 1, which does at least not contradict the assumption that fragment ***a***] belongs to AK 3.

The Linear A toponym ***a***]***-ka-ne*** can actually be analysed as {*ar=ḫane/i*} 'Give a child (oh God / *numen*) !'. Arkhanes lies in the foothills of Mount Ioukhtas and may have been used as a starting point for those who wished to visit the Peak Sanctuary of Ioukhtas to pray to the gods or to bring a 'libation table' with incised prayer.

Some 'libation formulas' from Ioukhtas contain ***u-na-ka-na-si*** (IO Za 2.1; IO Za 9) as well as ***u-na-ru-ka-***[(IO Za 16.b) that can be completed to ***u-na-ru-ka-***[***na-si***. Linear A ***u-na-ka-na-si*** can be analysed as {*un=a-ḫ(ḫ)an(i)=a=šše/i*} 'come offspring, childhood, childbirth', and ***u-na-ru-ka-***[***na-si*** as {*un=al=u-ḫ(ḫ)an(i)=a=šše/i*} or {*un=ar=u-ḫ(ḫ)an(i)=a=šše/i*} 'bring childhood, childbirth (oh God(s) !', see the chapter on religious Linear A texts.

The meaning of the toponym {*ar=ḫane/i*} 'Give a child (oh *numen*) !' corresponds exactly with the wish / prayer {*un=a-ḫ(ḫ)an(i)=a=šše/i*} 'come offspring, childhood, childbirth', expressed so often on several libation tables. It is striking that the formation of Hurrian toponyms is often similar to that of personal names. Compare also my Hurrian interpretation of the toponyms *Khania* and *Phaistos*. **588-589**, **872**, **943-944**, **1006-1007**

ἀσάμινθος 'bath-tub', considered Pre-Greek because of the ***-νθ-*** formant, is attested in Linear B ***a-sa-mi-to*** (KN Ws 8497) ***ἀσάμινθος*** on a sealing from Knossos, with ideogram of rectangular shape; nominative sing. or plur., cf. M. Ventris - J. Chadwick, *Documents in Mycenaean Greek*, Cambridge 1973[2]. The term ***ἀσάμινθος*** also occurs in Homer (*Iliad* K 576, *Odyss*. γ 468, δ 48, δ 128).

P. Chantraine (*DELG*, 122): ***ἀσάμινθος***: f. 'baignoire', (Hom.), le mot n'est plus usuel en attique (Cratinos 234 l'emploie à propos d'une large coupe); rares emplois tardifs. ...

Étymologie: inconnue. On a évidemment considéré à bon droit le mot comme un emprunt du grec aux langues indigènes (égéennes ?), en raison du sens du mot et de la finale ***-ινθος***. On ne peut aller plus loin. Gaerte, *Ph. W*. 1922, 888, et v. Blumenthal, *IF 48*, 50, évoquent le suméro-babyl. ***asam***, recipient d'argile pour l'eau. It is important that ***a-sa-mi-to*** is attested in Linear B at Knossos. I consider a Minoan-Hurrian etymology very likely. According to Th. Richter (*BGH*, 51-52) the verbal root ***aššˇ-*** [Boğ.], and ***aš-*** IV(?) [Boğ.] was formerly translated as "être assis?" by E. Laroche (*GLH*, 59) and others.

However, recently this meaning was rejected by V. Haas, *Materia Magica et Medica Hethitica.Ein Beitrag zur Heilkunde im Alten Orient*, Berlin-New York, 41[237], 54[289], 150.

I. Wegner, *Einführung*, 86, 250, ***aššˇ-*** "(ab)waschen"; D.R.M. Campbell, *Mood and modality in Hurrian* (diss. Univ of Chicago), 2007, 176, 256[+165], ***aššˇ-*** and ***aš-*** "to wash, cleanse"; V. Haas - I. Wegner, Beiträge zum hurritischen Lexikon: Die hurritischen Verben *ušš-* "gehen" und *aššˇ-* "abwaschen, abwischen", in: J. Klinger e. a. (eds.), *Investigationes Anatolicae: Gedenkschrift für Erich Neu* (*StBoT* 52), Wiesbaden 2010, 102 ff.

Consequently we may conclude that Hurrian ***aššš-*** means 'to wash, cleanse'. Since only the ending in ***-os*** of Pre-Greek ***ἀσάμινθος*** (*asaminthos*) is Greek, I propose that Pre-Greek ***ἀσάμινθος*** is derived from ***aššš=am=i=(e)n=(i)=tta***, consisting of the root ***aššš-*** + *factitive* root-extension ***-am-*** (cf. I. Wegner, *Einführung*, 88) + *jussive* suffix ***-i-*** + the jussive marker of the acting person ***-en-*** (with syncope of the vowel ***-e-***) + facultative theme-vowel (***-i-***) + enclitic personal pronoun 1st pers. sing. ***-tta***, object of the transitive verb (I. Wegner, *Einführung*, 103, Table 9: *The order of suffixes of the positive jussive*.

As a result ***aššš=am=i=(e)n=(i)=tta*** can be translated: 'May he/she (a *numen*) wash / cleanse me !' or 'May it (the bath-tub) wash / cleanse me !'. This sort of meaning of an object may seem peculiar in our view, but anthroponyms and even toponyms were sometimes built in the same way. Compare my interpretation of Linear B ***da-pu₂-ri-to-jo*** (KN Gg(1) 702, 2) ***δαβυρίνθοιο***, gen. sg. of ***δαβύρινθος***. … See Part I, sub *Appendices*.

Ἀσϝίᾱ, interpretation of Linear B ***a-si-wi-ja*** (PY Fr 1206) corresponding with ***Aššuwa*** in Hittite texts; ***a-si-wi-ja*** (PY Fr 1206), ***Ἀσϝίᾱ***, follows *po-ti-ni-ja*, *Πότνια Ἀσϝίᾱ* 'Asian Mistress' from the ethnic *Ἄσϝιος*, or *Πότνια Ἀσϝίᾱς* 'Mistress of Asia' from the toponym ***Ἀσϝίᾱ***, cf. C.J. Ruijgh, *EGM*, §156: "Le fait que la voyelle initiale de *Ἀσίᾱ* etc. est brève en attique, mais longue en ionien, invite à admettre une forme originale *Ἀσϝίᾱ*, qui répond en outre à *Aššuwa* dans les textes hittites." ***a-si-wi-jo*** (KN Df 1469; PY Cn 285, 12, *e.a.*; MY Au 653, 5; 657, 11) ***Ἄσϝιος***, ethnic and personal name derived from the ethnic. John Chadwick has identified the phonetic value of Linear B sign ****64*** as ***swi*** (cf. the forms ***a-*64-jo*** and ***a-*64-ja***). Linear A sign ***43***, equated with Linear B sign ****64***, probably has the same phonetic value, cf. Linear A ***ra-43-ti*** (HT 17.1; HT 19.1) that can be read as ***ra-swi-ti*** or ***la-swi-ti***. It is tempting to interpret the latter as the original form of the toponym ***Λασ(σ)ίθι = Lassithi < Laswithi*** (***-ss- < -sw-***) < (Hurrian) ****Laš=wi=tti*** 'I am / consist of stone', a very expressive name for a mountain-massif. ……. **80-81**, **895**

Ἄφᾱ, theonym attested in ***τἄφαι*** (< ***τᾷ Ἄφᾳ***), *IG* IV 1582. …… **389**

Ἀφαία, whose famous archaic temple was founded and found on the island of Aigina. *Ἀφαία* had, however, a Cretan origin, since she was identified with Cretan *Britomartis*, who was pursued by *Minos*, jumped into the sea and escaped to Aigina. Some glosses by Hesychius are interesting: ***βριτύ· γλυκύ· Κρῆτες*** "*βριτύ* is 'sweet' according to the Cretans", cf. Solinus XI, 8: *Britomarten quod sermone nostro sonat virginem dulcem*. Hesychius: *Βριτόμαρτις·ἐν Κρήτῃ ἡ Ἄρτεμις*. Hesychius: *Ἀφαία ἡ Δίκτυννα καὶ Ἄρτεμις*. M.P. Nilsson (*The Minoan-Mycenaean religion*, 509-514) discusses the relations between *Aphaia, Artamis* (in Doric), *Britomartis, Diktynna* and the Minoan-Mycenaean Mistress of Animals, ***Πότνια θηρῶν***, extensively. He also mentions the existence of a Cretan male type ****Πότνιος θηρῶν***, who has some resemblance with *Hermes*. In view of these traditions I should like to refer to the great resemblance between the stone vessels found at Prassà and the two stone vessels with Linear A inscriptions found by A. Lebessi in the Minoan peak sanctuary of Symi Viánnou (*Σύμη Βιάννου*) at the site of the later temple of Hermes and Aphrodite, cf. A. Lebessi, Ἱερὸν Ἑρμοῦ καὶ Ἀφροδίτης εἰς Σύμην Βιάννου, *Praktika 1973*, πίναξ 200 γ and πίναξ 201 β.

Linear B ***a-pa-ja[*** (KN E 843,5) can be interpreted as the theonym ***Ἀφαία***, cf. C.J. Ruijgh, *EGM*, § 197, n. 103. He also points to the possibility that ***[a ?]-pa-jo[*** (KN X7551), ***Ἀφαῖος*** and ***a-pa-ja[*** (KN E 843,5) may be interpreted as masculine and feminine ethnics, derived from ***Ἄφᾱ***, theonym serving as a toponym. The theonym ***Ἄφᾱ*** is attested in ***τἄφαι*** (< *τᾷ Ἄφᾳ*), *IG* IV 1582. For the usage of ***Ἄφᾱ*** as a toponym Ruijgh compares ***Ἀθήνη*** and Linear B ***e-ra*** = ***Ἥρᾱ*** and for ***Ἀφαίᾱ*** next to ***Ἄφᾱ*** the Athenian goddess ***Ἀθηναίη*** next to ***Ἀθήνη***.

At Pylos the Linear B personal name ***a-pa-je-u*** (PY Jn 845,5) ***Ἀφαιεύς*** 'celebrant of *Ἀφαίᾱ*' is attested. If the reading of Linear A ***a-pa-i-ja*** (PR Za 1b) by J. Raison - M. Pope is correct (instead of ***se-to-i-ja*** read by *GORILA*, which seems in my view the preferable reading), it can be identified with ***Apaia*** (wr. *A-pa-a-a*), a Hurrian masculine personal name, mentioned as the name of son and father of 5 persons at Nuzi, cf. I.J. Gelb, *NPN*, 22, s.v. *Apaia*; P.M. Purves, *NPN*, 202, s.v. *apa, apai* and *apaia.* The verbal root ***ab-/aw-*** is now interpreted as 'to save', cf. Th. Richter, *VHN*, 375-376, s.v. ***aw-*** II = ***ab-*** {*av-*} 'retten'. The form ***a-pa-i-ja*** (PR Za 1b), {*ab/w=ai-ja*}, if correct, may be a f*inal debitive* in ***-ai-*** + the hypocoristic suffix ***-ya***, 'May he/she (the god) save … !'. This might be a suitable name, if ***Ἀφαία*** was indeed the patron goddess of the island Aigina. **389**, **951**, **1002**

Ἀφαιεύς, interpretation of Linear B personal name ***a-pa-je-u*** (PY Jn 845,5), 'celebrant of ***Ἀφαίᾱ***'. …..…… **389**, **951**, **1002**

Ἀφαῖος, interpretation of Linear B **[*a* ?]-*pa-jo*[** (KN X7551) as masculine ethnic and of ***a-pa-ja*[** (KN E 843,5) as feminine ethnic, derived from ***Ἄφᾱ***, theonym serving as a toponym. The theonym ***Ἄφᾱ*** is attested in *τἄφαι* (< *τᾷ Ἄφᾳ*), *IG* IV 1582. For the usage of ***Ἄφᾱ*** as a toponym *Ἀθήνη* and *e-ra Ἥρᾱ* may be compared and for *Ἀφαίᾱ* beside *Ἄφᾱ* the Athenian goddess *Ἀθηναίη* beside *Ἀθήνη*. At Pylos the Linear B personal name ***a-pa-je-u*** (PY Jn 845,5) ***Ἀφαιεύς*** 'celebrant of *Ἀφαίᾱ*' is attested. …… **389**

Ἀφροδίτη. The etymology of this probably Pre-Greek theonym may be Hurrian.

P. Chantraine (*DELG*, 147-148) mentions that the theonym ***Ἀφροδίτη*** is not attested in Mycenaean Greek. In the Doric dialect of Crete it is ***Ἀφορδίτᾱ*** instead of ***Ἀφροδίτη***. The Greeks also know a hypocoristic form ***Ἀφρώ*** (Nic., *Al*. 406). Derivation from Greek ***ἀφρός*** 'écume' ['foam'] (Pl., *Cra*. 406 c. *διὰ τὴν τοῦ ἀφροῦ γένεσιν*) ['because of her birth from the foam (of the sea)'] is based on popular etymology. On the other hand it is likely that the name ***Ἀφρώ*** passed through Etruscan ***apru*** to Latin ***Aprīlis***.

Since many Pre-Greek names of gods and heroes appear to have a possible or probable Hurrian etymology, it is justifiable to examine, whether the name of ***Ἀφροδίτη*** may be explained likewise. Starting from the Cretan form of the name ***Ἀφορδίτᾱ*** an analysis as {*ab/w=u/or=d=i=tta*} is feasible, consisting of the verbal root ***ab/w-*** {*av-*} 'to save' + the Old Hurrian root-extension ***-o/ur-*** (meaning not clear, cf. I. Wegner, *Einführung*, 89) + the root-extension ***-t-*** /***d***/ (meaning not clear, cf. I. Wegner, *l.c.*) + theme-vowel ***-i-*** + enclitic personal pronoun 1st person singular ***-tta***, translation 'Save me !'. If this analysis is correct, the name has the character of an epithet, with the formation of a 'one-word' personal name. It may have arisen from an exclamation or prayer of an adorer.

E. Laroche (*GLH*, 33) mentions ***a-bar-ti-ta***, KUB XXXII 19 + III 38. - ***a-bar-ti-ša/ta***, KUB XLVII 29 Ro 2, 7. - ***a-bar-ti-iḫ-na***, *ibid*. Vo 8. He also mentions (*ibid*.), s.v. ***abari***: *dA-ba-ri*, KUB XLIII 51 Vo 3 (on attend *dAbati*). - Cf. aussi le nom de déesse ***Abara***, de Šamuḫa. According to Th. Richter (*BGH*, 35) the form †***a-bar-ti-iḫ-na*** KUB XLVII 29 Vs. 8, read by Laroche, is now obsolete and should be read as ***a-bar-ti-ta***. *Ibidem* he tells s.v. ***a-bar-ti-ša***, ***a-bar-ti-ta*** [Boğ.], that ***a-bar-ti-ta*** can (with D.R.M. Campbell, *Mood and modality in Hurrian* (diss. Univ. of Chicago) 2007, 339[171]) be nominal ***ab/vardi=da*** or verbal ***ab/v(=)ar(=)d=ed=a***, 'he will *ab/vard-*'. W.H. van Soldt (*Studies in the Akkadian of Ugarit. Dating and grammar*, *AOAT 40*, Kevelaer/Neukirchen-Vluyn 1991, 364[250]) has isolated the root ***aw-*** {*av-*} on the basis of *a-wu-ka(4)-ru-(u-)ši* at Ugarit, analysed as {*aw(?)=ugar=ož=i*} without translation, cf. Th. Richter, *BGH*, 33, s.v. ***aw-*** I [Boğ.; Mari; Tuttul]. M. Dijkstra (The myth of *apši* "the (sea)dragon" in the Hurrian tradition, *Ugarit-Forschungen 37 (2005)*, 320) writes: "In case of ***awum=***, one is tempted to relate it to ***am=um*** 'to reach somebody (with a message)' and ***amumi = ḫatreššar*** 'message'."

Th. Richter (*BGH*, 41) tells that in a quadrilingual comparison (Ugarit) Hurrian ***abuškumme*** is equated with Sumerian KAR, Akkadian ***šūzubu*** and Ugaritic ***pullaṭu*** 'to save', cf. J. Huehnergard, *Ugaritic vocabulary in syllabic transcription* (Harvard Semitic Studies 32), Atlanta 1987[1], 82f., 168; G. Wilhelm, Zum hurritischen Infinitiv in Nuzi, *SCCNH 2 (1987)*, 331[3]. The form ***abuškumme*** can be analysed as {*av=ušk=umme*} consisting of the root ***ab/w-*** + root-extension ***-ušk***- + the Hurrian infinitive-suffix ***-umme***.

This means that ***a-bar-ti-ta*** can be analysed as {*ab/v(=)ar(=)d=ed=a*}, consisting of the verbal root ***ab/w-*** {*av-*} 'to save' + the *factitive* or *iterative* root-extension ***-ar-*** (cf. I. Wegner, *Einführung*, 88) + the root-extension ***-t-*** /***d***/ (meaning not clear, cf. I. Wegner, *Einführung*, 89) + the suffix of the (transitive-ergative) future tense ***-e/id-*** (cf. I. Wegner, *Einführung*, 93: Table 4) + the marker of the subject of action 3rd person singular ***-a***, translation 'He/She (the God) will save (somebody) again and again'.

The fact that ^{d}***Abari***, ^{d}*a-ba-ri*, KUB XLIII 51 Vo 3, and ^{d}***Abara*** are theonyms is confirmed by Th. Richter, *BGH*, 35, s.v. (D.)***abari*** III [Boğ.; GN], and *VHN*, 376, s.v. ***Abari*** (GNf). He mentions that ***Abari*** may represent the Goddess ^{D}*a-ba/pa-(a-)r*^{o} occurring in Hittite sources, who appears in the circle of Ištar/Ša(w)uška of Šamuḫa and takes the second place in the hierarchy after her.

It is significant that the verbal root ***aw-*** is attested in the Linear A name ***a-we-||ni-ta*** (ZA 8.2-3) from Kato Zakro, that can probably be analysed as {*aw(=i)=en=i=tta*}, consisting of the root ***aw-*** + *jussive* indicator ***-i-*** that probably amalgamated with following ***-en-*** (cf. I. Wegner, *Einführung*, 103ff.) + indicator of the *jussive* 3rd person singular ***-en-*** (according to Wegner, *ibid.*) + thematic vowel ***-i-*** + the suffix of the enclitic personal pronoun 1st person singular ***-tta*** 'me'. Note that I. Wegner uses the term *jussive*, whereas e.g. E. Laroche (*GLH*, 28) used the terms 'potentiel' ['subjunctive expressing possibility'] and 'optatif' ['optative'] for the suffix ***-en-*** indicating the 3rd person singular of that mood. The translation of ***a-we-||ni-ta*** (ZA 8.2-3) will then be 'May he/she (the *numen*) save me'.

Another Linear A personal name with the root ***aw-*** is ***a-we-su*** (HT 118.3) from Hagia Triada. This name can be interpreted in different ways. It can be equated with Hurrian ***Awizzu*** (wr. *a-wi-iz-zu*) from Mari that may be considered an exact equivalent, analysis {*avišš(e)=u*[N.]}, lexicon *awizze* (→ *aw-* II), typology 3.1, translation 'Rettung' ['Rescue, Salvation, Saving']. [N.] refers to an Akkadianizing nominative in ***-u***.

Since a final consonant is not expressed in Linear A and B, Linear A ***a-we-su*** (HT 118.3) may not only represent ***Awešu***, but also ***Awešun***. Since ***-n*** is a very common abbreviation of ***-nna***, ***Awešun*** can then be analysed as {*av=e=ž=o=n(na)*} and be translated as 'He/she (*scil.* a *numen*) may save him/her (the child)'.

Another Linear A sequence with the root ***aw-*** is ***a-wa-pi*** (KN Zf 31) on a Late-Minoan Ia silver hairpin (HM 540) from Chamber Tomb IX, B 2 in the necropolis of Mavro Spilio east of the Palace of Minos at Knossos. The sequence can be analysed as {*aw-abi*} and be translated 'Save (the deceased person), oh necromantic sacrificial pit for summoning up the infernal deities'. This interpretation is significant, because the find of the silver hairpin in a chamber tomb emphasizes the meaning of Hurrian ***abi*** 'necromantic sacrificial pit for summoning up the infernal deities'. Linear A ***a-pi*** (KN Ze 16) on a door-jamb in a tholos tomb at Kephala, 1,5 km north of the Palace of Minos at Knossos, has the same meaning.

It is discussed in § 1 of *chapter 11: 'Religious' Linear A inscriptions*. The occurrence of ***a-pi*** (KN Ze 16) on a door-jamb in the Tholos Tomb at Kephala and of ***a-wa-pi*** (KN Zf 31) on a silver hairpin found in Chamber Tomb IX, B 2, at Mavro Spilio, can hardly be accidental. Moreover, Th. Richter (*VHN*, 61, 376) mentions s.v. ***abi*** '(Opfer)Grube' ['sacrificial pit'], cf. *BGH*, 37f.) the personal name ***Awiš-api*** (wr. *A-wi-iš-a-bi*) from Šušarrā, analysis {*av=i=ž-abi*}, typology 1.3.2.2, lexicon *aw-* II, *abi*, 'Die (Opfer)Grube möge (Jungen) retten' ['The sacrificial pit may save (the boy)'].

ΑΦΡΟΔΙΤΑ in the inscription on a Late-Hellenistic hydria:]Ι ΑΦΡΟΔΙΤΑ (probably to be read as [Ἑρμα κα]Ι ΑΦΡΟΔΙΤΑ) shows that Aphrodite, with whom many finds in the sanctuary of Symi Viannou are associated, was a companion of Hermes as a deity of fertility. During the first years of excavation of the site by A. Lebessi an inscription with a dedication to *Hermes Dendrites* 'Hermes of the Trees' from the 3rd century A.D. was found reading: Ἑρμα ΔΕΔΡΙΤΑ (sic) ΝΙΚΑΝΩΡ ΘΕΟΜΝΑΣΤΟΥ ΤΟΝ ΝΑΟΝ, proving that the temple was dedicated to Hermes Dendrites as a deity of vegetation.

A Linear A inscription on a libation table from Symi Viannou ***e-ni-wa*** **,** ***ki-ra*** 1 ←, read from right to left (SY Zb 7) can be analysed as {*en=i=wa*} {*kir=a*} 'One freedman / freed woman for the God'. The Peak Sanctuary of Symi Viannou is unique in Crete, but also in the whole of Greece, because the site, known as *Krya Vrysi* 'icecold spring' on 1200 m. above sea level, shows an uninterrupted continuity of the sanctuary from Minoan IIIB to the 3rd century A.D. ……..…….. **213**, **366**, **864-865**

→ See Linear A ***a-pa-ra-ne*** **,** (HT 96a.1-2) and ***a-pa-ra-ne*** **,** (HT 96b.1) Hagia Triada.

→ See Linear A ***a-pa-ru***[or possibly ***a-pa-re***[(?) (AK 1a.5) from Arkhanes.

→ See Linear A ***a-we-su*** (HT 118.3) from Hagia Triada.

Ἀχαιϝίᾱ 'region of the Achaeans' is a Pre-Greek toponym, derived from the ethnic ***Ἀχαιϝός***, represented by Linear B ***a-ka-wo*** (KN X 738), ethnic used as a personal name. ***Ἀχαιός*** is later attested as a personal name, cf. F. Bechtel, *Die historischen Personennamen des Griechischen*, 537. C.J. Ruijgh (*EGM*, § 154, n. 420) has explained that it appears more likely that ***Ἀχαιϝίᾱ*** in the Knossos Linear B text reflects a Cretan town than the entire land of the Achaeans, because ***Ἀχαίᾱ*** (< * ***Ἀχαιΐᾱ***, cf. Att. ***Ἀχᾱΐᾱ***) is attested as a name of a town in Crete (*Scholion* to Apollonius Rhodius 4, 175).

Since ***Aḫḫiyawa*** in the Hittite cuneiform texts is considered equivalent to Mycenaean ***Ἀχαιϝίᾱ***, we may conclude that the voiceless velar fricative ***-ḫḫ-*** in the cuneiform syllabary (***-ḫ-*** in the alphabetic cuneiform of Ugarit) was rendered into ***-k-*** in Linear A and B as is likely, because in Linear B ***a-ka-wi-ja-de*** (KN C 914), accusative of ***Ἀχαιϝίᾱ*** + the directive suffix ***-δε***, the ***k-*** sign is rendered into ***-ḫḫ-*** in ***Aḫḫiyawa***. …… **672-673**

Ἀχαιϝίᾱνδε (KN C 914), accusative of *Ἀχαιϝίᾱ* (with the directive suffix *-δε*) = Linear B ***a-ka-wi-ja-de*** (KN C 914). The equation of Hittite *Aḫḫiyawā* with Mycenaean *a-ka-wi-ja-* (note the metathesis of the Hittite as compared to the Greek form) provides information on correspondence between the Greek aspirate /***k***^{h}/ (written as **χ**) and the Hittite voiceless fricative ***-ḫḫ-***. The toponym *Ἀχαιϝίᾱ* is probably derived from the ethnic *Ἀχαιϝός*. Since the tablet from Knossos registers OVIS^{m} 50 and CAP^{m} 50, it seems hardly conceivable that the scribe had '*the land of the Achaeans*' in mind. Fortunately C.J. Ruijgh (*EGM*, § 154, n. 420) has found that the Scholion on Apollonius Rhodius (4, 175) mentions a town in Crete called *Ἀχαίᾱ* (< *Ἀχαιΐᾱ*, cf. Att. *Ἀχαίᾱ*). Tablets of the same series, joined by J.-P. Olivier, offer other toponymes followed by *-δε*, e.g. KN C 5753 + 7046 + [X] 7630: ***ko-no-so-de*** = ***Κνωσόνδε***. …… **56**, **346**, **672**, **871**

Ἀχαιϝός (singular) and ***Ἀχαιϝοί*** (plural). The Greeks inherited the ethnics ***Ἀχαιϝός*** and ***Ἀχαιϝοί*** probably from a non-Indo-European substrate language. The ethnic ***Ἀχαιϝός***, represented by Linear B ***a-ka-wo*** (KN X 738) is used as a personal name. ***Ἀχαιός*** is later attested as a personal name, cf. F. Bechtel, *Die historischen Personennamen des Griechischen*, 537. …… **56**, **346**, **671-672**, **871**, **959**

Βριτόμαρτις, Cretan *Britomartis* (= *Ἀφαία* = *Ἄρτεμις*), who was pursued by *Minos*, jumped into the sea and escaped to Aigina. Some glosses by Hesychius such as *βριτύ· γλυκύ· Κρήτες* are interesting. Cf. Solinus XI, 8: *Britomarten quod sermone nostro sonat virginem dulcem*. Hesychius: *Βριτόμαρτις·ἐν Κρήτῃ ἡ Ἄρτεμις*. Hesychius: *Ἀφαία ἡ Δίκτυννα καὶ Ἄρτεμις*.

M.P. Nilsson (*The Minoan-Mycenaean religion*, 509-514) discusses the relations between *Aphaia, Artamis* (in Doric), *Britomartis, Diktynna* and the Minoan-Mycenaean Mistress of Animals, ***Πότνια θηρῶν***, extensively. …… **389**

βριτύ· γλυκύ· Κρήτες (Hesychius), "***βριτύ*** is 'sweet' according to the Cretans." …. **389**

Γαῖα and ***γῆ*** 'Earth'. It sometimes happens that a Hurrian theonym as such is used as a personal name as is the case with ***Šimika*** (wr. *Ši-mi-qa, Ši-mi-ga*) at Nuzi, cf. I.J. Gelb, *NPN*, 134. In theory Linear A ***ka+ja*** (HT 24b.2) from Hagia Triada can also be interpreted as the Hurrian personal name ***Kaia*** (wr. *Qa-a-a*, *Ka-a-a*, *Ga-a-a*) at Nuzi, cf. I.J. Gelb, *NPN*, 77; P.M. Purves, *NPN*, 222. E. Laroche (*GLH*, 134) calls ***kai-*** 'terme d'onomastique théophore' ['theophorous onomastic term'] and refers to *NPN* 222.

Compare Th. Richter (*BGH*, 179) for the root ***ka-*** and Linear A ***ka-i-ro*** (ZA 8.6) from Kato Zakro, that I identify as the Hurrian personal name ***Kaillu*** (wr. *Qa-i-el-lu, Ga-i-el-lu, Qa-i-il-lu, Ka-i-il-lu, Qa-i-lu*) from Nuzi, cf. P.M. Purves, *NPN*, 222.

P. Chantraine, *DELG*, 219, s.v. ***γῆ***: "Ni *γῆ* ni *γαῖα* n'ont d'étymologie établie. On a supposé que *γαῖα* était une contamination de *γῆ* avec *αἶα* (voir ce mot) et *μαῖα*. Simple hypothèse liée à la notion de la 'terre mère'." ["Neither *γῆ* nor *γαῖα* have an established etymology. One has supposed that *γαῖα* was a contamination of *γῆ* with *αἶα* (see that word) and *μαῖα*. Simple hypothesis connected with the notion of 'Mother Earth'."]

Certainly many Hurrian personal names are theophorous. So one may wonder whether the Hurrian personal name ***Kaia*** at Nuzi might also be derived from a theonym.

The ligature ***si+me-ki*** TAL 1 JE (HT 24b.1) takes the same position as ***ka+ja*** TAL 1 (HT 24b.2). They are either two theonyms or two theonyms used as personal names. The high value (weighed in *talents*), attributed to both, seems to tip the scales in favour of two theonyms. So we may conclude that we are dealing with a sacrifice of 1 *talent and fractions* (JE) *of a talent* to ***si+me-ki*** = the Hurrian Sungod ***^{d}Ši-me-ki, ^{d}Ši-mi-gi-(ni)*** and 1 *talent* to ***ka+ja*** = (probably divine) Hurrian ***Kaia*** = the Minoan-Hurrian predecessor of Goddess ***Γαῖα*** 'Earth'. Unfortunately the left top corner of tablet HT 24b, which may have contained another theonym (?), is broken off. There is only a small trace of a sign/signs or a ligature visible in the top left corner of HT 24.b, but the ideogram TAL 1 JE (HT 24b.1) following this trace is clearly visible. There are in fact probably three theonyms, the first (largely invisible) followed by TAL 1 JE, the second ***si+me-ki*** TAL 1 JE and the third ***ka+ja*** TAL 1. One can speculate about the missing first theonym: Is it ***Kušuḫ***, the God of the Moon, or ***Tešub*** himself, the God of the clouds. In Asia Minor ***Šimegi*** follows ***Kušuḫ***, represented as a god at Yazılıkaya (cf. H. Otten, *Anatolia 4 (1959)*, 27, n. 4). I do not believe that Linear A ***si+me-ki*** (HT 24b.1) and ***ka+ja*** (HT 24b.2) are really personal names on HT 24b. Is it merely accidental that Menelaos proposes that the Trojans bring two lambs, a white ram for the Sungod ***Ἠέλιος***, a black ewe for the Goddess ***Γῆ***, and that the Greeks bring another lamb for ***Ζεύς*** (*Iliad* Γ 103-104) in order to sacrifice and swear an oath that a combat between Alexandros and himself will bring the Trojan war to an end ? **573-574**, **866**, **900**

Γαύδος, the island *Gaudos* along the south coast of Crete, south of the Gorges of Samaria.

The heading of HT 13.1 provides de Linear A sequence ***ka-u-de-ta***, which very much reminds of Linear B ***ka-u-da*** on a tablet from Knossos:

KN Fs 21,1: *ka-u-da* , HORD , T 1 [
KN Fs 21,2: FAR V 1 VIN V 1 [

This text bears a strong resemblance with another tablet from Knossos:

KN Fs 19,1: *e-ti-wa* , HORD T 1 FIC V 3
KN Fs 19,2: FAR V 1 OLE Z 2 VIN V 1
Verso: *ME + RI* Z 1

Since Linear B ***e-ti-wa-ja*** in the combination ***pa-i-ti-jo e-ti-wa-ja-qe*** (KN Od 681a.1), ***Φαίστιοι*** and ***Ἠτιϝαῖαι***, must be considered plural feminine of the ethnic ***Ἠτιϝαῖος*** derived from the toponym ***e-ti-wa*** (KN Fs 19,1) = ***Ἠτίϝᾱ***, cf. *Ἦτις / Ἤτεια*, name of a town in Crete according to Pape-Benzeler (cf. C.J. Ruijgh, *EGM*, § 195), there is a good chance that ***ka-u-da*** (KN Fs 21,1) is also a toponym in Linear B.

Exactly for this reason M.V. Cremona, D. Marcozzi, E. Scafa and M. Sinatra (*La Toponomastica Cretese nei Documenti in Lineare B di Cnosso,* Incunabula Graeca 69, Rome 1978, 36) have included ***ka-u-da*** in their corpus of Cretan Linear B toponyms. The authors have been able to confirm that toponyms in Linear B are often followed by ideograms of grain or barley, GRA and HORD, and other commodities. This is also the case with Linear A ***ka-u-de-ta*** (HT 13.1), which is followed by the wine ideogram VINa. The toponym can probably be identified with the name of the island ***Γαύδος*** (*Gaudos*) Today the island can be reached by boat from Chora Sfakion and Palaiochora. There is also a smaller island ***Gaudopoula*** closer to the Cretan coast. In Minoan times these twin islands could be reached by boat from ***Kommos*** (excavated between 1976 and 2005 by Joseph and Maria Shaw, University of Toronto), harbour of Phaistos and Hagia Triada.

Linear A ***ka-u|-do-ni*** (HT 26b.2-3) 'man of *Gauda*' or '*Gaudian*' is apparently a form with the suffix of the so-called Hurrian singular definite article ***-ne/-ni*** built on the root of the (Linear B) toponym ***ka-u-da*** (KN Fs 21,1). At the same time ***-ne/-ni*** is suspected of having a relational function forming an ethnic, cf. I. Wegner, *Einführung*, 55, s.v. ***-ni***: KUR ***mašriâ=ni-*** 'the Egyptian land' (Mit. II 69); and s.v. ***-nni***: KUR ***mašria=nni-*** 'the Egyptian land' (Mit. II 71) or KUR ***mašria=n(i)=ne***. The Linear A ethnic ***ka-u|-do-ni*** (HT 26b.2-3) may have been used as a personal name.

Orthographic conventions of Linear A and B allow two possible interpretions for the final syllable ***-ta*** in ***ka-u-de-ta***. Since ***-š-*** preceding ***-t-*** is not expressed in Linear A, it may be either the Hurrian *plural directive* suffix ***-šta*** 'to' or *plural ablative* suffix ***-štan*** 'from' (cf. E. Laroche, *GLH*, 26), now analysed as the *plural* suffix ***-aš-*** + the *directive* suffix ***-ta*** 'to' or the *plural* suffix ***-aš-*** + the *ablative* suffix ***-tan*** 'from' (cf. I. Wegner, *Einführung*, 65-66, sub 2.2.4. Position 4: the case-suffixes). So we encounter the same orthographic problem as with the singular *directive* ***-da*** or the singular *ablative* ***-dan*** in Linear A ***da-we-da***, ***i-da-da*** and ***pa-ta-da***. The scribe knew whether he meant a directive or ablative, but we cannot distinguish these cases, since Linear A did not express final consonants. The plural suffix can be explained by the fact that two islands were involved.

Since the toponym ***ka-u-da*** (KN Fs 21,1) occurs in Linear B, it is likely that the Linear A name reflected in ***ka-u-de-ta*** (HT 13.1) was ***ka-u-da*** as well, phonologically probably /***Gauda***/ with voiced palatal as in the modern Greek name ***Γαύδος*** / *Gaudos.*

It may be a matter of pattern (possibly caused by initial accent) that the final vowel ***-a*** in ***da-wa*** and ***ka-u-da*** changed into ***-e-*** before the following suffixes ***-da(n)*** (see ***da-we-da***) and ***-(a)š=ta(n)*** (see ***ka-u-de-ta***), respectively. ……. **777-778**, **782**, **784**

δαβύρινθος is allegedly a Minoan-Mycenaean doublet of the Pre-Greek term ***λαβύρινθος***.

Linear B ***da-pu$_2$-ri-to-jo*** (KN Gg(1) 702, 2), ***δαβυρίνθοιο***, represents the genitive singular of ***δαβύρινθος***. The ***d/l*** alternation in this term (due to a phoneme that sounded peculiar in Greek ears) points to a loan-word in Mycenaean Greek, probably from Minoan. It is significant that Linear B has preserved the orthography ***da-pu$_2$-ri-to-jo***, not ****r/la-pu$_2$-ri-to-jo***, so that we may conclude that the original root was ***δαβ-***, not ***λαβ-***.

Many examples like ***da-ku-se-ne*** and ***da-ku-na*** in Linear A prove that initial dentals could be voiced in the Minoan-Hurrian dialect. Apart from the ***d/l*** alternation the form ***da-pu₂-ri-to-jo*** seems also to show a ***β***/***φ*** alternation. With regard to this phenomenon the views of M. Lejeune and F.M.J. Waanders are interesting.

M. Lejeune, 'Doublets et complexes', *Proceedings of the Cambridge Colloquium on Mycenaean Studies* (ed. L.R. Palmer - J. Chadwick), Cambridge 1966, 140: "Dans certains emprunts 'préhelléniques' du grec, il a pu se produire des flottements entre (douces) aspirées et (douces) sonores; un exemple en est peut-être fourni par confrontation de la glose d'Hésychius ***ὅθρυν · Κρῆτες τὸ ὄρος*** et du toponyme ***oduru*** de nos tablettes cnossiennes; s'il s'agit du même mot (ce qui est plausible, mais non démontrable), ce flottement entre ***δ*** et ***θ*** serait du même ordre que le flottement entre ***β*** et ***φ*** impliqué par une lecture ****Δαφύρινθος*** où ***pu₂*** (comme dans tous les autres examples contrôlables) vaudrait ***φυ***." According to F.M.J. Waanders ***βυ***/***φυ*** may be derived from Linear A ***pu₂*** that may have represented ***bhu***. The value ***bhu*** seems a good starting point for a development to either ***βυ*** or ***φυ***.

With regard to ***-νθ-*** in ***δαβύρινθος*** it is significant that there is also evidence that Hurrian voiceless dentals may (in some cases) have sounded as aspirate voiceless dentals in Greek ears, if my Hurrian etymologies of ***Ἀθάνᾱ*** (attested in Mycenaean and non-Ionic dialects), ***Ἀθήνη*** in epos and Ionic, and of ***Θησεύς***, interpretation of Linear B ***te-se-u*** (PY En 74, 5; PY Eo 276, 4: ***te-o-jo do-e-ro*** 'servant of a god'), are correct.

Taking this into account I may propose a Hurrian etymology for ***δαβύρινθος***, of which only the ending ***-ος*** is Greek: ***d/tab=ur=i/e=(e)n=(i)=tta***, consisting of the verbal root ***d/tab-*** (cf. Th. Richter, *BGH*, 438-440, s.v. ***tab/w-*** I '(Metall) gießen' ['to pour (metal) (into a mould), to cast (metal)'] + the Old Hurrian root-extension ***-ur-*** (cf. I. Wegner, *Einführung*, 89) + the marker of the *jussive* ***-i-*** + the marker of the subject 3rd person sing. of the *jussive* ***-en-*** > ***-(e)n-*** + syncope of theme-vowel (***-i-***) + the enclitic personal pronoun 1st person singular ***-tta*** (cf. I. Wegner, *Einführung*, 103: Table 9: *The order of suffixes of the positive jussive*), translation 'He/She (a *numen*) may cast me'.

If *Dabyrinthos/Labyrinthos* was indeed the epithet of the Minoan-Mycenaean palace of Knossos and if this epithet was based on Minoan-Hurrian ***d/tab=ur=i/e=(e)n=(i)=tta***, we may be surprised about the character of Minoan-Hurrian names, whether toponyms or anthroponyms, but that is exactly the way Hurrian names were formed. Compare, for instance, the Linear A and B toponym ***su-ki-ri-ta*** that I analyse as {*šugr=i=tta*} 'Bless me (oh *numen*) !' (with the Linear B ethnic ***su-ki-ri-ta-jo***), and the Linear A personal name ***ta-we-na*** (HT 10b.1-2), {*tav=e/i=nna*} 'Cast him/her (the child) (oh *numen*) !', cf. ***ᶠTawenna*** (wr. *ᶠTa-we-en-na*) at Ašnakkum and Mari, analysis {*tav=i=nna*} 'Gieße es (Mädchen) (oh *Numen*) !' ['Cast her (the girl) (oh *numen*) !'], cf. Th. Richter, *VHN*, 297.

In the past one often referred to the term ***λάβρυς*** 'double axe' to explain the etymology of ***λαβύρινθος***. The ***λάβρυς*** may well have belonged to the *regalia* of Minoan kings, visible in many Minoan palaces, see also the gold and silver double axes with Linear A ***i-da-ma-te*** (AR Zf 1; AR Zf 2) from Arkalokhori. Liddell & Scott, *Greek-English Lexicon*, 1021, mention: ***λάβρυς*** = *πέλεκυς* 'axe', Lydian word, Plu. 2.302a.

I may add that fabrication of an axe was based on the process of casting the metal into a mould and although the word ****δάβρυς*** has not come down to us as a doublet of ***λάβρυς***, it seems justifiable to assume that ****δάβρυς*** was in fact the original term.

Compare for ***tab/w-*** I '(Metall) gießen' ['pouring out metal' or 'melting metal'] E. Neu, *Das Hurritische*: *eine altorientalische Sprache in neuem Licht*, Akademie der Wissenschaften und der Literatur Mainz, 1988/3, 27[83]. He also assumes (*ibidem*, 36) an original spirant second consonant following the labial stop of the root ***tab***, cf. Th. Richter's ***tapš-*** II 'to pour' (*BGH*, 2012, 443: Aus der Bilingue heraus deutbare Wurzel für 'gießen').

This may suggest a possible relation with Linear A ***]ta-pi-si-di*** (HT 4.3), see the *lemma* on Linear A ***]ta-pi-si-di***. M. Salvini - I. Wegner: *Die mythologischen Texte*, Corpus der hurritischen Sprachdenkmäler. I. Abteilung: Die Texte aus Boğazköy, Band I/6, Rome 2004, 182; I. Wegner, *Einführung in die hurritische Sprache*, Wiesbaden 2007[2], 283.

Compare for '(Metall) schmelzen': E. Neu, *Das hurritische Epos der Freilassung. I: Untersuchungen zu einem hurritisch-hethitischen Textensemble aus Ḫattuša* (Studien zu den Boğazköy Texten 32), Wiesbaden 1996, 144. See also Th. Richter, *BGH*, 2012, 438-440, s.v. ***tab/w-*** I. I. Wegner (*Einführung*, 21) mentions that the oldest written evidence for presence of Hurrians and Hurrian in the Near East dates from the Akkade-period (2230-2090 B.C. according to the short chronology; 60 year may be added for the long chronology). But presence of Hurrian in North-Iraq, North-Syria and East-Anatolia may be much earlier, since Old-Sumerian TABIRA/TIBIRA 'Kupferarbeiter' ['copperworker, coppersmith'] can plausibly be derived from Hurrian ***tabiri***, consisting of the root ***tab/v-*** 'gießen' ['to cast, to pour out'] **+ *i* + *ri***, an agens-orientated resultative participle 'der der gießt' ['someone who casts (metal)'], cf. (*ibid.*, 55, 283) ***tabrinni*** < {*tab=(i)=r(i)=i=nni*} consisting of this resultative participle + the suffixes =***i=nni*** designating professions, 'Schmied, Metall-Gießer, Kupferschmied' ['(copper)smith'], cf. the verbal form in ***=o=m*** (*ibidem*, 128, 216, 218), ***tab=ašt=o=m***, 3rd person singular transitive in ergative construction (Old Hurrian) ['he casts (metal)', attested in the third parable 'Der Becher und sein Schmied' ['The goblet and its smith'] in the Hurrian-Hittite bilingual ***Kirenze***, KBo 32: 14, 42-43: *ka-a-zi ta-bal-li-iš ḫe-e-lu-u-wa$_a$ | ta-wa$_a$-aš-tu-um* = (analysis) *kazi tab=li=ne=š > tabal=le=š ḫelov(i)=a* (essive) or *ḫel=o=va* (dative) *tab=ašt=o=m*
'Einen Becher goß ein (Metall)gießer als Ruhmestat / zum Ruhme'
['A (metal)smith / (copper)smith casts a goblet as an act of fame / to glory'].

I. Wegner, *Einführung*, 216-221, 270, interprets ***pa=i=ri*** as a resultative participle 'einer der gebaut hat; Baumeister' ['someone who has built; architect'], belonging to the verbal root ***pa-*** 'to build'. She compares ***pa=i=ri*** morphologically with ***ta-bi-ri-i-ma*** in the Hurrian-Hittite bilingual ***Kirenze***, KBo 32: 14 Vs. I 46 (cf. E. Neu, *StBoT 32*, 80), in the 3rd parable: *The goblet (chalice, cup) and its smith* (KBo 32: 14 Vs. I 42-59) and analyses the form ***tab=i=ri*** as verbal root ***tab/v-*** 'to cast (metal)' + ***i*** (vowel indicating transitivity) + ***ri/e*** (participial suffix) 'der gegossen hat = Gießer = Schmied' ['the one who has cast (metal); smith']. The forms in ***=i=ri/e*** are 'agensorientierte resultative Partizipien' ['agent oriented resultative participles'].

The ergative form ***ta-bal-li-iš*** (same parable, lines 42 and 55) is used synonymously to ***tab=i=ri*** (line 46). I. Wegner analyses it as verbal root ***tab/v-*** 'to cast (metal)' + ***li*** (formative indicating professional designations) following the root athemetically (***tab+li***) + the so-called singular article ***ne*** (***tab+li+ne***). In case of usage of the article *anaptyxis* (development of vowel between two consonants) occurs to make pronunciation easier, as well as *apocope* (disappearance of the final vowel) > ***tabal(i)=ne***, so that the ***n*** of the article assimilates to the ***l*** of the stem > ***tabal=le*** '(Metall)gießer = Schmied' ['someone who casts (metal) = smith'] + ergative suffix ***š***. In the Hittite text it corresponds with the Sumerogram ^{LÚ}SIMUG 'copper-smith'. Morphologically it can be compared with ***kebella*** 'the hunters', analysis ***kebel=la*** < ****keb+li+na***.

Etymologically there may be more connections. The title of the Hittite king ***t/labarna*** may perhaps be compared, cf. Th. Richter, *BGH*, 441, s.v. *ta-wa$_a$-ar-*[*na*], [*ta-wa$_a$*]*-ar-na* [Lw/Hu] (cf. Soysal 2005, 193; A. Kammenhuber, 1976a, 175[235]) and possibly the title of the Hittite queen ***tawananna***, cf. Th. Richter, *BGH*, 440, s.v. *ta-wa$_a$-a*[*n?...*] [Lw/Hu] (cf. Soysal 2005, 193; A. Kammenhuber, 1976a, 175[235]). Presence of the root ***tab/w-*** in these titles, but also the alternation of dental and liquid ***l*** seem to recall ***δαβύρινθος*** / ***λαβύρινθος***.

Possibly the titles are derived from ***λάβρυς***, *labrys* < ***δάβρυς**, **dabrys* 'double axe' belonging to the *regalia* of king and queen or one might think of the 'purple (< colour of cast bronze)' of the royal robes or gowns on the basis of the term ***tabarru*** [Lw/A since Old Bab.; Nuzi] (Th. Richter, *BGH*, 440-441), 'purple wool' (Zaccagnini 1977a, 174; no translation E. Laroche, *GLH*, 247 [*tabarriwa, tabarru*]; '(la) pourpre' » Akkadian ***ṭabrum*** 'tissu rouge' (Durand 1983, 428f.[1]), also 'red dye', etc.

If the ***λάβρυς***, *labrys* < ***δάβρυς**, **dabrys* belonged to the *regalia* of the Hittite kings, it is in my view conceivable that ***t/labarna*** and ***tawananna*** contain the same root ***t/dab-***, so that the meaning 'ruler' of ***t/labarna*** is in fact secondary. The meaning of the Hittite verb ***tapar-*** [Ia] 'to reign, rule' and Hittite ***tapariya-*** [Ic] 'rule, reign' (Th van den Hout, *The elements of Hittite*, 197) may then also be secondary.

E.J. Furnée (*Die wichtigsten konsonantischen Erscheinungen des Vorgriechischen*, The Hague - Paris, 1972, 397-398) may apparently have thought along the same lines (I translate his German text): "The name of the *labyrinth*, ***λαβύρινθος***, probably Mycenaean ***da-pu$_2$-ri-to-***, belongs with its ***νθ***-suffix and its ***d/l*** alternation entirely in the Pre-Indo-European sphere. It may well be connected with Lydian ***λάβρυς*** 'axe', a word that also seems to occur as a Pre-Indo-European 'Wanderwort' outside Anatolia, cf. (with a corresponding alternation of the initial consonant) Armenian ***tapar***, New-Persian ***tabar***, Russian ***topór*** 'axe'. Could Hittite ***tapar-*** 'to rule', Proto-Hattic and Palaic ***tabarna***, Hittite ***labarna-*** 'ruler' (of Cappadocian origin according to Kronasser, *Etym*. 1, 61 ff.) then also be cognate, since the axe is the symbol of royal authority ? Then ***λαβύρινθος*** could perhaps preferably be interpreted as 'house of the king, ruler', not as 'house of the double axe'." We must realize that at the time of E.J. Furnée's publication the meaning of Hurrian ***tab/w-*** 'to pour, to cast (metal)' was not yet known. In my view all terms appear to have directly or indirectly something to do with the Hurrian root ***d/tab/w-*** 'to cast (metal, bronze)' and this Hurrian verb is the primary source, from which all other meanings are derived. See Part I, sub *Appendices*. …… **690**, **991**, **997**, **1011**

δαβυρίνθοιο, interpretation of Linear B ***da-pu$_2$-ri-to-jo*** (KN Gg(1) 702, 2), genitive sing. of ***δαβύρινθος***, probably a doublet of the Pre-Greek term ***λαβύρινθος***.

If the hypothesis that ***a-ta-na-po-ti-ni-ja*** (KN V 52+52bis+[X] 8285 Olivier), dative ***Ἀθάνᾳ Ποτνίᾳ*** '(for) the Mistress *Athena*, and ***da-pu$_2$-ri-to-jo po-ti-ni-ja*** (KN Gg 702,2), ***δαβυρίνθοιο Ποτνίᾳ*** 'for the Mistress of the labyrinth', are the same, is correct, the goddess *Ἀθάνᾱ* was the deity protecting the labyrinth, which may have been the name or epithet of the palace. She may have been the Minoan deity portrayed as the 'goddess with the snakes'.
…… **690**, **991**, **997**, **1011**

[……...]

Ἑρμῆς < ***Ἑρμάᾶς***, cf. Linear B ***e-ma-a$_2$*** (PY Tn 316 r 7: dat.), theonym of which the ending is obviously non-Greek, cf. C.J. Ruijgh, *EGM*, § 167, n. 482. It is now likely that ***Ἑρμῆς*** < ***Ἑρμάᾶς*** can be derived from Hurrian ***ermi/irmi***, ***erwi/irwi***, ***ewri/ibri*** 'Lord'. ***ermi/irmi*** occurs in several Linear A personal names.

Linear A ***wa-du-ni-mi*** (HT 6b.1; HT 85b.4-5) from Hagia Triada can now definitely be identified as a Hurrian personal name. The personal name ***Watip***-LUGAL (wr. *Wa-ti-ip*-LUGAL), transliterated as ***Watip-šarri*** (wr. *Wa-ti-ip-šarri*) by I.J. Gelb (*NPN*, 173), is the name of a *judge* at Nuzi, which is significant, since the nominal root ***pand-/wand-*** (var. ***pend-/wend-***) means 'right' and metaphorically 'good, just, favourable', the intransitive verbal root 'to be righteous, just, good' and the transitive verbal root 'to make good, to do justice to someone, to treat someone in a fair way'.

Since at Tall Brak the personal name ***Pa-ti-ip-***[LUGA]L^{ri} is attested (Brak 1, p. 41, nr. 3: 1) that can be transliterated as ***Patip-šarri*** [LUGAL certainly equals Hurrian ***šarri*** because of the addition of ^{ri} to Sumerogram LUGAL], ***Watip-šarri*** and ***Patip-šarri*** can be analysed as {*fad=i=b-šarri*}, that can probably be identified with ***Pantip-šarri*** and ***Wantip-šarri***, analysis {*fand=i=b-šarri*}, either as a result of *apocope* of ***-n-*** before ***-d-*** or as a result of assimilation of ***-nd- > -d-***. Since all evidence points to identification of the roots ***pad-/wad-*** with ***pand-/wand-***, both ***Pa(n)tip-šarri*** and ***Wa(n)tip-šarri*** can be translated as 'The King of Gods makes/made (the child) good, just'. Cf. also ***We-en-di-ip-***LUGAL at Emar (Pruzsinszky 2003/2, 666) and ***Be-en-ti-ip-***LUGAL at Ḫattuša (E. Laroche, *NH*, 144, n° 1005). ***Watip-šarri*** and ***Patip-šarri***, analysis {*fad=i=b-šarri*} as well as ***Pantip-šarri*** and ***Wantip-šarri***, analysis {*fand=i=b-šarri*} have led me to the identification of Linear A ***wa-du-ni-mi*** (HT 6b.1; HT 85b.4-5) as a Hurrian personal name. Long ago Linear A ***wa-du-ni-mi*** has been interpreted as ***Badunimi*** from Lycia by P. Meriggi, *Primi Elementi di Minoico A (Minos Suppl.)*, 65. The name *Badunimi* occurs twice on the south side of the enormous Xanthos stele (*Tituli Asiae Minoris I: Tituli Lyciae lingua Lycia conscripti,* Wien 1901, 42, no. 44a, lines 39 and 40; cf. J. Friedrich, *Kleinasiatische Sprachdenkmäler*, Berlin 1932, 64, no. 44a, lines 39-40.).

However, ***Badunimi*** and the element ***pa-du / wa-du-*** are not mentioned by Ph.H.J. Houwink ten Cate, *The Luwian populations groups of Lycia and Cilicia Aspera during the Hellenistic period*, Leiden 1965, J. Sundwall, *Die einheimischen Namen der Lykier nebst einem Verzeichnisse kleinasiatischer Namenstämme*, Klio, Beiträge zur Alten Geschichte, Elftes Beiheft, Leipzig 1913, and L. Zgusta, *Kleinasiatische Personennamen*, Prague 1964. Although *Badunimi* may have been found in Lycian context in the first millennium B.C., it is probably of Hurrian origin. Linear A ***wa-du-ni-mi*** can be analysed as {*wad=u=n-irmi*} or {*wand=u=n-irmi*}, consisting of the Hurrian verbal root ***p/wad-*** or ***p/wand-*** + the marker of the Old Hurrian transitive past or perfect form ***-u-*** + the enclitic personal pronoun 3rd person singular ***-n(na)*** marking the object of the transitive verb + the theophorous element ***irmi*** / ***ermi*** (at Nippur and in Linear A) = ***erwi*** (at Nuzi) = ***ewri / ibri*** (elsewhere, Tušratta letter included) 'Lord', indicating the subject of the verb. Linear A ***wa-du-ni-mi*** can be translated as 'The Lord has made him/her [***-n(na)***] (the child) good'. In the Tušratta letter ***ewri / ibri*** can be used as title of a King (e.g. of Mitanni) or as an epithet of Tešub, cf. the *ergative* of the possessive 1st person plural ***eb-ri-iw-wa-šu-uš*** (Mit. IV 118) 'Our Lord'. In that passage King Tušratta addresses *Tešub* as ***^{d}Te-e-eš-šu-pa-aš*** (*ergative*) … ***eb-ri-iw-wa-šu-uš at-ta-iw-wa-šu-uš*** 'Tešub .. Our Lord, Our Father' (Mit. IV 118), cf. my discussion on Linear A ***a-ta-i-jo-wa-ja*** = Hurrian ****at-ta-(i)-iw-wa-(j)-aš*** 'Our Father', reconstructed *absolutive* (and *vocative*) on the analogy of the attested *absolutive* ***at-ta-a-ar-ti-iw-wa-aš^{meš}*** {*att(a)=ardi=iwwa=aš*} 'our ancestors, our grandfathers'.

Compare for the interpretation of the ***-n-*** in ***wa-du-ni-mi*** forms like ***Wantin-muša*** {*fand=i=n-muša*} 'Make him [*n(na)*] (the boy) good / just, oh *Muša* !' and ***Wantin-Ugur*** {*fand=i=n-Ugur*} 'Make him [*n(na)*] (the boy) good / just, oh *Ugur* !'. Thus Linear A ***wa-du-ni-mi*** {*fand=u=n(na)-irmi*} means 'Make him/her [*n(na)*] good / just, oh Lord !'. Compare (*supra*) ***Watip-šarri*** and ***Patip-šarri*** as well as ***Pantip-šarri*** and ***Wantip-šarri***.

Linear A]|***du-ne-mi*** 1 (HT 127a.2) occurs on a tablet from Hagia Triada, of which only the lower part is preserved in three parts. The lost preceding line may have contained a syllabic sign to complete the name, for instance, ***wa-***, ***u-*** or ***i-***, so that ****wa-***]|***du-ne-mi*** would be equivalent to ***wa-du-ni-mi***; or as second option: ****u-***]|***du-ne-mi***, analysis {*ud=u=n(na)-ermi*}, consisting of the root ***ud-*** 'to protect' + the marker ***-u-*** of the Old Hurrian transitive past tense + the suffix of the enclitic personal pronoun 3rd person singular ***-n(na)*** marking the object of the transitive verb + the theophorous element ***ermi*** / ***irmi*** 'Lord', translation 'The Lord protected him/her [*-n(na)*] (the child)'.

Or ***u-***]|***du-ne-mi***, {*ud=u=n(na)-ermi*}, can be the Old Hurrian *imperative* 'Protect him/her (the child), oh Lord !'; or ****i-***]|***du-ne-mi***, analysis {*id=u=n(na)-ermi*}, 'The Lord smashed him/her [-*n(na)*] (the deceased child)' or 'Hit/Smash him/her (the deceased child), oh Lord !', with Hurrian ***id-*** 'to hit, strike, smash'.

Linear A ***u-di-mi*** (HT 117a.4), {*ud=(e/i)-e/irmi*}, consisting of the root ***ud-*** 'to protect' + marker of *transitivity* ***-e/i-*** that contracted with the initial vowel of ***ermi / irmi / erwi / ewri / ibri*** 'Lord' (the *imperative* does not have its own marker), translation 'Protect (the child), oh Lord !'. It is almost identical with Linear A ***u***[.]***-de-mi*** (AK 4b.2-3) at Arkhanes, if no sign is missing between ***u***[(AK 4b.2) and]***-de-mi*** (AK 4b.3).

The assumption that Linear A ***ja-re-mi*** (HT 87.3) from Hagia Triada is a Hurrian personal name, is (apart from the linguistic analysis) a matter of interpretation of the context: it is the second sequence in a list of 7 (starting with ***pi-ta-ke-si***, see *supra*) that are followed by a numeral (each 1 unit) as is shown by the text of HT 87:

HT 87.1-2:	*79-tu-ne* , *ma-ka-ri-te* , *pi-ta-ke-si*					1
3:	*ja-re-mi*	1	*di-ki-se*			1
4:	*qe-su-pu*	1	*ku-ru-ku*			1
5:	*a-ra-96*	(1)	*a-tu*			1
6:	vacat					

Linear A ***ja-re-mi*** can be compared with the Hurrian personal name ***ia-ru-ḫé-pa***. According to Th. Richter (*BGH*, 74, s.v. ***iar-/ijar-*** [PN]) the verbal root ***iar-/ijar-*** (without translation) in ***ia-ru-ḫé-pa***, is used in a transitive way. No doubt he refers to the theme-vowel ***-u-*** that follows the root (cf. M. Popko, Eine "schwarze Tafel" aus Boğazköy (KUB LX 121), *AoF 18 (1991)*, 244; G. Wilhelm, Name, Namengebung. D. Bei den Hurritern, in: D.O. Edzard (ed.), *Reallexikon der Assyriologie und Vorderasiatischen Archäologie*, Berlin-New York, Band 9/1-2, 1998, 121-127, especially 123). As a result it can be analysed as {*iar/ijar=u-ḫé-pa*} 'Ḫebat (transitive verbal form)'.

On the analogy of this name and according to the orthographic conventions of Linear A and B, Linear A ***ja-re-mi*** can be analysed as {*iar/ijar=(i/o)-ermi*} 'The Lord (transitive verbal form)'. → See also Linear A ***ja+ru*** DD (HT 6a.3) from Hagia Triada.

The Linear A inscription ***te-we-mi*** (↓) (PS Zf 1) among the repoussé designs on a bronze tablet from the Dictaean Cave of Psykhro (discussed in chapter 11: *'Religious' Linear A inscriptions*) is probably not a personal name. It can be analysed as {*tew-ermi*}, 'speak, oh Lord !', consisting of ***ti-/te- / tiw-/tew-*** 'to speak, say words' + ***ermi*** = ***erwi/ewri*** 'Lord'. It may well represent the prayer of the dancing supplicant on the tablet.

Linear A ***u-re-wi*** (HT 25a.2) = Hurrian ***Ull(u)-erwi***, with vowel absorption and with the same (dialectical) metathesis of ***ewri > erwi*** as is found in the Hurrian personal names from Nuzi. Since dialects usually belong to a region or regions, it is in fact difficult to establish whether ***ipri/ewri*** is the oldest or the youngest of the two.

Th. Richter (*VHN* I, 326-329) mentions: ***Ullu*** (wr. *ul-lu*) at Šubat-Enlil / Šeḫna (Tell / Tall Leilān), analysis {*o/ull=o*}, typology 1.3.1.1.1, lexicon ***ull-***, 'Zerstöre (oh *Numen*) !' ['Destroy (oh *numen*) !']; *ú-ul-lu-* at Ḫattuša, *ul-lu(-ú)* at Nuzi; ***Ullu-ewri*** (wr. *ul-lu-ew-ri, ul-lu-ew-ru*) at Mari, analysis {*o/ull=o-evri*, *o/ull=o-evr(i)=u*} [Normally Hurrian personal names are in the absolutive, but the writing *ul-lu-ew-ru* shows the Akkadian nominative in ***-u***.], typology 1.3.1.1.1, lexicon ***ull-***, ***ewri*** 'Zerstöre, oh Herr !' ['Destroy, oh Lord !']. We see here that Linear A ***u-re-wi*** (HT 25a.2) one time offers the theophorous element ***-erwi*** instead of the more common form ***-ermi*** in Minoan-Hurrian.

The Linear A personal name ***i-mi-sa-ra*** (HT 27+HT 48a.3) from Hagia Triada also contains the theophorous element ***Irmi-*** 'Lord', though now as first onomastic element. It can be interpreted as the Hurrian personal name ****Irmi/Ermi-šarra*** 'The Lord is as the divine King', 'The Lord is as the King of Gods'.

This Linear A name is in fact almost equivalent to ***Erwi-šarri*** at Nuzi and to ***ibri-šarri***, ***ibri***(EN)-***šarri***(LUGAL), ***ibr/iwrḏr*** at Ugarit; ***ibri-šarri*** [AL 137] at Alalaḫ. Cf. also ***Ir-me/mi-ta-at-ta*** and ***Ir-me-ta-ta*** at Nippur, cf. Clay *PNCP*, 93, to be read ***Erme/i-tatta***, i.e. ****Erwi-tatta***, according to Purves, *NPN*, 263. Since ***Erwi-šarri*** 'the Lord is King' is the name of 29 persons at Nuzi (cf. I.J. Gelb, *NPN*, 48; P.M. Purves, *NPN*, 211) and since it is also well attested elsewhere, interpretation of Linear A ***i-mi-sa-ra*** as ****Irmi/Ermi-šarra*** is to be preferred to that of a compound with ***Ilmi-/Elmi-***, which is considerably less frequent. The ending in ***-a*** of the element ***-šarra*** may well be due to the *essive* case, which explains my translation of the Linear A personal name as 'The Lord (is) *like* the divine King' or 'The Lord (is) *like* the King of Gods'.

These interpretations also offer the Hurrian onomastic element ***ewri/erwi*** in Linear A in the form of ***Irmi/Ermi***, i.e. the form in which the Mycenaean Greeks inherited the name of their god ***Ἑρμῆς < Ἑρμάᾱς < Ἑρμάᾱς***, cf. Linear B ***e-ma-a₂ a-re-ja*** (PY Tn 316 r. 7), interpreted as singular dative ***Ἑρμᾱ́ᾳ Ἀρείᾳ*** 'for *Ἑρμάᾱς Ἀρείᾱς*', 'for Hermes the Martial'.

If this etymology of the name of the god Hermes is correct, it is also conceivable that the Mycenaean theonym ***e-ma-a₂*** did not yet contain an initial ***h-***, but only an intervocalic ***-h-*** (Linear B sign ***a₂*** represents the phonetic value ***ha = ἁ***). In that case it seems likely that the intervocalic ***-h-*** was drawn to the front of the name after the Mycenaean age. The remembrance of a connection of the Hellenized theonym with the original Hurrian ***Ewri / Ibri / Erwi / Ermi/e / Irmi*** 'Lord' was lost.

As a result a 'popular' etymology deriving the name of ***Ἑρμῆς*** from ***ἕρμα*** 'a pillar of wood or stone (representing the image of the god)' or 'a pile of stones' may have become acceptable. U. von Wilamowitz, *Der Glaube der Hellenen I-II*, Berlin 1931-32, 1960[2], followed by M.P. Nilsson, *Geschichte der griechische Religion I-II*, Munich 1941-1950, 1955-1961[2], proposed an etymological connection between the theonym and the noun, but it is not inconceivable that the ancient Greeks may have considered such a 'popular' etymology themselves as well. However, P. Chantraine, *DELG*, 373-374, s.v. ***Ἑρμῆς***, reminds us that the noun ***ἕρμα*** lacks an etymology as well.

It is significant that the site of the Cretan Peak Sanctuary of Symi Viannou has revealed a remarkable continuity in its cult from Minoan times into the Hellenistic era. Since *Hermes Dendrites* and *Aphrodite* are the gods who were later worshipped at Symi Viannou, the site is now called 'Sanctuary of Hermes and Aphrodite', cf. A. Lebessi, Ἱερὸν Ἑρμοῦ καὶ Ἀφροδίτης εἰς Σύμην Βιάννου, *Πρακτικὰ τῆς ἐν Ἀθήναις Ἀρχαιολογικῆς Ἑταιρείας 1972-2003* (see my bibliography for the pages in *Praktika*); A. Lebessi, Ἱερὸν Ἑρμοῦ καὶ Ἀφροδίτης παρὰ τὴν Κάτω Σύμην Βιάννου, *Ἀρχαιολογικὰ Ἀνάλεκτα ἐξ Ἀθηνῶν (Athens Annals of Archaeology) VI (1973)*, 104-114; A. Lebessi, 'A sanctuary of Hermes and Aphrodite in Crete', *Expedition 18:3* (Spring 1976), 2-13; A. Lebessi, 'The erotic goddess of the Syme sanctuary, Crete', *AJA 113 (2009)*, 521-545; A. Lebessi - P. Metaxa-Muhly, 'The sanctuary of Hermes and Aphrodite at Syme, Crete', *National Geographic, Research 3 (1987)*, 102-113, fig. 1-14; A. Lebessi - P. Metaxa-Muhly, 'Aspects of Minoan cult. Sacred enclosures. The evidence from the Syme sanctuary (Crete)', *AA (1990)*, 315-336, fig. 125; A. Lebessi - P. Metaxa-Muhly - J.-P. Olivier, 'An inscription in the Hieroglyphic script from the Syme sanctuary, Crete (SY Hf 1)', *Kadmos XXXIV (1995)*, 63-67, fig. 1-7, pl. 1; P. Metaxa-Muhly, 'Linear A inscriptions from the sanctuary of Hermes and Aphrodite at Kato Syme', *Kadmos XXIII.2 (1984)*, 124-135, Fig. 1-2, Pl. I-IV; P. Metaxa-Muhly - J.-P. Olivier, 'Linear A inscriptions from the Syme sanctuary, Crete', *Ἀρχαιολογικὴ Ἐφημερίς (2008)*, 197-223. Interesting are the so-called cylindrical snaketubes found in the Minoan *temenos* of Symi Viannou and in other Minoan peak sanctuaries such as Koumasa (cf. M.P. Nilsson, *The Minoan-Mycenaean Religion*, Lund 1950, 103, fig. 28), which no doubt played a part in the cult of the gods revered.

The *κηρύκειον* of Hermes (Latin *caduceus*) with two snakes facing each other may remind us of the snakes seen on either side of the snaketubes found in Minoan Peak Sanctuaries. At Symi Viannou not only an uninterrupted continuity of religious cult appears, but the *κηρύκειον* of Hermes preserves one of the most interesting cultic Minoan features, the snakes on either side of snaketubes. Cylindrical snaketubes are not only found in Crete, but also in the Near East, also in the context of sanctuaries, e.g. at Megiddo and Beth-Shan, cf. N.M.W. de Vries, 'The central sanctuaries at Mallia and Megiddo', in: J.G.P. Best - N.M.W. de Vries (eds.), *Interaction and acculturation in the Mediterranean I*, Amsterdam 1980, 125-134, Fig. 7.

The character of the deities worshipped at the site may have changed in the course of time. Linear B ***e-ma-a₂ a-re-ja*** (PY Tn 316 r. 7) = ***Ἑρμάᾳ Ἀρείᾳ*** = 'for *Ἑρμάᾶς Ἀρείᾱς*' = 'for Hermes the Martial' has revealed the martial character of Hermes in Mycenaean times. A martial aspect has at least been one of his features.

M.P. Nilsson (o.c., 515-516) states: "It is very likely that Hermes has appropriated some Minoan-Mycenaean elements, but he was, more than Artemis, an essentially Greek god." One may, however, wonder, what is essentially Greek about Hermes ? He certainly is a god with many human aspects and features, but is that proof of his Greekness ? Is the Cave of Mount *Κυλλήνη* in southern Arkadia, where he was born according to Greek tradition, proof of his Greekness ? At the time of M.P. Nilsson many scholars still believed that the etymology of his name was Greek. C.J. Ruijgh (*EGM*, § 167, n. 482) considered the name Pre-Greek: "… le théonyme *Ἑρμῆς* < *Ἑρμάᾶς* (*e-ma-a₂* PY Tn 316 r 7: dat.), dont la finale est visiblement non grecque [of which the ending is visibly non-Greek.]".

The hypothesis that the theonym ***Ἑρμῆς < Ἑρμάᾶς < *Ἑρμάᾶς*** may be derived from Hurrian ***Ermi-***, variant of ***Erwi-/Ewri*** 'Lord, King', is corroborated by the fact that ***ewri/erwi*** could not only refer to a king of flesh and blood, but also to a deity as is confirmed by the divine names ***ᵈEb-ri-muša***, KUB XXV 50 II 11 sq.; KBo XXIII 25, 2, 5; and perhaps also ***ᵈIr-bi-ti-ig(a)***, provided with the divine determinative (cf. E. Laroche, *GLH*, 85-87, s.v. ***ewri*** 'seigneur, roi'). The title ***ᵈEwri***, if used as a divine name, could refer to a limited number of prominent gods (Tešub in particular), just as the epithet ***Allani*** could refer to *ᵈḪébat* or *ᵈŠa-uš-ka* (*Ištar*). ***Allani*** was also a goddess in her own right as queen of the underworld, comparable with Persephone in Greek mythology.

The number and variety of aspects and functions ascribed to Hermes surprised M.P. Nilsson, but the phenomenon may well be explained from the character of the divine name *ᵈEwri* 'Lord' that could in principle be epithet of any male deity. Tasks that would have been inappropriate for some specific gods could be attributed to him. At Kato Symi Viannou he could be *Hermes Dendrites*. He has features of a shepherd god, but could also be *Ἀργειφόντης* 'killer of Argos', *ψυχοπομπός* 'companion of souls' to the underworld, god of commerce and thiefs and help gods, heroes and mortals at many occasions.

Ἑρμίᾱ, toponym (cf. the adjective ***Ἕρμιος***, derived from the hydronym ***Ἕρμος***, cf. C.J. Ruijgh, *EGM*, § 167, n. 482. …… **981**

Ἑρμιάτᾱς, interpretation of Linear B ***e-mi-ja-ta*** (KN V 831,1), ethnic in ***-ιάτᾱς***, used as a personal name, derived from toponym ***Ἑρμίᾱ*** (cf. adjective ***Ἕρμιος***, derived from the hydronym ***Ἕρμος***. C.J. Ruijgh, *EGM*, § 167[482]: "Il est possible qu'à ce nom préhellénique se rattache le théonyme ***Ἑρμῆς < Ἑρμάᾶς*** (***e-ma-a₂*** PY Tn 316 r 7: dat.), dont la finale est visiblement non grecque; noter que le thème ***Ἑρμο-*** survit dans les anthroponymes composés du type ***Ἑρμογένης*** et du type ***Εὔερμος*** (Bechtel, *H.P.*, 164-166)." ….. **981**

ἐσχάρᾱ Mycenaean Greek ‘low hearth, fireplace, altar for burnt sacrifices’, interpretation of Linear B ***e-ka-ra***. Linear B tablet PY Xa 102: ***di-wo-nu-so-jo*** is joined with PY Ea 107:] ***e-ka-ra*** GR 2 T 6, so that the new text offers the combination ***di-wo-nu-so-jo*** **,** ***e-ka-ra*** GR 2 T 6 = ***Διϝονύσοιο ἐσχάρᾱ*** GR 2 T 6 = ‘altar of Dionysos for burnt sacrifices, 2 talents and 6 T of grain’.

Another Linear B text from Khania: 1. ***di-wi-jo-de di-we***...2. ***di-wo-nu-so…, Δίϝyονδε Διϝεῖ Διϝονύσῳ***, points to ‘a sanctuary of Zeus (***Δίϝyον*** + directive suffix ***-δε***, cf. *di-u-jo*, PY Tn 316 v. 8) for Zeus (dative ***Διϝεῖ***, cf. ***di-we***, PY Tn 316 v. 9, *al.*) and Dionysos, showing that these deities shared a cult and sanctuary at Cretan Khania.

Incidentally, the Hurrian term ***išḫ=ar=i=nni*** ‘baker’ from ****išḫ=ar=i***, derived from the root ****išḫ-***, with root-extension ***-ar-***, is most interesting, if we compare it with Mycenaean Greek ***e-ka-ra = ἐσχάρᾱ***.

E. Laroche (*GLH*, 125) mentions s.v. ***išḫarini*** ‘cuisinier’. RS quadr. 130 Vo 4: *nuḫatimu* = h. *iš-ḫa-ri-ni*. Th. Richter (*BGH*, 102) s.v. ***išḫ-***: o.Ü. [without translation] (Giorgieri 2000a, 211; Wegner 223; *Einführung*, 256: ****išḫ-*** Verbalwurzel [verbal root]). ****išḫari*** ‘kitchen’ (Diakonoff/Starostin 1986, 39); ***išḫarinni*** [Ug.] ‘cuisinier’ corresponds with Akkadian *nuḫatimmu* (E. Laroche, *GLH*, 125); ‘baker’ corresponds with Sumerian [MU], Akkadian *nuḫatimmu*, Ugaritic *’āpiyūma* (*CAD* N/II [1980] 313; Huehnergard 1987a, 52, 108); ‘cuoco’ [‘cook’], i.e. ***išḫ=ar=i=nni*** (Giorgieri 2000a, 211; ‘Bäcker’, i.e. ***išḫ=ar=i=nni*** (Wegner 2000, 223; *Einführung*, 256).

According to P. Chantraine (*DELG*, 379-380) the exact meaning of Greek ***ἐσχάρᾱ***, Ionic ***ἐσχάρη***, is ‘foyer bas, brasier’ [‘low hearth, fireplace’], (*Il.*, *Od.*, Ar., etc.), employé notamment pour des foyers de sacrifice, distingués des *βῶμοι* plus élevés [particularly used for sacrificial fireplaces, distinguished from the higher *βῶμοι*]. With regard to the etymology he adds: Terme technique et dans une certaine mesure religieux des plus anciens. Apparemment dérivé en *-ρᾱ*; pas d’étymologie.

Since there is no Greek or I.-E. etymologie, it is not farfetched, if I assume that (Mycenaean) Greek ***e-ka-ra*** = *ἐσχάρᾱ* that could refer to a charcoal hearth/fireplace in the kitchen or e.g. in the throne-room of the Palace of Nestor at Pylos, where the king could kebab his meat with his guests, but first and foremost the sacrificial altar for burnt sacrifices to propitiate the gods. We may also conclude that ***ἐσχάρᾱ*** does not contain a formant ***-ρᾱ***, but a Hurrian root-extension ***-ar-*** as in ***išḫ=ar=i=nni*** ‘baker’. So I do not believe that ****išḫari*** means ‘kitchen’, but ‘low hearth, fireplace’ for both domestic and sacrificial usage. It is also most likely that (Mycenaean) Greek ***e-ka-ra*** = *ἐσχάρᾱ* is derived from it.

I also think that the name of the goddess ***Išḫara*** is derived from the noun ****išḫari***.

According to K.R. Veenhof (*Woordenboek der Oudheid*, Bussum 1979, 1508-1509) Babylonian ***Išḫara*** (Akkadian ***išḫara*** < older ***ešḫara***) attested since the Ur III-period, is of unknown provenance. Her qualifications seem to reflect her relation with the altar for burnt sacrifices, for she is the ‘Lady of the verdict and the sacrificial altar’.

She is also ‘Mistress of the inhabited regions / residences’ and has some militant features. She was also worshipped by the Hittites and at Ugarit, where her name was also spelled as ***Ušḫara*** and in the list of Hurrian divinities (RS. 24.295) as ***užḫrd***, with Hurrian directive suffix ***-d*** in alphabetic cuneiform (= ***-da*** in syllabic cuneiform).

V. Haas (*Hethitische Berggötter und hurritische Steindämonen, Riten, Kulte und Mythen*, Mainz 1982, 99-102) has dedicated long passages to the Mountain Goddess ***Išḫara***. A sanctuary of ***Išḫara*** was built on the mountain ***Išḫara*** (named after the goddess) in Kizzuwatna near Tarsus, the Hittite city of Tarša. According to V. Haas she is a very old Syrian goddess, already in the 3rd millennium B.C. worshipped in North-Syrian Ebla. From North-Syria she came to Mesopotamia and was already at the time of the 3rd dynasty of Ur venerated at Drehem south of Nippur.

With the increasing influence of religious cults and rites from southeast Anatolia into Ḫattuša the significance of ***Išḫara*** grew in the corresponding documents of the Hittite capital. In the pantheon of Ḫattuša she is mentioned with *Allani* and the goddesses of Fate, *Ḫudena Ḫudellurra = ḫdn-št ḫdlr-št* at Ugarit (cf. E. Laroche, 'Notes sur le panthéon hourrite de Ras Shamra', *JAOS 88,2 (1968)*, 148-150). Her festivals were celebrated in spring and autumn. Here we find peculiar rites: For instance, the sculpture of the goddess was borne through *two fireplaces* for purification, a cathartic ritual that only appears in this festival. Can it be accidental that *fireplaces* played such a notorious part in the festival of the goddess, who was herself 'Lady of the verdict and the sacrificial altar' and that ***ἐσχάρᾱ*** means 'low hearth, fireplace, altar for burnt sacrifices', and that the term is attested in Mycenaean Khania, built on top of the Minoan Palace of Khania ?

Whether ***Išḫara*** is originally a Syrian, Sumerian, Akkadian, Hurrian or 'substrate' goddess (cf. Th. Richter, *VHN*, 403-404), she clearly belonged to the Hurrian pantheon as well. I have no doubt that the Mycenaean Greeks inherited the lexeme ***ἐσχάρᾱ*** from Minoan-Hurrian in Minoan Crete. ……. **662-663**, **977**, **979-980**, **1016**
